Enclosures for hazardous areas EBMX clamped enclosures

CROUSE-HINDS SERIES

Clamped EBMX NEMA 7 classified enclosures

Clamped EBMX: NEMA 7 classified enclosures

Safer. Faster.

Easy access, lower risk and less downtime.

Creative thinking and reliable solutions. That's what you need in the world's most demanding environments, and that's what Eaton's Crouse-Hinds delivers with its new **clamped EBMX explosionproof enclosures**.

The only clamped enclosure for hazardous areas.

CLAMP DOWN on safety & productivity

The challenge:

Traditional classified enclosures require a significant number of bolts designed into their covers.

Issue #1 – Time

Opening and closing traditional bolted enclosures is a labor-intensive task. Facilities that regularly inspect their enclosures as part of a preventative maintenance plan can spend thousands of dollars a year on labor.

Issue #2 – Installation errors

A traditional NEMA 7 enclosure that has been properly installed is extremely safe. However, human installation error may result in bolts being left out or not torqued properly. If internal combustion were to occur inside an incorrectly installed enclosure, a flame could escape and ignite the outside atmosphere.

The solution:

The clamped EBMX from Eaton's Crouse-Hinds. The world's only NEMA 7 classified enclosure to utilize clamping technology.

The EBMX advantage:

FASTER. A significant reduction in installation and maintenance costs due to its revolutionary design makes opening and closing the EBMX significantly faster than traditional enclosures.

SAFER. The clamps on the EBMX enclosure automatically apply even pressure across the flame path for an error-proof installation. No need to worry about missing or improperly torqued bolts creating an explosion hazard in your facility.

The EBMX enclosure is rated Class I, Divisions 1 and 2, and has a NEMA 4X rating to protect against water ingress.

Enclosure cycle time (open/close)*

Why EBMX?

Save time and money. Reduce safety risk for personnel, maintenance costs and downtime activities.

Environmental ratings

• NEMA 3R, 4X*, 7BCD, 9EFG

Certifications and compliances

- NEC & CEC
 - Class I, Divisions 1 and 2, Groups B, C and D
 - Class II, Groups E, F and G
 - Class III
 - Class I, Zones 1 and 2
- UL Standards
 - UL1203 Explosionproof and Dust-ignition-proof Electrical Equipment for Use in Hazardous (Classified) Locations
 UL2062 High AIC Ratings for Groups C and D
- cUL to CSA C22.2 No. 30
- UL/cUL certified for -50°C to+60°C
- SASO Certificate of Conformity

Standard materials

- Body and cover copper-free aluminum
- Clamp anodized copper free aluminum
- External hardware stainless steel
- Internal parts galvanized steel
- * Enclosures with PB23, RR2 and RR3 options are rated NEMA 3R. All other options maintain NEMA 4X rating.

Extended temperature range:

• -50°C to +60°C certified enclosure temperature rating

Reduced risk:

• No missing, stripped, broken or improperly torqued bolts

Simplified alignment:

 Side operated handles for visual confirmation of proper operator alignment while cover is open

The only clamped solution

Save time and money

- Simple clamp cover design opens in seconds
- Reduces installation and maintenance costs

Error-proof installation

- All surface clamps apply even
 pressure across the flame path
- No chance of missing bolts

Multi-use and highly customizable

- Designed for use as starter, combo starter, disconnect switch or breaker
- 65kAIC at 480V certified enclosure rating
- Up to 6 cover operators
- Factory wired
- Thermal magnetic and electronic trip breakers
- Bi-metallic and electronic overload starters

Patented safety

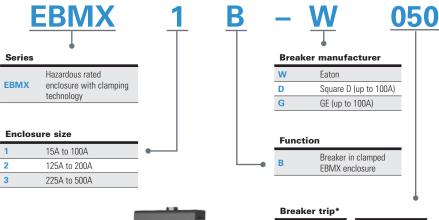

• 11 patents associated with all-clamp technology

Ordering information – Breaker

Part number example

EBMX1B-W050 AIC

EBMX hazardous rated breaker, size 1 enclosure, Eaton breaker, 50A breaker trip, 65kAIC breaker
