Subject: Introducing the Eaton 93E 400kVA UPS

New models extend range to 400kVA

The new 93E rating is optimised at 400kVA and is also available in a 300kVA software de-rated model.

Compared to the 9395 400-450kVA models the new 93E is significantly more competitive and offers a reduced footprint.

As with the smaller 93E ratings, the new models feature:

- Hot Sync[®]
- ABM[®]
- Easy Capacity Test
- High Efficiency Mode (with 2ms transfer time for 300/400kVA!)
- Optional switchgear:
 - Input Circuit Breaker & Back-feed contactor

The 300/400kVA models additionally include top and bottom cable entry as standard.

First factory shipments of single modules will be available on 1st August, purchase orders are being accepted now! Hot Sync[®] capability will be available 2 months later.

The following sales tools have been uploaded to the Salesweb:

- Technical Specification
- Guide Specification
- Site Planning Guide
- Dimension Drawing
- Sales presentation
- Sales training presentation

The product brochure is being updated and will be available within the next few days. The user manual will be available within the next 2 weeks.
