Power infrastructure solutions & products

Powering Business Worldwide

Powering business worldwide

As a global power management company, we help customers worldwide manage the power needed for buildings, aircraft, trucks, cars, machinery and businesses.

Eaton's innovative technologies help customers manage electrical, hydraulic and mechanical power more reliably, efficiently, safely and sustainably.

EATON

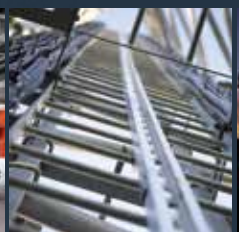
Powering Business Worldwide

We deliver:

- **Electrical solutions** that use less energy, improve power reliability and make the places we live and work safer and more comfortable
- **Hydraulic and electrical solutions** that enable machines to deliver more productivity without wasting power
- **Aerospace solutions** that make aircraft lighter, safer and less costly to operate, and help airports operate more efficiently
- **Vehicle drivetrain and powertrain solutions** that deliver more power to cars, trucks and buses, while reducing fuel consumption and emissions

We provide integrated solutions that help make energy, in all its forms, more practical and accessible.

With 2017 sales of $20.4 Billion, Eaton has approximately 96,000 employees around the world and sells products in more than 175 countries.



Eaton's electrical business

Eaton is a global leader with expertise in:

- Power distribution and circuit protection
- Backup power protection
- Solutions for harsh and hazardous environments
- Lighting and security
- Structural solutions and wiring devices
- Control and automation
- Engineering services

Eaton is positioned through its global solutions to answer today's most critical electrical power management challenges. With 100 years of electrical experience behind us, we're energized by the challenge of powering up a world that demands twice as much energy as today. We're anticipating needs, engineering products and creating solutions to energize our markets today and in the future.

We are dedicated to ensuring that reliable, efficient and safe power is available when it's needed most.

Eaton.com

Eaton's heritage in industry -leading UPS design and production

For more than 50 years, Eaton has been safeguarding the critical systems of businesses across the globe. Whether protecting a single desktop or a large data centre, Eaton solutions provide clean, uninterrupted power to keep mission-critical applications working. We offer a comprehensive range of environmentally sensitive, efficient, reliable UPSs, surge protective devices, power distribution units (PDUs), remote monitoring solutions, meters, software, connectivity solutions, enclosures, airflow management and professional services. We work with IT and facilities managers to effectively manage power in virtually every business segment, including data centres, retail outlets, healthcare organisations, governmental agencies, manufacturing firms, broadcasting companies, financial institutions, and a wide variety of other areas. Our solutions provide the power to make a difference, helping you achieve your business goals while maintaining an environmentally sustainable enterprise.

www.eaton.eu/powerquality

* At Eaton, we believe that power is a fundamental part of just about everything people do. That's why we're dedicated to helping our customers find new ways to manage electrical, hydraulic and mechanical power more efficiently, safely and sustainably. To improve people's lives, the communities where we live and work, and the planet our future generations depend upon. Because this is what really matters. And we're here to make sure it works.

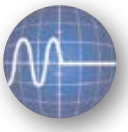
Why use UPS?

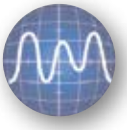
An uninterruptable power supply (UPS) protects IT equipment and other electrical loads from problems that can affect the public electricity supply. It performs the following three basic functions:

1. Prevents hardware damage typically caused by surges and spikes. Many UPS models continually condition incoming power as well.
2. Prevents data loss and corruption. Without a UPS, data stored on devices that are subjected to a hard system shutdown may become corrupted or even lost completely. In conjunction with power management software, a UPS can facilitate a graceful system shutdown.
3. Provides availability for networks and other applications while preventing downtime. UPSs can also be paired with generators in order to give the generators sufficient time to power up in the event of a power cut.

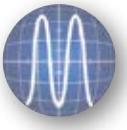
Eaton UPSs address all of the nine common power problems below:



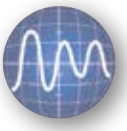
1. Power failure
typically caused by lightning strike or fault with the power company's equipment. Without a UPS, this will cause a hard shutdown, putting data at risk.



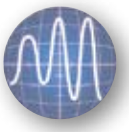
2. Power sag
Short-term voltage reduction, often caused by start-up of nearby large loads. Power sags can cause equipment crashes and hardware damage.



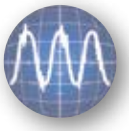
3. Power surge
Short-term high voltage, usually caused by lightning strike nearby. Spikes almost always lead to data loss and/or hardware damage.



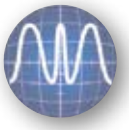
4. Undervoltage
Reduced supply voltage lasting from minutes to days. Typically occurs when supply network is overloaded. Can lead to computers behaving unpredictably.



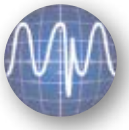
5. Overvoltage
Increased supply voltage lasting from minutes to days. Often triggered by rapid reductions in power demands, overvoltage can damage hardware.



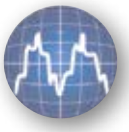
6. Electrical noise
"Interference", typically from radio transmitters, welding equipment etc. Noise can cause hard-to-find intermittent problems.



7. Frequency variation
Changes in supply frequency, usually only found on supplies from generators.



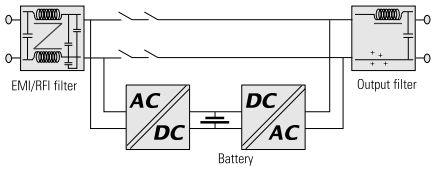
8. Switching transient
Instantaneous undervoltage, typically lasting a few nanoseconds.



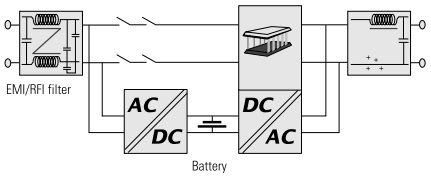
9. Harmonic distortion
Disortion of the normal smooth supply waveform. Can be caused by variable spreed drivers and even photocopiers. Can cause communication errors, overheating and hardware damage.

UPS topologies for different needs

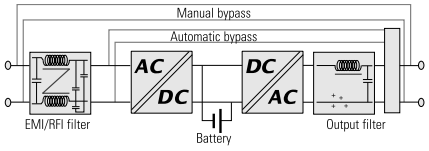
Three common UPS topologies described below provide varying degrees of protection for your equipment.



Passive standby topology (off-line) is the most frequently used UPS topology for protecting PCs against power failure, power sag and power surge. In normal mode, the UPS supplies power to the application directly from the mains, filtered but without active conversion. The battery is charged from the mains. In the event of a power cut or fluctuation, the UPS delivers stable power from the battery. The advantages of this topology are low cost and adequacy for office environments. Passive standby topology is not suitable if the power supply is of low quality (industrial sites) or subject to frequent disruptions.



Line interactive topology is used for protecting enterprise networks and IT applications against power failure, power sag, power surge, undervoltage and overvoltage. In normal mode, the device is controlled by a microprocessor that monitors the quality of the supply and reacts to fluctuations. A voltage compensation circuit is enabled to boost or reduce the supply voltage to compensate for the fluctuations. The main advantage of this topology is that it enables compensation of under and overvoltage without using the batteries.



Double conversion topology (on-line) is a basis for UPSs designed for continuous power protection of critical equipment against all nine power problems: power failure, power sag, power surge, undervoltage, overvoltage, switching transient, line noise, frequency variation and harmonic distortion. It ensures a consistent quality of power supply regardless of disturbances in the incoming mains. The output voltage is entirely regenerated by a sequence of AC to DC conversion followed by DC to AC conversion in order to create power supply without any electrical interference. Double conversion UPSs can be used with any type of equipment as there are no transients when changing over to battery power.

Eaton Protection Box

Eaton Protection Box 8

Eaton Protection Box 5

Eaton Protection Box 1

Advanced protection for:

- Computers, peripherals and multimedia
- TV, Video and Hi-Fi equipment: Home cinema, DVD writers, digital decoders, etc.
- Broadband modems (Internet and TV)
- IP telephony
- Household goods, etc.

Surge protection

The Eaton Protection Box multi-way block with high performance surge protection is a simple solution for protecting delicate equipment.

Effective surge protection

The Protection Box is designed to filter the power supply for delicate equipment to protect it against surges, interference and the indirect effects of lightning.

The high performance of the Protection Box is based on an advanced design with surge protection in compliance with IEC 61643-1.

Complete protection

The Protection Box range has models with 1, 5 or 8 sockets. Some models also provide protection for telephone connections that can carry surges to the equipment.

- Tel@ models: with telephone/broadband Internet access protection
- Tel@ + TV models: with telephone/broadband Internet access protection + Audio/Video protection module (surge protection for television and FM radio with TV and F-Type connectors)

Practical and economical: replaceable surge protection module

(Protection Box 5 Tel@, 5 Tel@ + TV and 8 Tel@ + TV)

The surge protective components for these models are grouped into a pluggable module for:

- Easy replacement if the surge protective devices are destroyed by a major surge (no need to disconnect the equipment and the pluggable unit is an Eaton standard replacement part)
- Can be updated (adding functions, changing connectors, etc.)

Warranty for connected equipment

Eaton offers free warranty for the equipment connected (applicable for EU countries and Norway only). This insurance is included in the purchase price of the Protection Box and covers up to 50 000 € for an 8 socket model to cover damage caused by a failure of the surge protection.

And lots of features to simplify life

- Power ON and active protection indicators
- PowerLine Communications compatibility (Protection Box 5/8) for connecting PLC adapters
- Cable ties and cable markers supplied (5 and 8 socket models)
- Sockets arranged to allow blocks to be plugged side by side

Eaton Protection Box

1 Power ON indicator
2 Active protection indicator

Eaton Protection Station

500/650/800 VA

Eaton Protection Station 800

Multi-position

Advanced protection for:

- Home computing
- Digital leisure equipment

Combined UPS/surge protection/ multiple socket device

Innovative solutions offering total protection for home computers and digital leisure devices.

Connect all your equipment and protect them against power failures and voltage fluctuations…

Eaton Protection Station can do this, offering in a single device:

- Up to 8 standard outlets
- A high performance surge suppressor
- A UPS with 20 to 30 minutes battery back-up for a typical PC

The first UPS in this class with energy saving features

Eaton Protection Station boasts an efficient electrical design with **EcoControl function** that **automatically disables peripherals** when the master device (Computer, HD TV, Home network storage, etc...) is turned off. This will help you **save up to 30% energy** compared to previous generation UPSs.

One model suitable for each application

3 versions (500 VA/250 W, 650 VA/400 W or 800 VA/500 W backup power), to protect an internet PC, a multimedia computer with peripherals or a hardcore gamer configuration. Thanks to its multi-position format Eaton Protection Station can fit anywhere.

Guarantees total peace of mind

- Surge suppressor compatible with IEC 61 643-1 standard (+ status indicator)
- USB port and power management software as standard (650 & 800 models)
- Data line protection to ensure that the internet line (including xDSL) is protected against surges
- Unlimited warranty for the connected computer equipment (EU countries and Norway)
- Periodic test and battery replacement indicator

Eaton 3S UPS

550 – 700 VA

Ideal for protecting:

- Computers and peripherals
- Broadband modems (internet and TV)
- IP telephony equipment
- POS equipment

Power protection for office and home computer equipment

Protection against power problems

- The Eaton 3S UPS helps to protect your computer equipment in case of everyday events such as lightning strikes, storms, over-demand on the utility grid, accidents, and natural disasters knocking out power without warning.
- In the event of a total blackout, the unit provides sufficient battery backup time to last through most power outages.
- The 3S also protects telephone, broadband and Ethernet line from "back door" power surges.
- The shutdown software makes it possible to automatically save your work and shut down your application without losing any data. Once the power is restored, you can continue working exactly where you left off.

Easy integration and installation

- Attractive design and glossy finish make the 3S a perfect fit for the modern office environment.
- The 3S comes with either 6 Schuko (DIN) or 6 French (FR) outlets for easy connection of typical computer configurations with peripherals (IEC model also available with 8 outlets).
- The 3S features a HID-compliant USB port (cable supplied), for automatic integration with common operating systems (Windows/Mac OS/Linux).
- Compact unit fits on or under your desk or can be mounted on a wall.
- Easy-to-replace battery helps to extend UPS service life.

Eaton Ellipse ECO

500/650/800/1200/1600 VA

Eaton Ellipse ECO range

Eaton Ellipse ECO easy integration

Energy-efficient power protection for business computers

- With an efficient electrical design and the EcoControl function (USB models), which automatically disables peripherals when the master device is turned off, the Eaton Ellipse ECO helps you make energy savings of up to 25% compared to previous-generation UPSs.
- As well as providing a power supply backed up by a battery to keep equipment operating during a power failure, the Ellipse ECO also provides effective protection against damaging surges.
- The Ellipse ECO includes a high performance surge-protection device that complies with IEC 61643-1; this device also protects data connections such as Ethernet, internet and telephone lines.

Easy integration and installation

- The Ellipse ECO comes with either four (500/650/800 models) or eight outlets (1200/1600 models) with Schuko (DIN) or French (FR) format for easy connection to typical computer configurations with peripherals. IEC models are also available.
- The Ellipse ECO's extra-flat design makes it easy to install in any office environment: installation options include vertical box format, below the desk, horizontally under a monitor, 19" rack-mounted (optional 2U kit) and wall-mounted (optional kit).
- The USB models are designed to be compatible with a wide variety of different computer models. Eaton UPS companion is delivered as standard (CD and USB cable supplied) and is compatible with all major operating systems (Windows 7, Vista, XP, Linux and Mac OS).

Complete peace of mind

- Unlimited warranty for the connected computer equipment (EU countries and Norway)
- Periodic battery self-test ensures early detection of a battery that needs to be replaced.
- Easy-to-replace battery helps to extend UPS service life.
- Push-button circuit breaker enables easy recovery from an overload or short circuit.

Eaton Ellipse PRO UPS

650/850/1200/1600 VA

Ellipse Pro range

LCD screen

Advanced protection for:

- Workstations
- Network devices
- Peripherals

Energy-saving power protection for workstations

- The LCD screen on the Eaton Ellipse PRO UPS provides clear information on its status and measurements. It also allows easy configuration of UPS settings.
- The EcoControl function, which automatically disables peripherals when the master device is turned off, can cut energy consumption by as much as 20%.
- Automatic Voltage Regulation (AVR) instantly corrects voltage fluctuations, meaning you can continue working through brownouts and overvoltages without using the batteries.
- The Ellipse PRO includes a high performance surge-protection device that complies with IEC 61643-1. This device also protects data connections such as Ethernet, internet and telephone lines.

Easy integration and installation

- The Ellipse PRO comes with either four (650/850 models) or eight (1200/1600 models) Schuko (DIN) or French (FR) sockets for easy connection to most common computer configurations with peripherals. IEC models are also available.
- The Ellipse PRO's extra-flat design makes it easy to install in any office environment: installation options include vertical box format, below the desk, horizontally under a monitor, 19" rack-mounted (optional 2U kit) and wall-mounted (optional kit).
- The Ellipse PRO is equipped with a USB port and comes complete with a USB cable and Eaton UPS Companion software that enables safe system shutdown, energy usage metering and easy configuration of UPS settings.

Complete peace of mind

- Three-year warranty including batteries.
- Unlimited warranty for connected computer equipment (EU countries and Norway only).
- Battery tests itself automatically at regular intervals, ensuring early detection when it's time for replacement.
- Easy-to-replace battery helps to extend UPS service life.

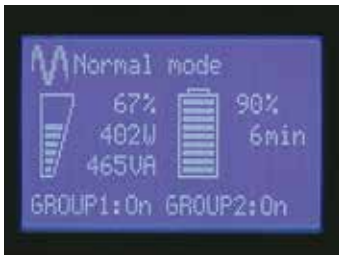
Eaton 5P UPS

650/850/1150/1550 VA

Available in tower and rack 1U format



Intuitive LCD

Ideal for protecting:

- Servers
- Networking
- Storage devices

Eaton 5P is an energy efficient line-interactive UPS with advanced LCD and energy metering features.

Manageability

- The new graphical LCD display provides clear information on the UPS's status and measurements on a single screen (in seven languages). Enhanced configuration capabilities are also available with easy-to-use navigation keys.
- The 5P can meter energy consumption providing kWh values through the LCD and Eaton's power management software.
- Load segment control enables prioritised shutdowns of non-essential equipment during outages in order to maximise battery runtime for critical devices. Load segment control can also be used to remotely reboot locked-up network equipment or to manage scheduled shutdowns and sequential start-ups.
- The 5P offers Serial and USB connectivity, plus an extra slot for an optional communication card (including SNMP/Web card or relay contact card). Eaton's Intelligent Power Software Suite compatible with all major OS including virtualisation software such as VMware and Hyper-V is included with each UPS.

Performance and efficiency

- Energy efficient UPS: With an optimised electrical design, the 5P provides up to 98% efficiency, reducing cooling and utility costs.
- Pure sinewave output: When operating in battery mode the 5P provides a high quality output signal for any sensitive equipment connected, such as active PFC (power factor corrected) servers.
- Adjustable tolerance and sensitivity: Users can maximise useful battery life by widening the input voltage window or adjustable input waveform sensitivity (via the LCD or software) to adapt the UPS to a specific environment (like Genset).

Availability and Flexibility

- The 5P is available in tower or Rack 1U format, providing unmatched energy density with up to 1.1 kW in only 1U.
- Stronger, longer battery life: Eaton ABM® battery management technology uses an innovative three-stage charging technique that extends batteries by up to 50%.
- Batteries can be hot-swapped without ever having to shut down connected equipment. With an optional, hot-swap maintenance bypass module, you can even replace the entire UPS.

Eaton 5P UPS

1 Graphical LCD:

- Clear information on UPS status and measurements
- Energy metering
- Enhanced configuration capabilities
- Available in seven languages

2 Panel for batteries replacement (Hot-swappable)

Eaton 5P 1550i UPS

3 One USB port + one serial port + remote ON/OFF and remote power OFF connector

4 8 IEC 10 A sockets (including two groups of controlled sockets)

5 Communication card slot

vmware READY MANAGEMENT AND ORCHESTRATION

Eaton 5PX UPS

1500/2200/3000 VA

Rack/Tower versatile

Intuitive LCD display for ease
of configuration and management

Advanced protection for:

- Servers
- Switches
- Routers
- Storage devices

Exceptional efficiency, manageability and energy metering capabilities for IT managers

Manageability

- The new graphical LCD display provides clear information on the UPS's status and measurements on a single screen (in seven languages). Enhanced configuration capabilities are also available with easy-to-use navigation keys.
- For the first time in the industry the 5PX can meter energy consumption right down to the managed outlet groups. kWh values can be monitored using the LCD or Eaton's Intelligent Power Software Suite.
- Load segment control enables prioritised shutdowns of nonessential equipment to maximise battery runtime for critical devices. Load segment control can also be used to remotely reboot locked-up network equipment or to manage scheduled shutdowns and sequential start-ups.
- The 5PX offers Serial and USB connectivity, plus an extra slot for an optional communication card (including SNMP/Web card or relay contact card). Eaton's Intelligent Power Software compatible with all major OS including virtualization software such as VMware and Hyper-V is included with each UPS.

Performance and Efficiency

- With an optimised electrical design, the 5PX can provide up to 99% efficiency, reducing cooling and utility costs.
- With a power factor of 0.9, the 5PX delivers more real output power. It powers more servers than other UPSs with equivalent VA ratings and lower power factors. The 5PX is compatible with all modern IT equipment.
- When operating in battery mode the 5PX provides a high quality output signal for any sensitive equipment connected, such as active PFC (power factor corrected) servers.

Availability and Flexibility

- The 5PX is available in a rack/tower convertible version - pedestal and rail kits are included with all models at no extra charge.
- Stronger, longer battery life: Eaton ABM® battery management technology uses an innovative three-stage charging technique that only recharges the battery when necessary, so the battery experiences less corrosion and service life is prolonged by up to 50%.
- Batteries can be hot-swapped without ever having to shut down connected equipment. With an optional, hot-swap maintenance bypass module, you can even replace the entire UPS.
- There is also the possibility to add more runtime with up to four external hot-swappable battery modules, able to run systems for hours if necessary. The additional battery modules are automatically recognised by the UPS.

Eaton 9SX Tower UPS

700/1000/1500/2000/3000 VA

9SX Tower model

9SX graphical LCD

Advanced protection for:

- IT, Networking, Storage and Telecom
- Infrastucture, Industrial and Medical

Online double conversion UPS
Successor of Eaton 9130 UPS

Performance and Availability

- Double-conversion topology. The Eaton 9SX constantly monitors power conditions and regulates voltage and frequency.
- The internal bypass allows service continuity in case of internal fault, a maintenance bypass is also available (as option) for easy replacement of the UPS without powering down critical systems.
- With a 0.9 power factor the 9SX delivers 28% more power than UPS in its class. It powers more servers than other UPSs with equivalent VA ratings and lower power factors.
- Stronger, longer battery life: Eaton ABM® battery management technology uses an innovative three-stage charging technique that extends battery life by up to 50%. 9SX also provides recommended replacement date for batteries.

Manageability

- The new graphical LCD provides clear information on the UPS's status and measurements on a single screen. Enhanced configuration capabilities are also available.
- The 9SX can meter energy consumption. kWh values can be monitored using the LCD or Eaton's Intelligent Power® Software.
- Load segment control enables prioritised shutdowns of nonessential equipment to maximise battery runtime for critical devices.
- 9SX offers Serial, USB connectivity, plus an extra slot for an optional communication card. Eaton's Intelligent Power® Software seamlessly integrates with leading virtualisation environments and cloud orchestrations tools.

Flexibility

- The tower is about the size of a modern, compact PC.
- More runtime can be added with up to 4 external hot-swappable battery modules, able to run systems for hours if necessary. The additional battery modules are automatically recognized by the UPS.

Eaton 9SX UPS

Eaton 9PX UPS
1000–3000W

3000W in only 2U!

VA = Watt

Advanced protection for:

- Small and Medium Datacentre
- IT, Networking, Storage and Telecom
- Infrastucture, Industrial and Medical

Energy efficient power protection

Performance and efficiency

- 9PX is the first UPS in its class to provide Unity power factor (VA=W). It delivers 11% more power than any other UPS as well as powering more servers with equivalent VA ratings and lower power factors.
- Energy Star qualified, the 9PX provides the highest efficiency level to reduce energy and cooling costs.
- Double conversion topology. The Eaton 9PX constantly monitors power conditions and regulates voltage and frequency.
- With a versatile Rack/Tower form factor, the 9PX is the most compact solution delivering up to 3000W in only 2U.

Manageability

- The graphical LCD display provides clear information on the UPS's status and measurements on a single screen. Enhanced configuration capabilities are also available.
- 9PX can meter energy consumption right down to the managed outlet groups. kWh values can be monitored using the LCD or Eaton's Intelligent Power™ Software.
- Load segment control enables prioritised shutdowns of non-essential equipment to maximize battery runtime for critical devices.
- 9PX offers Serial and USB connectivity, plus an extra slot for an optional communication card. Eaton's Intelligent Power Software seamlessly integrates with leading virtualisation environments and cloud orchestrations tools.

Availability and flexibility

- 9PX UPS is available in RT2U format (optimised for rack mounting) or RT3U (for tower or short-depth racks), pedestal and rail kits are included with all models.
- The internal bypass allows service continuity in case of internal fault, a maintenance bypass is also available (as standard on HotSwap version) for easy replacement of the UPS.
- Stronger, longer battery life: Eaton ABM® battery management technology uses an innovative three-stage charging technique that extends battery life by up to 50%.
- More runtime can be added with up to 4 external hot-swappable battery modules, able to run systems for hours if necessary.

Powering Business Worldwide

Eaton 9PX UPS

5/6/8/11 kVA

Rack/Tower versatile

9PX 1:1 is an Energy Star® qualified UPS

9PX 11 kVA with maintenance bypass

Advanced protection for:

- Small and Medium Datacentre
- IT, Networking, Storage and Telecom
- Infrastucture, Industrial and Medical

Watch 9PX's video

Energy efficient power protection

Performance and Efficiency

- Double-conversion topology. The Eaton 9PX constantly monitors power conditions and regulates voltage and frequency.
- With up to 95% efficiency in online double-conversion mode and 98% in high-efficiency mode the 9PX provides the highest efficiency level in its class to reduce energy and cooling costs.
- With a 0.9 power factor the 9PX delivers 28% more power than any UPS in its class. It powers more servers than other UPSs with equivalent VA ratings and lower power factors.
- With a RT (Rack/tower) versatile form factor the 9PX is the most compact solution in its class delivering up to 5400 W in only 3U and 10 kW in only 6U.

Manageability

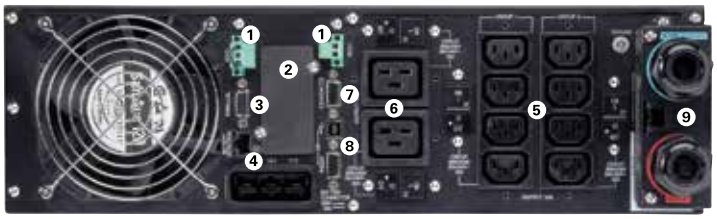
- The new graphical LCD provides clear information on the UPS's status and measurements on a single screen (in seven languages). LCD display position can be adjusted to offer the best viewable angle for tower and rack usage.
- The 9PX can meter energy consumption. kWh values can be monitored using the LCD or Eaton's Intelligent Power Software.
- Load segment control enables prioritised shutdowns of nonessential equipment to maximise battery runtime for critical devices. It can also be used to remotely reboot locked-up network equipment or to manage scheduled shutdowns and sequential start-ups.
- The 9PX offers Serial, USB and relay connectivity, plus an extra slot for an optional card (Network card delivered as standard on Netpack version). Eaton's Intelligent Power Software is compatible with all major OS including virtualisation software such as VMware and Hyper-V is included with each UPS.

Availability and Flexibility

- The internal bypass allows service continuity in case of internal fault, a maintenance bypass is also available (as standard on HotSwap version) for easy replacement of the UPS without powering down critical systems.
- The 9PX can be paralleled to achieve twice the power of unitary product using HotSync technology, without extra cost on the initial purchase.
- Stronger, longer battery life: Eaton ABM® battery management technology uses an innovative three-stage charging technique that extends battery life by up to 50%.
- More runtime can be added with up to 12 external hot-swappable battery modules, able to run systems for hours if necessary. The additional battery modules are automatically recognised by the UPS.

Eaton 9PX UPS

1 Remote Off/On and Remote Power Off connectors
2 Slot for Network-MS, ModBus-MS or Relay-MS cards
3 Parallel operation port (DB15)
4 External battery module (EBM) connector with automatic detection (RJ11)



Eaton 9PX 6 kVA 1:1

5 8 IEC 10 A sockets (2 groups of 4 manageable sockets) with cable retention system
6 2 IEC 16 A sockets with cable retention system
7 DB 9 with output contacts
8 USB and serial ports
9 Input/Ouput connection

Eaton 9155 UPS

8 - 15 kVA

Advanced power protection for:

- Banking
- Small server and computer rooms
- Healthcare
- Network communications
- Security systems
- Automation systems

Double conversion UPS

Premium power performance

- Double conversion topology provides the highest level of protection available by isolating the output power from all input anomalies.
- With a transformer-free design and sophisticated sensing and control circuitry the 9155 delivers an efficiency of up to 92%.
- Active power factor correction (PFC) provides unbeatable 0,99 input power factor and less than 4,5% ITHD, thus eliminating interference with other critical equipment in the same electrical network and enhancing compatibility with generators.
- With 0.9 output power factor, UPS is optimized to protect modern IT equipment without need to oversize.

True reliability

- Patented Powerware HotSync® technology enables paralleling of two or more UPS modules to increase availability or add capacity. The technology enables load sharing without any communication line, thus eliminating single point of failure.
- ABM® technology charges batteries only when necessary, reducing batteries corrosion and prolonging batteries service life by up to 50%.
- Internal batteries in all standard configurations provide an extended runtime with the smallest footprint.

Extensive configurability

- Further runtime extension is possible with external battery cabinets.
- A multilingual graphical LCD display makes possible to monitor the UPS status easily.
- The 9155 can also be integrated into network management, industrial automation and building management systems.
- Bundled Eaton Software Suite provides an orderly network shutdown in an event of extended power outage.

Cost savings and sustainability

- The 9155 features high up to 92% efficiency, thus reducing utility costs, extending battery runtimes and producing cooler operating conditions.
- Compact space efficient tower design offers smaller footprint enabling easy data centre space-planning and preserving valuable raised-floor real estate.
- Included internal batteries eliminate the need for costly and space-consuming external battery cabinets.
- A single technical platform used in Eaton´s three-phase UPS products guarantee easy upgrades and similarity in service, thus lowering total cost of ownership.
- A range of service agreement options can be easily customized for customers' needs and budget.
- Eaton uses sustainable materials and highly efficient manufacturing technology, thus generating dramatic savings in carbon footprint as compared to competitive UPS systems.

Eaton 9155 UPS 8-15 kVA

TECHNICAL SPECIFICATIONS

UPS output power rating (0,9 p.f.)				
kVA	8	10	12	15
kW	7,2	9	10,8	13,5

General	
Efficiency in double conversion mode (full load)	91%
Efficiency in double conversion mode (half load)	90%
Efficiency in high efficiency mode	up to 98%
Distributed parallelling with Hot Sync technology	4
Field upgradeable	yes
Inverter/rectifier topology	transformer-free IGBT with PWM
Audible noise	<50 dB
Altitude (max)	1000 m without derating (max 2000 m)

Input	
Input wiring	1 ph or 3 ph + N + PE
Nominal voltage rating (configurable)	220/380, 230/400, 240/415 V 50/60 Hz
Input voltage range	Low -20% at 100% load/-50% at 50% load without battery discharge; High +10% /max +20%
Input frequency range	45-65 Hz
Input power factor	0,99
Input ITHD	less than 4,5%
Soft start capability	Yes
Internal backfeed protection	Yes

Output	
Output wiring	1 ph
Nominal voltage rating (configurable)	220, 230, 240 V 50/60 Hz
Output UTHD	<3% (100% linear load); <5% (reference non linear load)
Output power factor	0,9 (e.g. 9 kW at 10 kVA)
Permitted load power factor	0,7 lagging - 0,8 leading
Overload on inverter	10 min 100-110%; 1 min 110-125%; 5 sec 125-150%; 300 ms >150%
Overload when bypass available	60 min 100-110%, 10 min 110-125%; 1 min >125-150%

Battery	
Type	Maintenance free VRLA batteries, NiCd
Charging method	ABM technology or Float
Temperature compensation	Optional
Battery nominal voltage (lead-acid)	384 V (32x12 V, 192 cells)
Charging current / Model	Default 3 A *Max 30 A

*May be limited by maximum UPS input current rating

Accessories	
	Isolation transformer, long-life batteries, external battery cabinets, UPS Center (input, bypass, distribution), X-Slot connectivity (Web/SNMP, ModBus/Jbus, Relay, Hot Sync, ViewUPS-X remote display), Hot Sync parallel tie cabinet, integrated manual bypass, external maintenance bypass switch

Communications	
X-Slot	2 communication bays
Serial ports	1 available
Relay inputs/outputs	2/1 programmable

Compliance with standards	
Safety (CB certified)	IEC 62040-1, IEC 60950-1
EMC	IEC 62040-2
Performance	IEC 62040-3

Nominal voltage rating (configurable)	220/380, 230/400, 240/415 V 50/60 Hz
Input voltage range	Low -20% at 100% load/-50% at 50% load without battery discharge; High +10% /max +20%
Input frequency range	45-65 Hz
Input power factor	0,99
Input ITHD	less than 4,5%
Soft start capability	Yes
Internal backfeed protection	Yes

Output	
Output wiring	1 ph or 3 ph + N + PE
Nominal voltage rating (configurable)	220, 230, 240 V 50/60 Hz
Output UTHD	<3% (100% linear load); <5% (reference non linear load)
Output power factor	0,9 (e.g. 27 kW at 30 kVA)
Permitted load power factor	0,7 lagging - 0,8 leading
Overload on inverter	10 min 100-110%; 1 min 110-125%; 5 sec 125-150%; 300 ms >150%
Overload when bypass available	60 min 100-110%, 10 min 110-125%; 1 min >125-150%

Battery	
Type	Maintenance free VRLA batteries, NiCd
Charging method	ABM technology or Float
Temperature compensation	Optional
Battery nominal voltage (lead-acid)	432 V (32x12 V, 216 cells)
Charging current / Model	Default 3 A *Max 30 A

*May be limited by maximum UPS input current rating

Accessories	
	Isolation transformer, long-life batteries, external battery cabinets, X-Slot connectivity (Web/SNMP, ModBus/Jbus, Relay, Hot Sync, ViewUPS-X remote display), Hot Sync parallel tie cabinet, integrated manual bypass, external maintenance bypass switch

Communications	
X-Slot	2 communication bays
Serial ports	1 available
Relay inputs/outputs	2/1 programmable

Compliance with standards	
Safety (CB certified)	IEC 62040-1, IEC 60950-1
EMC	IEC 62040-2
Performance	IEC 62040-3

Stand-alone UPS with 3-phase input

Eaton BladeUPS

12/24/36/48/60 kW

Designed for data centres – to ensure maximum uptime and efficiency

Simply scalable

- Eaton BladeUPS provides scalable double-conversion backup power
- BladeUPS is designed for the data centre -to work in harmony with your servers and IT equipment to ensure maximum uptime and maximum efficiency
- Scalable architecture enables you to design, scale and grow your data centre as your demand grows.
- BladeUPS provides from 12 kW to 60 kW N+1 mounted in a single IT rack enclosure, with multiple power distribution options
- BladeUPS delivers an industry-leading 98% efficiency across the operating range, resulting in cooler operating conditions and less heat dissipation

Highly flexible

- BladeUPS is extremely flexible and supports multiple configurations including power protection in each rack, centralised protection, zone protection or hybrid as required
- If your needs change or need to move your IT equipment, simply redeploy and reuse BladeUPS as single of parallel units elsewhere
- Multiple external batteries can be added to increase runtime
- BladeUPS has multiple power distribution options including the Rack Power Module (RPM), ePDUs or hardwired. The 3U RPM delivers single-phase power and can be deployed in the same rack as the UPS and IT equipment.

Highly efficient

- Optimize your operational expenditure - Latest high efficiency technologies provide 98% efficiency, with 65% less heat dissipation to minimise your operational costs and reduce your carbon footprint
- A 60 kW N+1 solution could save over 20,000 in 5 years in energy costs alone
- The small footprint of BladeUPS allows extra space for IT equipment in the rack and data centre.
- Due to the low heat dissipation, air conditioning requirements are reduced by up to a third and BladeUPS can be located close to IT equipment.
- Utilises Eaton's Advanced Battery Management system to prolong battery life by up to 50%

Advanced power protection for:

- Small, medium and large data centres
- Blade servers
- Network environments
- Telephony and VoIP equipment
- Networking applications such as IPTV, security
- Storage devices: RAID, SAN

TECHNICAL SPECIFICATIONS

General	
Power Rating	12 kW per UPS module
Efficiency	Up to 98.6%
Heat Dissipation	371 W/1266 BTU/hr at 100% rated load
Cooling	Fan cooled, temperature microprocessor monitored; front air entry, rear exhaust
Audible Noise, Normal Operation	<60 dBA at 1 meter
Altitude Before Derating	1000 m (3300 ft ASL)

Input	
Input Voltage	400 Vac
Voltage Range	400 V: 311 to 519 Vac, phase to phase
Frequency Range	50 or 60 Hz, ±5 Hz
Input Current Distortion	<5% with IT loads (PFC power supplies)
Input Power Factor	>0.99 with IT loads (PFC power supplies)
Inrush Current	Load dependent
Input Requirements	Three-phase, four-wire + ground
Bypass Source	Same as input (single feed)
Generator Compatibility	Fast sync slew rate for generator synchronisation

Output	
Rated Output Voltage	400 V: 180 to 240 Vac, Ph to N
Output Configuration	Three-phase, four-wire + ground
Output Frequency (nominal)	50 or 60 Hz auto-detection on startup
Frequency Regulation	0.1 Hz free running
Load Power Factor Range	Lagging: 0.7 Leading: 0.9
Total Output Voltage Distortion	<3% with IT loads (PFC power supplies) <5% non-linear or non-PFC power supplies

Battery	
Battery Type	VRLA - AGM
Battery Runtime (Internal)	13 minutes at 50% load 4.7 minutes at 100% load
Battery String Voltage	240 Vdc
Battery Test	Automatic battery test standard (remote scheduling capable) Manual battery test from front display
Battery Recharge Profile	ABM three-stage charging technology
Battery Cut-off Voltage	Variable from 1.67 VPC at <5 min. runtime
Battery Low Condition	Announced with alarm
Extended Battery Capability	Yes, add up to four additional 3U battery enclosures (~34 min at 100% load, >1 hour at 50% load)

Physical	
Dimensions (HxWxD) UPS	261 (6U) x 442 x 660 mm
Note: Total Chassis Weight without batteries or electronics	46 kg
Total Chassis Weight with batteries or electronics	140 kg
Total UPS Weight without Batteries	61 kg
Total UPS Weight with Batteries	140 kg
EBM Weight	77 kg

Communications and User Interface	
Software Compatibility	UPS ships with Software Suite CD
X-Slot Bays	Two available for the cards listed below
Control Panel LCD	Two lines by 20 characters Four menu-driven interface buttons Four status at a glance LEDs
Multi-language	English standard; 20 languages available
Configuration Changes	User capable, firmware auto configures
Dry Contact Inputs	Two, user-configurable
Dry Contact Outputs	One, user-configurable

Service	
Installation	User capable, located in the IT racks
Preventative Maintenance	User capable, optional factory service available
Corrective Maintenance	User capable, optional factory service available
Serviceability Features	Hot-swappable batteries Hot-swappable electronics module Automated internal maintenance bypass Auto-configure firmware Flash firmware upgradeable

Certifications	
EMI	IEC 62040
Surge Protection	ANSI C62.41, Cat B-3
Hazardous Materials (RoHS)	EU Directive 2002/95/EC Category 3 (4 of 5)

Warranty	
Standard	12 months
Warranty Repair	Factory depot repair or replace

Options and Accessories
Detachable input cord
Detachable input/output cord assembly
Detachable paralleling cord assembly
Extended Battery Modules (EBMs)
3U output sub-distribution module
0U to 3U rack power strips
60 kW BladeUPS Parallel Bar
Four-post rail kit

Optional X-Slot Communication Cards	
Application	Card
Web SNMP	ConnectUPS-X Web/SNMP Card
Environment Monitoring	EMP Environmental Monitoring Probe (requires Web/SNMP card)
IBM eServer™ (i5™, iSeries™, or AS/400), industrial	Relay Interface Card
Parallel	Hot Sync Card
Remote LCD Display	ViewUPS-X

Recommended ePDU:	
Y032440CD100000	RPM - Rack Power Module (BladeUPS in, 12xC13 + 6xC19 out) 20 ft lead
EMAB22	ePDU G3 - Managed (0U (C20 16A 1P) 20xC13 4xC19) use in addition to RPM
EMOB22	ePDU G3 - Metered Outlet (0U(C20 16A 1P) 20xC13 4xC19) use in addition to RPM

Eaton 93E UPS

15/20/30/40/60/80 kVA

Eaton 93E 15-80 kVA

Advanced power protection for:

- Financial services
- Building management
- Telecommunications
- Industrial automation equipment
- Healthcare
- Government
- Data centres

Double conversion UPS

Simply effective power protection

- Double conversion provides the highest level of protection available by isolating the output power from all input anomalies.
- With a transformer-free design and sophisticated sensing and control circuitry the 93E UPS delivers an efficiency of up to 98%.
- Active power factor correction (PFC) provides unbeatable 0,99 input power and <5% ITHD, thus eliminating interference with other critical equipment in the same network and enhancing compatibility with generators.
- The UPS is optimized for protecting modern 0,9 p.f. rated IT equipment without the need to oversize.

True reliability

- Eaton's patented HotSync technology makes it possible to parallel up to 4 UPSs in capacity or in redundancy.
- ABM testing and charging cycle helps you to prevent battery problems and in addition lessens corrosion prolonging battery servicelife up to 50%.
- Equipped with a backfeed contactor – no need for additional installments

Extensive configurability

- The 93E offers up to 30% smaller footprint compared to competitive UPS offerings.
- A multilingual graphical LCD display makes possible to monitor the UPS status easily.
- Wide software and connectivity options provide monitoring, management and shutdown capabilities over the network.
- Connectivity options are available to suit nearly any communication requirements, from standard serial communications to secure remote monitoring over the Web.

Cost savings and sustainability

- A new technical platform used in Eaton´s three-phase UPS products guarantee easy upgrades, low MTTR, similarity on service trainings and documentation, thus lowering total cost of ownership.
- Equipped with internal maintenance bypass for safe and easy serviceability.
- A range of service agreement options can be easily customized for customers' needs and budget.

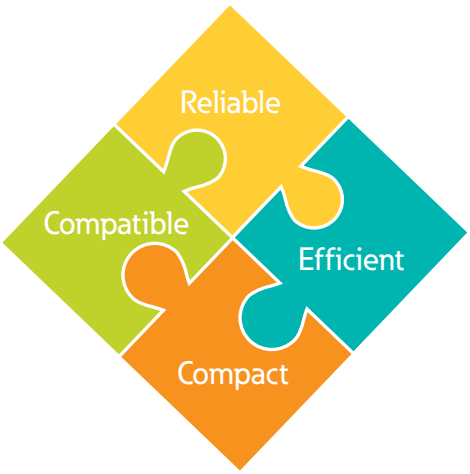
Eaton 93E UPS - Generation 2

100-200 kVA



Your versatile UPS ideal for:

- Industrial automation equipment
- Healthcare
- Small and Medium data centers
- Financial services
- Building management
- Telecommunications
- Government

Practical and versatile power protection ready to drive your goals.

Reliable

- Equipped with a backfeed contactor – no need for an additional installation.
- Equipped with an internal maintenance bypass for safe and easy serviceability.
- HotSync® technology makes it possible to parallel up to 4 UPSs for increased capacity or redundancy allowing maximum availability.
- Advanced Battery Management testing and charging cycle preserves and prolongs battery service life.
- Eaton's Intelligent Power Manager® software allows you to remotely monitor and manage your UPS.
- A multilingual graphical LCD display easily provides the UPS status.

Efficient

- One of the most energy-efficient UPSs in its class with up to 96.1% efficiency in double conversion mode and up to 99.3% efficiency in High-efficiency mode.

Compatible

- Optimized for protecting modern 0.9 p.f. rated IT equipment without the need to oversize.
- Enhanced compatibility with generators and with other critical equipment in the same network via active power factor correction (PFC) that provides 0.99 input power factor and <3% ITHD.

Compact

- Up to 60% smaller than similar competitive solutions.
- 600 mm wide UPS cabinet enables seamless "in-row" integration with IT racks.

Eaton 93E G2 UPS 100-200 kVA

Technical specifications

Power	
UPS output power rating (0.9 p.f)	100 120 160 200 kVA 90 108 144 180 kW
Inverter/rectifier topology	Transformer-free 3-level IGBT with PWM
Distributed paralleling with Hot Sync technology	Up to 4 units
Efficiency in double conversion mode	Up to 96.1%
Efficiency in High-Efficiency mode (HE)	Up to 99.3%
UPS dimensions (Width x Depth x Height)	600 x 800 x 1800 (100-120 kVA)
	600 x 830 x 1880 (160-200 kVA)
Installed weight (max)	283 kg - 100 kVA

Eaton 93PS UPS

8-10 kW

Lowest total cost of ownership (TCO)

- Highest efficiency in its power range with above 96% efficiency in double conversion mode and up to 99% efficiency in Energy Saver System mode
- Scalable by paralleling up to 4 units
- Smallest footprint on the market, footprint only 0.25 m²
- Unity power factor (1.0), providing more real power than many of its rivals

Maximum availability

- HotSync® patented load-sharing technology enables parallel operation of units without communication or loadshare signals. Eliminating the communication link eliminates the risk of single point of failure
- Equipped with ultra-rapid fuses in the Static Switch
  - ensuring safety in all scenarios
- Equipped with backfeed protection
  - no need for additional installments
- Advanced Battery Management – Intelligent battery charging to keep your batteries safe and in good condition
- The 93PS and Eaton's Intelligent Power Manager® software suite takes the resiliency of the system to the next level by bridging the electrical and IT infrastructure

Key applications

- IT applications:
  - Server rooms
  - Localised Data centres
- Mission critical applications:
  - Manufacturing/Industrial facilities
  - Transportation
  - Retail Buildings
  - Healthcare
  - Telecommunication
  - Government

TECHNICAL SPECIFICATIONS

Eaton 93PS UPS

8-40 kW

Eaton 93PS UPS

Advanced power protection for:

- IT applications:
  - Server rooms
  - Localised Data centres
- Mission critical applications:
  - Manufacturing/Industrial facilities
  - Transportation
  - Retail Buildings
  - Healthcare
  - Telecomm
  - Government

Lowest Total Cost of Ownership (TCO)

Efficiency

- Above 96% efficiency in double conversion mode
- Up to 99% efficiency with Energy Saver System

Scalability

- Scalable architecture and 'Pay as you grow' capability to minimise Capital Expenditure
- Paralleling of up to 4 units

Inherent redundancy

- Modular design allows internal redundancy (separate battery configuration also available)

Smallest footprint in the market

- The 93PS provides significantly more in a smaller package, with a footprint of only 0.25 m² for the smaller frame (8-20 kW) and 0.36 m² for the large frame (8-40 kW)

Unity power factor (1.0)

Maximum Availability

Hot Swap and Hot Scalable

- A module can be replaced while the other continues protecting the load (concurrent maintenance)
- A module can be added while the other continues protecting the load (hot scalable)
- Individual battery strings can be serviced while other strings are supporting the load

Super-sized static switch

- Optional super-sized Static Switch to enhance the selectivity of the overall electrical installation

Safety

- Equipped with an ultra-rapid fuse in the Static Switch – ensuring safety in all scenarios
- Equipped with a backfeed contactor – no need for additional installments

Cloud & Virtualisation ready

- The 93PS and Eaton's Intelligent Power Manager software suite takes the resiliency of the system to the next level by bridging the electrical and IT infrastructure
- IT and electrical infrastructure management from a "Single pane of glass"
- Load shedding – 50% drop in load equates to 250% more runtime!

Eaton 93PS UPS

TECHNICAL SPECIFICATIONS

General	8-20 kW	8-40 kW
UPS output power rating (1.0 p.f.)	8, 10, 15, 20	8, 10, 15, 20, 30, 40, 8+8, 10+10, 15+15, 20+20
Model catalogue reference	93PS-XX(20)-YY-	93PS-XX(40)-YY-
Number of internal batteries	0 to 2 x 32 blocks	0 to 4 x 32 blocks
UPS options	Long life batteries (LL) Internal maintenance bypass switch (MBS)External maintenance bypass switch External battery cabinets	
Upgradability	Yes, up to 20 kW	Yes, up to 40 kW
External paralleling	Up to 4 units with HotSync technology	
UPS topology	Double conversion	
Efficiency in Double conversion mode	>96%	
Efficiency in Energy Saver System (ESS)	Up to 99%	
UPS dimensions (width x depth x height)	335 x 750 x 1300 mm	480 x 750 x 1750 mm
UPS Degree of protection	IP 20	
Acoustic noise at 1 m, in 25 °C ambient temperature	< 60 dBA in double conversion < 47 dBA in ESS	
Maximum service altitude	1000 m (3300 ft) above sea level at 40 °C Maximum 2000 m (6600 ft) with 1% derating per each add. 100 m	

Input						
Rated input voltage Voltage tolerance: Rectifier input Bypass input	220/380 V; 230/400 V; 240/415 V 187 to 276 V rated voltage -15% / +10%					
Rated input frequency Frequency tolerance	50 or 60 Hz, user configurable 40 to 72 Hz					
Input wiring	3 phases + neutral					
Input power factor	0.99					
Input ITHD	8 kW < 5%	10 kW < 4%	15-40 kW < 3%			
Rated input r.m.s. current 380V 400V 415V	8 kW 13 A 12 A 12 A	10 kW 16 A 15 A 15 A	15 kW 24 A 23 A 22 A	20 kW 32 A 30 A 29 A	30 kW 48 A 46 A 44 A	40 kW 63 A 61 A 58 A
Soft start capability	Yes					
Back feed protection	Yes, for rectifier and bypass lines					

Output	
Output wiring	3 phases + neutral
Rated output voltage	220/380 V; 230/400 V; 240/415 V, configurable
Total voltage harmonic distortion 100% linear load 100% non-linear load	 < 1% < 5%
Overload capability On inverter On bypass	 10 min 102-110% load 60 sec 111-125% load 10 sec 126-150% load 300 ms >150% load Continuous < 125% load 20 ms 1000% load
Load power factor Rated Permitted range	 1.0 0.8 lagging to 0.8 leading

Battery	8-20 kW	8-40 kW
Battery technology	12 V, VRLA	
Battery design life	5 or 10 years	
Battery quantity	32 blocks, 192 cells per battery string	
Battery voltage	384 V	
Nominal Ah capacity (C10)	9 Ah or 7 Ah Long life	
Charge current limit	Default 5 A, configurable Maximum 25 A	Default 10 A, configurable Maximum 50 A
Battery start option	Yes	

Communication Circuits	
MiniSlot	2 communication bays
Network/SNMP interface	Yes, standard
Standard connectivity ports	Mini-slot ports for optional cards, Device USB and Host USB, RS-232 service port, relay output, 5 building alarm inputs and a dedicated EPO, Web and SNMP card

Compliance with Standards	
Safety (CB certified)	IEC 62040-1
EMC	IEC 62040-2
Performance	IEC 62040-3

Eaton 93PM UPS

30-500 kVA

Key applications

- Small, medium and large data centers
- Finance and banking critical infrastructure
- Commercial buildings and industrial complexes
- Healthcare
- Telecommunications installations
- Process control equipment

Highest availability, at the lowest total cost of ownership

Lowest total cost of ownership (TCO)

- The 93PM UPS sets new standards, with an operating level of up to 96,7% in double conversion mode resulting in significant savings in operational costs.
- > 99% superior efficiency is delivered in Energy Saver System mode (ESS).
- High efficiency even when UPS load levels are low, optimized by Variable Module Management System (VMMS).
- Maximal power and energy density ensures a compact footprint.

Ultimate resiliency

- HotSync® patented load-sharing technology enables parallel operating of static converters without communication or loadshare signals. Eliminating the communication link eliminates risk of single point of failure.
- One static switch per UPS enables the full bypass capacity to be achieved from day one. Power modules can be added as loads increase.
- Equipped with an ultra-rapid fuse in the Static Switch – ensuring safety in all scenarios.
- Equipped with a backfeed contactor – no need for additional installments
- Wide power factor range meets rapidly changing load power factor without de-rating.
- Intelligent battery charging through Advanced Battery Management prevents unnecessary charging and significantly retards battery wear rate.

Higly scalable and easy deployment

- Scalable, modular architecture and 'Pay as you grow' capability minimises CapEx.
- Thermal management support allows for flexible installation against the wall, in rows and in hot/cold aisle configurations.
- Easy access allows fast MTTR (mean time to repair).

Easy management

- Wide range of connectivity options (Web/SNMP, Modbus/Jbus, relay contacts)
- Intelligent Power software integrates with leading virtualisation management systems for monitoring and managing.
- The intuitive touchscreen LCD user interface and visual data logging provides clear information on the UPS status.

Eaton 93PM UPS 30-500 kVA

TECHNICAL SPECIFICATIONS

General	
UPS output power rating	30-500 kVA
Efficiency in double conversion mode	Up to 97%
Variable Module Management System (VMMS) double conversion	Significantly increased efficiency at low loading
Efficiency in Energy Saver System (ESS)[1]	> 99%
Paralleling capability	30-200 kVA: Up to 8 units 250-500 kVA: Up to 4 units
Rectifier and inverter topology	Transformer-free 3-level IGBT-converter
Audible noise	30-60kVA: <60 dBA 80-200kVA: < 65 dBA 250-500kVA: < 69 dBA ESS mode: < 47 dBA
Altitude (max)	1000 m without derating (max 2000 m)

Input	
Input wiring	3ph + N + PE
Nominal voltage rating	220/380V; 230/400V; 240/415V 50Hz/60Hz
Input frequency range	40 to 72 Hz
Input power factor	0.99
Input iTHD	30kVA, 60kVA: < 4.5% 40-500kVA: <3%
Soft start capability	Yes
Internal backfeed protection	Yes

Output	
Output wiring	3ph + N +PE
Nominal voltage rating	220/380V; 230/400V; 240/415V 50Hz/60Hz
Load power factor range	0.8 lagging – 0.8 leading

Battery	
Battery type	VRLA
Charging mode	Advanced Battery Management or Float
Temperature compensated battery charging	Option
Battery start capability	Yes
Alternative backup power technologies	Wet cell batteries NiCd batteries Li-Ion batteries Supercapacitors

Accessories

Long life batteries
External battery cabinets and supercapacitor cabinets
External maintenance bypass switch panels, Integrated manual bypass
Battery breaker enclosures for rack batteries

Connectivity	
Native Relay inputs / outputs	5 relay inputs and dedicated EPO 1 relay output More relay contacts available as option
Software	Eaton Intelligent Power Manager Eaton Intelligent Power Protector
PXGMS –card	Web/SNMP/Modbus RTU and TCP/BACnet IP Temperature, humidity and two status inputs through Environmental Monitoring Probe (option)
Network-MS card	Web/SNMP Temperature, humidity and two status inputs through Environmental Monitoring Probe (option)
INDRELAY-MS card	5 output relays, 1 digital input
Compliance with standards	
Safety	IEC 62040-1; CB certified
EMC	IEC 62040-2
Performance	IEC 62040-3
RoHS	EU directive 2011/65/EU
WEEE	EU directive 2012/19/EU

Due to continuous product improvement programmes, specifications are subject to change without notice.

Power Xpert 9395P UPS

250 - 1200 kVA

Power Xpert 9395P UPS with optional power module status lights

Advanced power protection for:

- Large data centres, infrastructure projects, industrial complexes and other buildings
- Process control equipment
- Healthcare
- Finance and banking infrastructure
- Transportation systems
- Security operations
- Telecommunications installations

Compatible with Lithium-ion batteries and Supercapacitors!

Double conversion UPS

10% more power

- 96.3% double conversion efficiency, delivers 10% more power than the previous 9395 UPS.
- Complete isolation of output power from all input power anomalies, to deliver 100% conditioned, perfect sine-wave output – even during severe power disturbance.
- High efficiency even when UPS load levels are low, optimised by Variable Module Management System (VMMS).
- Energy Saver System (ESS) improves efficiency levels to 99% by suspending power modules when double conversion is not required. Switches to double conversion mode in less than 2 milliseconds in event of pre-set input limits being exceeded. Filtering against fast low-energy transients provided by ESS.
- Producing 18% less heat helps reduce the need for cooling. Designed for continuous operation at ambient temperatures up to 40°C without de-rating. Can also deliver safe power in higher temperatures without shutting down.

Ultimate resiliency

- HotSync® patented load-sharing technology enables parallel operating of static converters without communication or load-share signals. Eliminating the communication link eliminates risk of single point of failure.
- One static switch per UPS enables the full bypass capacity to be achieved from day one. Power modules can be added as loads increase.
- Wide power factor range meets rapidly changing load power factor without de-rating.
- Intelligent battery charging through Advanced Battery Management prevents unnecessary charging and significantly retards battery wear rate.

Scalability and flexibility

- Number of power modules per UPS can be specified.
- Layout can be chosen to suit installation: back-to-back, L-shaped etc. Front-accessible design minimises installation costs and saves valuable data centre space.
- Preferred bypass topology can be specified. Additional modules can be added as power load increases.
- Centralised multi-module paralleled 9395P systems are supported by the Eaton System Bypass Module (SBM). Available in ratings from 2000 A to 5000 A as standard, the SBM includes a continuous-duty centralised static switch, backfeed protection device and centralised bypass systems.
- Service disconnect in each power module allows easy maintenance while the UPS is supporting the load in double conversion mode.
- More than 90% of materials used can be recycled, decreasing end-of-life impact.

Power Xpert 9395P UPS

TECHNICAL SPECIFICATIONS

UPS output power rating								
kVA	250	300	500	600	750	900	1000	1200
kW	250	275	500	550	750	825	1000	1100

General

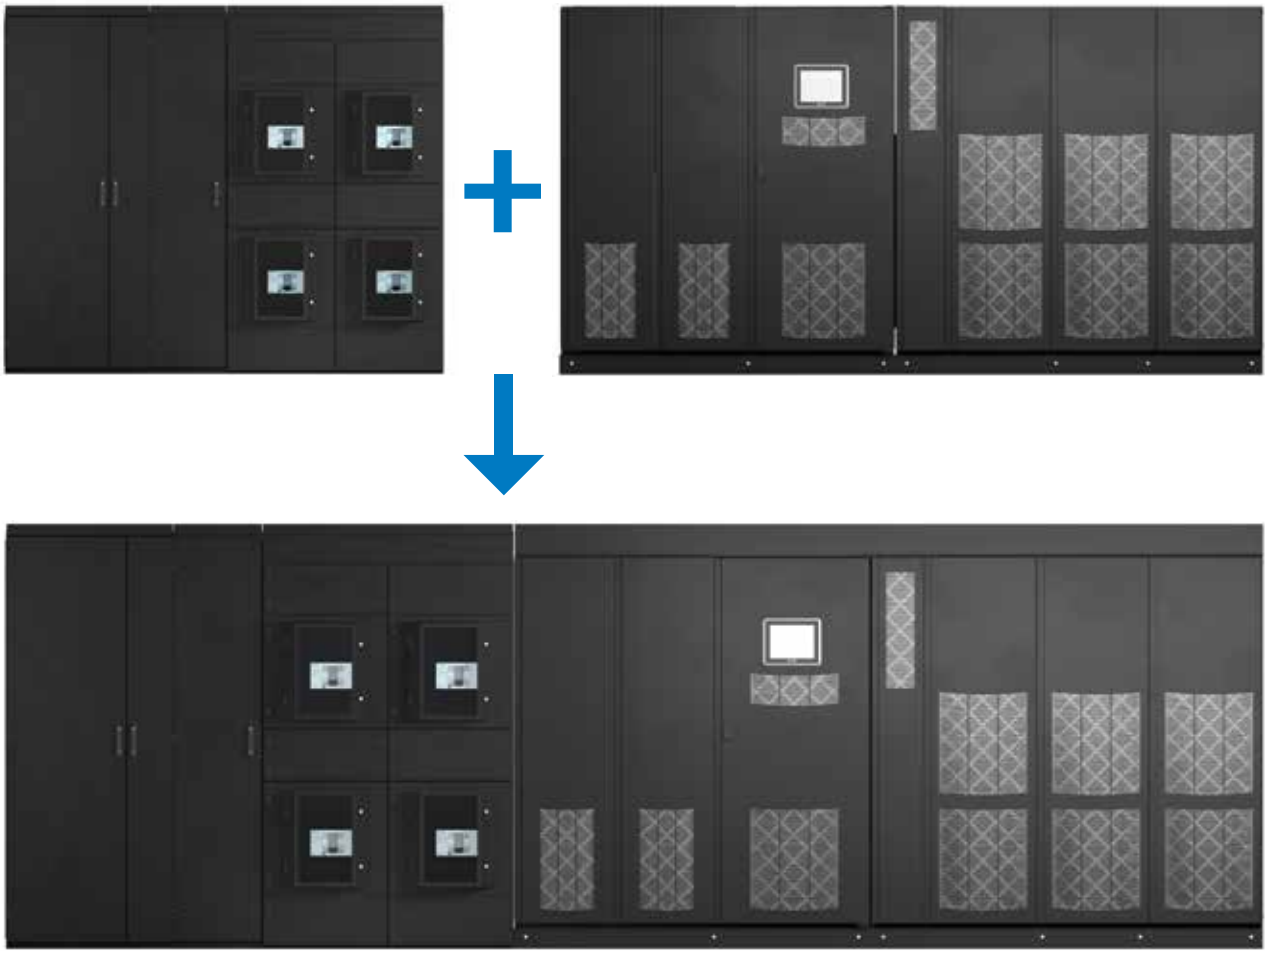
Eaton Connected

The all-in-one solution for power distribution and UPS backup power



Choosing the Eaton Connected solution offers opportunity to save time and to have results delivered on time and budget. Eaton Connected combines two highly reliable, safe and efficient Eaton products, UPS and low voltage switchgear integrate to a market-leading backup power solution.

Power Xpert CX Switchgear can be combined with either Power Xpert 9395P UPS or Eaton 93PM UPS, to provide in one solution:

- Incoming feeder
- Maintenance bypass
- UPS solution
- Outgoing feeders

The result is combined power distribution and UPS backup power solution, that is safe, fast, flexible, reliable – and all-in-one.

The all-in-one solution for power distribution and UPS backup power

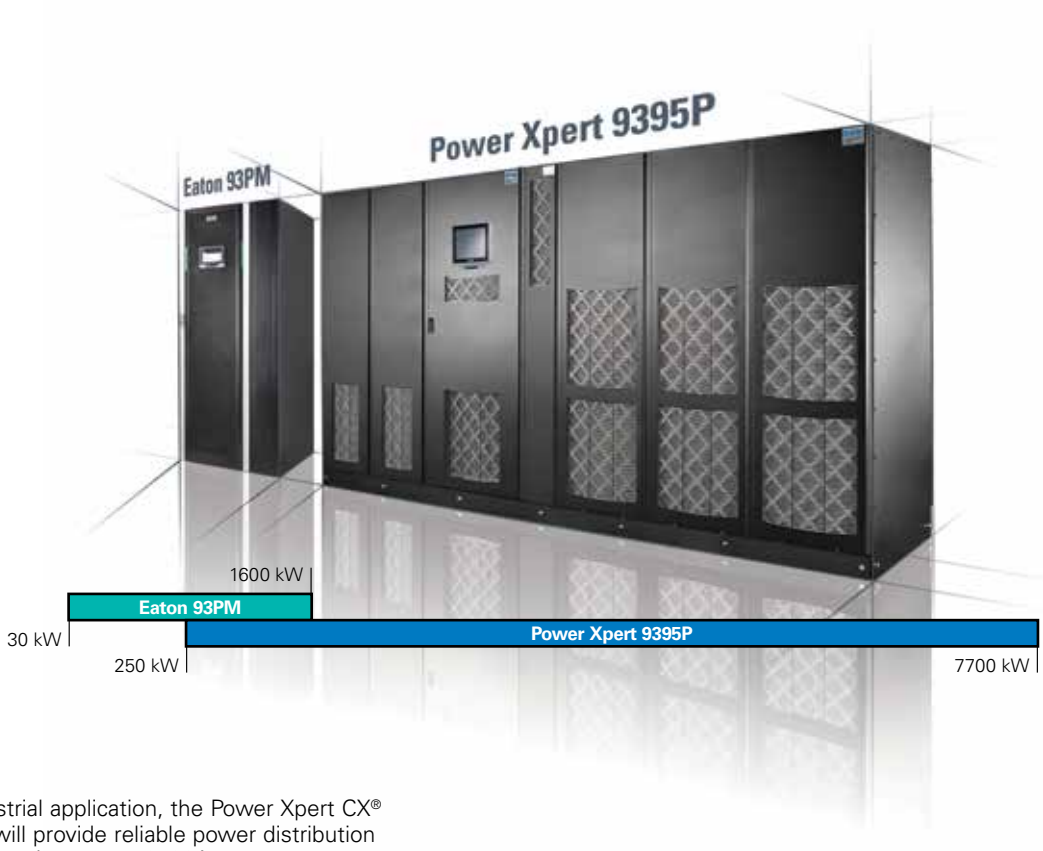
High-quality Eaton components have been carefully selected to ensure reliability and safety. They have been tested against UPS and switchgear standards, as applicable, to validate their safe and reliable operation and their resilience in challenging short-circuit conditions. In addition to separate testing of the UPS and switchgear, the complete Eaton Connected solution is tested and verified as one.

Get faster to market with optimized design

With pre-designed solutions, Eaton Connected makes it quicker and easier to plan and install a system, compared with a conventional component-based system. The modular construction of the Eaton Connected solution allows the optimized design around the project-specific requirements. The result is a solution perfectly tailored to current needs, with a minimum upfront investment. But also it can quickly be scaled to meet changing requirements, easily, efficiently and affordably.

Power to choose

There are two backup power options, Eaton 93PM and Power Xpert 9395P UPSs, available for direct pre-connection to Power Xpert CX switchgear. With power ratings from 30-900 kVA power rating and with a static switch section up to 1200 kVA to meet challenging short-circuit currents.



Low voltage. High reliability

Whatever you commercial or industrial application, the Power Xpert CX® IEC low voltage power assembly will provide reliable power distribution and motor control functionality, for ratings up to 6300A.

The reliable system

Built to a design which has been fully verified by independent third party testing in accordance with IEC 61439-2, Power Xpert CX switchgear is manufactured to the latest international standards.

Its 4B form of internal separation ensure exceptionally reliable operation at all times.

The safe system

For 300 kVA and below, the Power Xpert CX features not only fixed but also plug-in compartments, which allow modification without requiring a complete system shutdown.

Breakers are automatically tripped in case of removal and there are lock-out options too – ensuring safety at all times.

The flexible system

Modular design and construction means that the CX can be expanded as and when required, to meet your changing power distribution needs.

This capability is enhanced by the solution's small footprint, resulting from the switchgear's compact design. In addition, cable connections can be made at the top or the bottom, which means the CX can be located in a range of positons and can accommodate a range of electrical designs.

Eaton 93 STS

100/250/400/630/800/1000/1250A

93 STS

Meeting absolute uptime requirements for:

- Data centres
- Internet providers
- Industrial facilities
- Utilities
- Telecommunications
- Government
- Financial services

Static Transfer Switch

Seamless power transfer

- 3-phase Static Transfer Switch, for automatic transfer of critical AC loads to and from one power source to another, without interruption.
- Rated from 100A to 1250A.
- Available in 3- and 4-pole versions.

Reliable performance

- Continuous monitoring of sources ensures automatic and instantaneous power transfer, without cross-connecting the sources.
- Retransfer is also automatic, and there is the capability for manual transfer if required.
- All the system control boards feature redundant internal power distribution.
- A dual manual bypass is built in, to enable safe maintenance with no disruption of the power supply.
- A global installed base reflects the widespread acceptance and popularity of the Eaton 93 STS.

Connectivity and easy management

- The 93 STS has RS232 and RS485 interfaces, with Modbus protocol. It also features output relay contacts.
- There is a built-in HMI and system mimic panel. The LCD screen and block diagram of the STS – with integrated LEDs – allows a quick check of the switch's operating status.
- Metering, alarms and event logs are also provided.
- The 93 STS range is supplied in a free-standing cabinet.

Eaton 93 STS 100-1250A

Eaton 9PX Marine UPS

1500–3000 W

9PX Marine UPS

Advanced protection for:

- Bridge systems
- Navigation systems
- Communication systems
- Small computer and automation systems

Energy-efficient double conversion UPS

Reliability

Double conversion topology constantly monitors power conditions and regulates voltage and frequency.

The internal bypass allows service continuity in case of internal fault, a maintenance bypass is also available for easy replacement of the UPS.

With coated boards and hi-temperature environment compatibility, 9PX Marine is designed for Marine & Offshore environments.

Stronger, longer battery life: Eaton ABM battery management technology uses an innovative three-stage charging technique that extends battery life by up to 50%.

DNV-GL type approved UPS.

Performance and efficiency

9PX Marine is the first UPS in its class to provide Unity power factor (VA=W). It delivers 11% more power than any other UPS as well as powering more servers with equivalent VA ratings and lower power factors.

9PX can meter energy consumption right down to the managed outlet groups. kWh values can be monitored using the LCD or Eaton's Intelligent Power™ Software.

Energy Star qualified, the 9PX Marine provides the highest efficiency level to reduce energy and cooling costs.

Manageability & Flexibility

The graphical LCD display provides clear information on the UPS's status and measurements on a single screen. Enhanced configuration capabilities are also available.

9PX offers Serial and USB connectivity, plus an extra slot for an optional communication card. Eaton's Intelligent Power Software seamlessly integrates with leading virtualisation environments and cloud orchestrations tools.

More runtime can be added with up to 4 external hot-swappable battery modules, able to run systems for hours if necessary.

ENERGY STAR

VA = Watt

Eaton 9PX UPS technical specifications

1 Graphical LCD display :
- Clear information on UPS status and measurements
- Enhanced configuration capabilities

2 Panel for batteries replacement (Hot swappable)

3 Slot for Management card

Eaton 9PX 3000 Marine

4 Outputs: 8 x IEC 10A + 2 x IEC 16A with energy metering (including 2 programmable groups)

5 USB port,1 serial port, Remote ON/OFF, Remote power OFF and Relay output

6 External battery (EBM) connector

Eaton 9155M and 9355M UPS

8 - 15 kVA

Advanced vessel or rig power protection for:

- Navigation systems
- Communication systems
- Ship automation
- Computer systems
- Integrated bridge

Double conversion UPS

Qualified design for marine and offshore environment

- DNV type approved UPS
- BV type approved UPS
- ABS design assessed
- Compact design for saving space
- Easy to install, mounting rails can be bolted or welded to the deck/bulk head
- IP22 protection class
- Vibration absorbers under and at the back of the cabinet
- Maintenance from the front

Premium power performance

- Double conversion provides the highest level of protection available by isolating the output power from all input anomalies.
- Active power factor correction (PFC) provides 0,99 input power factor and less than 4,5% ITHD, thus eliminating interference with other critical equipment in the same network and enhancing compatibility with generators.
- The UPS is optimized for protecting modern 0,9 p.f. rated IT equipment without the need to oversize.

True reliability

- Patented Powerware HotSync® technology makes it possible to parallel up to four UPSs to increase availability or add capacity. The technology enables load sharing without any communication line, thus eliminating single point of failure.
- ABM technology charges batteries only when necessary, preventing batteries corrosion and prolonging batteries service life by up to 50%.
- Internal automatic static bypass switch
- Internal mechanical bypass switch

Extensive configurability

- Configurable to frequency converter operation (50 → 60Hz and 60 → 50Hz)
- A multilingual graphical LCD display makes possible to monitor the UPS status easily.
- Wide software and connectivity options provide monitoring, management and shutdown capabilities over network.

Cost savings and sustainability

- Small footprint saves valuable space in ship and rig installations.
- Possibility for internal transformer or batteries eliminate the need for costly and space-consuming external cabinets.
- A single technical platform used in Eaton´s UPS products guarantee easy upgrades and similarity in service, thus lowering total cost of ownership.
- A range of service agreement options can be easily customized for customers' needs and budget.
- Eaton uses sustainable materials and highly efficient manufacturing technology, thus generating dramatic savings in carbon footprint as compared to competitive UPS systems.

General	
Efficiency in double conversion mode (full load)	92% (without transformer)
Efficiency in double conversion mode (half load)	90% (without transformer)
Distributed parallelling with Hot Sync technology	4
Field upgradeable	yes
Inverter/rectifier topology	transformer-free IGBT with PWM
Audible noise	<50 dB
Colour	RAL 7035

Input	
Nominal voltage rating (configurable)	380, 400, 415 V 50/60 Hz
With internal transformer	(9155): e.g. 230, 400, 440, 480, 690V
With external transformer	(9355): e.g. 230, 400, 440, 480, 690V
Input voltage range	Low -20% at 100% load/-50% at 50% load without battery discharge; High +10% /max +20%
Input frequency range	45-65 Hz
Input power factor	0,99
Input ITHD	less than 4,5%
Soft start capability	Yes
Internal backfeed protection	Yes

Output	
Nominal voltage rating (configurable)	380, 400, 415 V 50/60 Hz
With external transformer	(9155): e.g. 230, 400, 440, 480, 690V
With internal transformer	(9355): e.g. 230, 400, 440, 480, 690V
Output UTHD	<3% (100% linear load); <5% (reference non linear load)
Output power factor	0,9 (e.g. 9 kW at 10 kVA)
Permitted load power factor	0,7 lagging - 0,8 leading

Battery	
Type	Maintenance free VRLA batteries, NiCd
Charging method	ABM technology or Float
Temperature compensation	Optional
Battery nominal voltage (lead-acid)	384 V (32x12 V, 192 cells)
Charging current / Model	Default 3 A *Max 30 A

*May be limited by maximum UPS input current rating

Accessories	
	Isolation transformer, long-life batteries, external battery cabinets, UPS Center (input, bypass, distribution), X-Slot connectivity (Web/SNMP, ModBus/Jbus, Relay, Hot Sync, ViewUPS-X remote display), Hot Sync parallel tie cabinet, integrated manual bypass, external maintenance bypass switch

Communications	
X-Slot	2 communication bays
Serial ports	1 available
Relay inputs/outputs	2/1 programmable

Compliance with standards	
Safety	IEC 62040-1, IEC 60950-1
EMC	IEC 62040-2, IEC 60945
Performance	IEC 62040-3
Approvals	CE, DNV Type Approval, BV Type Approval and ABS PDA
Other classification survey reports	On request

Eaton 9155M and 9355M UPS

1ph: 20 - 30 kVA
3ph: 20 - 40 kVA

Advanced vessel or rig power protection for:

- Navigation systems
- Communication systems
- Ship automation
- Computer systems
- Integrated bridge

Double conversion UPS

Qualified design for marine and offshore environment

- Compact design for saving space
- Easy to install, mounting rails can be bolted or welded to the deck/bulk head
- IP22 protection class
- Vibration absorbers under and at the back of the cabinet
- Maintenance from the front

Premium power performance

- Double conversion provides the highest level of protection available by isolating the output power from all input anomalies.
- Active power factor correction (PFC) provides 0,99 input power factor and less than 4,5% ITHD, thus eliminating interference with other critical equipment in the same network and enhancing compatibility with generators.
- The UPS is optimized for protecting modern 0,9 p.f. rated IT equipment without the need to oversize.

True reliability

- Patented Powerware HotSync® technology makes possible to parallel up to four UPSs to increase availability or add capacity. The technology enables load sharing without any communication line, thus eliminating single point of failure.
- ABM technology charges batteries only when necessary, preventing batteries corrosion and prolonging batteries service life by up to 50%.
- Internal automatic static bypass switch
- Internal mechanical bypass switch

Extensive configurability

- Configurable to frequency converter operation (50 Ô 60Hz and 60 Ô 50Hz)
- A multilingual graphical LCD display makes possible to monitor the UPS status easily.
- Wide software and connectivity options provide monitoring, management and shutdown capabilities over network
- Internal space for 1 - 2 optional input/output transformers

Cost savings and sustainability

- Compact space efficient tower design offers smaller footprint enabling easy data centre space-planning and preserving valuable raised-floor real estate.
- Possibility for internal transformer eliminate the need for costly and space-consuming external cabinets.
- A single technical platform used in Eaton´s UPS products guarantee easy upgrades and similarity in service, thus lowering total cost of ownership.
- A range of service agreement options can be easily customized for customers' needs and budget.
- Eaton uses sustainable materials and highly efficient manufacturing technology, thus generating dramatic savings in carbon footprint as compared to competitive UPS systems.

Eaton 93PS Marine UPS

8-40 kW

20 kW 40 kW

Key applications:

- Navigation
- Communication
- Automation and monitoring systems
- Auxiliary power systems
- Safety systems
- Distributed UPS systems
- Peak shaving
- EPOS

Ease of deployment

- Spacious power cabling area at the bottom of the unit
- Factory installed and tested internal transformers reduce footprint and cabling at site by 50%
- Best in class footprint and power density for easier floor planning and space saving
- Possibility to design inherently redundant systems in one frame
- Back feed protection and bypass fuses included by default for easier planning and secured safety
- Ships with any classification society certificate as requested
- Engineering package to help planning in 3D or 2D environment
- Pre- and after-sales support assisting you from quoting to decommissioning

Ease of maintenance

- Hot Swap power modules means typical MTTR=0h
- Training + pre-defined spare part kits for basic UPS service
- Fully front serviceable
- Mini Slot extension cards for remote monitoring and management
- No replacement of DC caps during the product design life
- Easy Capacity Test to do full load test without the need for load bank
- Eaton Advanced Battery Management (ABM) maximizes the battery life while providing automatic diagnostics of battery health
- Worldwide coverage of Eaton service at your service 24/7

Economical to operate

- Minimal losses and associated costs due to market leading efficiency reaching above 96%
- Cuts down operational costs by up to 50% compared to a legacy UPS
- Saves up to 650 barrels of marine diesel per UPS
- Flat efficiency curve means high efficiency regardless of the load level
- Compatibility with VRLA, Ni-Cd, Li-Ion or super capacitors allows for choosing the optimal energy or power reserve for your application

Eaton 93PS Marine 8-40 kW

TECHNICAL SPECIFICATIONS

General	
Output power rating (PF 1.0)	8, 10, 15, 20, 30, 40 kW
External paralleling	Up to 4 units with HotSync technology
Inherent redundancy	Up to 20 kW with HotSync technology
Efficiency in double-conversion mode	Up to 96.0%
Efficiency in Energy Saver System mode	Up to 98.8%
UPS topology	Double conversion
UPS performance classification	VFI-SS-111
Degree of ingress protection	IP23
Standard UPS color	Industrial grey; RAL 7035
Ambient service temperature range	0°C to 45°C
Maximum service altitude	1000 m (3300 ft) above sea level at 40 °C
Acoustic noise at 1 m, in 25 °C ambient temperature, without transformers	< 60 dBA in double conversion < 47 dBA in ESS
Mean Time To Repair (MTTR)	< 8 minutes (UPM) / < 15 minutes (UPS)
RoHS/WEEE compliancy	Yes
Input	
Nominal voltage rating Input voltage with internal transformers	380 V, 400 V, 415 V 208 V - 690 V
Input frequency range	40 - 72 Hz
Input wiring	3ph+N+PE (3ph+PE with input transformer)
Input power factor	0.99
Input THDi 100% linear load	< 3%
Soft start for generators	Yes
Internal back feed protection	Yes, for rectifier and bypass lines
Output	
Output wiring	3ph+N+PE / 3ph+PE
Rated output voltage Output voltage with internal transformers	380 V, 400 V, 415 V 208 V - 690 V
Output frequency	50 Hz / 60Hz configurable
Output UTHD	< 1.5% (100% linear load), < 3.5% (100% non-linear load)
Inverter overload capacity	10 min 102 – 110% load
	60 s 111 – 125% load
	10 s 126 – 150% load
	300 ms > 150% load
Static bypass capacity	Continuous < 125% load, 20 ms 1000% load
Short-circuit capability at rated voltage	Up to 144 A / 300 ms
Rated output power factor	1.0
Load power factor range	0.8 lagging to 0.8 leading

Battery	
Battery technology	VRLA, Li-Ion, NiCd, Eaton Super Capacitors
Nominal battery voltage	336 V - 480 V
Charge current limit	
Load ≤80%	Up to 50 A, configurable
Load >80%	Up to 30 A, configurable
Charging method	Eaton ABM technology or float
Boost charge function	Yes
Temperature compensation	Yes
Battery start option	Yes
Communications	
MiniSlots	2 communication bays for Web/SNMP, ModBus/Jbus & Industrial realy
Standard connectivity ports	Device USB and Host USB, RS-232 service port, relay output, 5 building alarm inputs, 1 relay output and a dedicated EPO
Accesories	
Accessories for UPS	Internal transformers; Single feed kit; Earth fault monitoring; 24V Emergency Power Off (EPO); Custom system and battery voltages; Custom colors
Compliance with standards	
Safety (CB certified)	IEC 62040-1
EMC	IEC 62040-2
Performance	IEC 62040-3
RoHS	EU directive 2011/65/EU
WEEE	EU directive 2012/19/EU
Environmental Aspects - Requirements and Reporting	IEC 62040-4, EN 50581

Eaton 9PHD Marine UPS

30–200 kW

Designed, Manufactured and Tested in Finland

Strong and Smart Power Protection

Designed and Certified for Marine and Offshore

Designed for marine and offshore environments

- Marine certificate from any marine classification society
- Marine vibration tested units
- Halogen free cables
- IP23 protection
- Conformally coated PCB boards
- Cable area designed to support marine cabling practices
- Vibration dampers and installation brackets for floor and wall
- Door handle, stopper and triangle key included

Strong design for demanding environments

- Protection against dirt, dust, water and moisture with cover options up to IP54
- 1.5mm cover plates for robust use
- Protection for touch screen display

Smart technology for maximizing reliability

- Large touch screen display for easy operation and reduced risk of human error
- Modular design allows building fault tolerant N+1 units
- Redundant monitored cooling fans in each power module
- Battery start feature
- Eaton's unique Hot Sync wireless paralleling for building n+1 systems with several UPS units

Smart technology for minimizing operating costs

- The 9PHD UPS sets new standards with an operating efficiency level up to 97% in double conversion mode
- > 99% superior efficiency is delivered in Energy Saver System mode (ESS)
- Power factor 1 increases unit power by 10-20% compared to average UPS

Easy deployment for optimizing installation costs

- Front access for installation and service
- Cabinet supports use of halogen free cables, double cables and large cables for installation
- Lifting lugs included for easier unit handling during installation
- Suitable for 3-wire and 4-wire networks and voltage range 380V-480 V without transformers
- Small footprint due compact power electronics and internal transformer options

Eaton 9PHD Marine UPS 30–200 kW

TECHNICAL SPECIFICATIONS

General	
UPS output power rating (1.0 p.f.)	30, 40, 50, 80, 100, 120, 150,160, 200 kW
Efficiency in double conversion mode	Up to 97%
Efficiency in Energy Saver System (ESS)	> 99%
Inverter/rectifier topology	Transformer-free IGBT with PWM
Audible noise	30–50 kW: < 60 dBA 80–200 kW: < 65 dBA ESS operation: < 47 dBA
Ambient temperature	0°C to 45°C at sea level, higher temperatures are optional
Ingress protection	IP23, Optional: IP33;IP54

Input	
Input wiring	3ph + N + PE / 3ph + PE
Nominal voltage rating (configurable)	380 V-480 V, 50/60 Hz
With optional transformer	208 V- 690 V, 50/60 Hz
Input voltage range	Rectifier input + 20%, if voltage > 440 V +10% **Low** -15% at 100% load, -40% at 50% load without battery discharge Bypass +10% - (-15%)
Input frequency range	40-72 Hz
Input Power Factor	0.99
Input ITHD	30 kW: < 4.5% 40-200 kW: < 3%
Soft start capability	Yes
Internal backfeed protection	Yes

Battery	
Battery type	VRLA, Ni-Cd
Charging method	ABM technology or Float
Temperature compensation	Optional
Battery nominal voltage (VRLA)	From 432 V (36 x 12 V, 216 cells) to 480 V (40 x 12 V, 240 cells) **Note:** Strings with different battery voltage may not be paralleled!
Charging current maximum*	30–50 kW 29.3 A 80–100 kW 58.6 A 120–150 kW 87.9 A 160–200 kW 117.2 A
Battery start capability	Yes

* when load level ≤ 40 kW/UPM

Output	
Output wiring	3ph + N + PE/ 3ph + PE
Nominal voltage rating (configurable)	380 V-480 V, 50/60 Hz
With optional transformer	208 V- 690 V, 50/60 Hz
Output UTHD	< 1% (100% linear load) < 5% (reference non-linear load)
Rated output power factor	1.0
Permitted load power factor	0.8 lagging - 0.8 leading
Overload on inverter	10 min 102-110%; 60 sec 111-125%; 10 sec 126-150% 300 ms > 150%. On battery mode 300 ms > 126%
Overload when bypass available	Continuous < 125%, 10 ms 1000% **Note:** Bypass fuses may limit the overload capability!

Accessories

Accessories for UPS:

Internal transformers; Cabinet protection IP33, IP54; ATS automatic transfer switch; Single feed kit; Earth fault monitoring; 24V Emergency Power Off (EPO); Special system voltages

Accessory cabinets:

Marine battery cabinets with long-life batteries; Matching transformer cabinet for one or two transformers; External maintenance bypass switch.

Communication options:

Web/SNMP; ModBus/Jbus; Industrial Relay

Communications	
MiniSlot	4 communication bays
Serial ports	Built-in host and device USB
Relay inputs/outputs	5 relay inputs and dedicated EPO 1 relay output

Compliance with standards	
Safety (CB certified)	IEC 62040-1
EMC	IEC 62040-2
Performance	IEC 62040-3

Marine class certificates are available from any class example: DNV, ABS, Lloyds Register Bureay Veritas etc

Due to continuous product imrovement programmes, specifications are subject to change without notice.

Eaton ATS

Eaton ATS 16 Netpack

Eaton ATS 30

Power Source Transfer Switch

Seamless power transfer

Eaton ATS are designed to provide power supply redundancy for single connection equipment. With ATS, power from two independent sources can be supplied to IT equipment, which have only one input power supply.

Redundancy

Only advanced servers are equipped with a dual electrical power supply. The majority of network devices and entry-level servers have a single connection with only one electrical power input. With the Eaton ATS, critical equipment can be connected to a redundant power supply.

Both sources (primary and secondary) are connected in a straightforward manner to the ATS in the base of the rack. The Eaton ATS then controls the redundancy of this electrical power supply. If the primary source fails, transfer to the secondary source is automatic and instantaneous.

Simple and cost-effective

Considering the advanced design of the Eaton ATS, these are highly competitive in price compared with the 'dual power supply' options available from suppliers of networking equipment.

1U high, the unit can be installed easily within the rack. Metering and basic configuration capabilities are possible through ATS 16's LCD.

Network connectivity

The ATS 16 Netpack and ATS 30 provide network connectivity. This allows users to access, configure and manage units from remote locations.

Eaton ATS

1 LCD with metering and basic configuration capabilities
2 RS232 serial port
3 Network NMC card (on netpack version

Eaton FlexPDU
Eaton HotSwap MBP

FlexPDU range

HotSwap MBP range

Power distribution

The no hassle solution for improving availability and adding flexibility for single phase UPSs.

Eaton FlexPDU

Having the right connectors just where you need them

- FlexPDUs (Power Distribution Units) are flexible mounting multiway socket blocks for easy connection of multiple loads either as free-standing or on rack-mounted UPSs
- FlexPDUs have a large number of sockets (8 French or Schuko sockets, 6 BS sockets or 12 IEC 10 A sockets) which fit into a very compact unit (1U - 19")
- FlexPDUs are easy to implement into any type of installation: they can be rack mounted horizontally (1U) or vertically or directly onto all Eaton RT format (rack/tower) UPSs

Eaton HotSwap MBP

- High availability for all UPSs up to 11 kVA.
- HotSwap MBP provides a maintenance bypass for all UPSs. UPSs can be hot swapped or upgraded without interrupting the power supply.
- HotSwap MBP are available with multiple power ratings: 3000 VA, 6000 VA, 11000 VA, 11000 VA (3 ph Input).
- HotSwap MBP provides compatibility with any UPS now and in the future from Eaton or any other supplier
- The HotSwap MBP 3000 VA is available with different output connectors: French, Schuko, British, IEC or terminal blocks (Hard-Wired version).
- When used with a 9PX or 9SX the HotSwap MBP 6000 VA and above are providing information on the Bypass status through the UPS LCD screen.
- HotSwap MBP units can be installed as required; at the back, side, top of the UPSs, or rack-mounted.

Hotswap MBP6Ki & MBP11ki

Eaton FlexPDU
Eaton HotSwap MBP

1 Flexible system for 19" rack-mounting or on Eaton RT UPSs
2 French/Schuko/British/IEC 10 A sockets
3 IEC 16 A output for cascading
4 IEC 16 A input socket
5 Retaining clip
6 Rotary bypass switch
7 Colour coded input and output sockets for connecting the UPS
NB: hard-wired version available

HotSwap MBP 3000

HotSwap MBP 11000

1 Flexible system for 19" rack-mounting or on Eaton 9PX/SX UPSs
2 Input/Output
3 4 IEC 16 A sockets with Retaining clip
4 Rotary bypass switch

Eaton ePDUs G3

This Industry-leading platform enables you to:

- Reliably distribute power to your IT equipment
- Accurately meter and control power consumption
- See where you have available power and are most efficient
- Choose the level of metering to provide the level of information that you require
- Choose equipment switching to allow remote data centre control

Eaton's 3rd generation power distribution technology

The ePDU G3 platform is designed to provide reliable, cost effective power distribution together with highly accurate monitoring and control for IT equipment in the datacentre.

Eaton offers two types of ePDU:

1. Standard range

This range is produced in large quantities and is readily available.

The standard range consists of 6 technologies to meet the needs for IT equipment in the datacentre:

- **Basic ePDUs:** Basic Reliable Power Distribution with integrated plug retention
- **In Line Metered ePDUs:** Add Metering to upgrade existing basic PDUs
- **Metered Input ePDUs:** Meter the input and branch circuits
- **Metered Outlet ePDUs:** Meter the input, branch, individual outlets and IT equipment across A and B feed
- **Switched ePDUs:** Switch individual outlets and IT equipment across A and B feed, plus input and branch metering
- **Managed:** Both Switch and Meter individual outlets and IT equipment across A and B feed

2. Custom range. Need something special?

- Dedicated engineering teams in 3 centres of excellence are available to create your perfect ePDU
- Specific configurations or complete engineering projects
- Including national socket types, UK, French, Din/Schuko – including combinations of up to 3 types of outlet on an ePDU

Options/Accessories:

List of compatible accessories available on page 79

How do Eaton meet ePDU market needs?

How do I ensure that my IT equipment is protected against IEC plugs being accidentally knocked out during maintenance or come lose through vibration?

Integrated Grip

IEC Plug Retention: Prevents accidental disconnect from being bumped or from vibration. Works with any IEC plug, no need to buy special cables or brackets.

How do I ensure that costs can be appropriately attributed or billed for department billing and colocation data centers?

IEC +/-1% Billing Grade Accuracy

Meter your energy consumption (kWh) plus V, W and A extremely accurately.

Choose your level of Metering

From ePDU to branch circuit to individual pieces of equipment, including metering kWh for IT equipment over A and B feeds.

ePDU integration into vRealize Operations Manager*
*coming in 2018

How can I ensure business uptime if the power goes down?

Full integration into VMware and Citrix with Intelligent Power Manager

- Trigger VM migration or VMware Site Recovery Manager (SRM)
- User configurable alerts on the ePDU G3 work with Eaton's Intelligent Power Manager (IPM) software to trigger actions
- Trigger automatic migration of virtual servers in the event of a power failure via UPS, ePDU alarm or threshold, temperature/humidity or dry contact event
- User configurable: includes feed going down, branch circuit reaching a defined threshold etc.
- Full integration in VMware interface

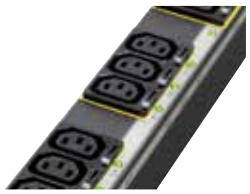
How do I ensure that my PDUs will fit in all my different racks?
How do I ensure that nothing interferes with my IT Equipment and hot-swap components?

Small with Flexible Mounting

- Easily access hot-swappable IT equipment and components.
- Ensure the ePDU, plugs and cables are completely out of the way of equipment with button mount on the rear and sides
- Unique patented variable mounting system can be mounted at any point on the ePDU and gives full flexibility

Low profile chassis

- The ePDU doesn't protrude into the rack and is low profile even at the breakers
- 52 mm wide x 53 mm high and 58.7 mm at breakers on most models
- Hydraulic-Magnetic Circuit Breakers include accidental-tip protection by default



How can I operate remotely with lights-out control, including remote re-booting, scheduled shut downs and restarts?

Equipment Switching

Switch individual outlets or group to switch equipment with multiple inputs, over multiple ePDUs for A and B feed, including sequencing and scheduled shut-down and restart.

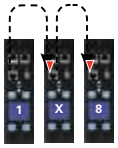
How do I avoid downtime if a rack PDU becomes faulty or I want to upgrade?

No Downtime on Upgrades

ePDU G3 has Hot-Swap network components – update or change without changing the outlet state.

Simplify load balancing

Colour coding and laser engraved chassis easily link breakers to outlet groups.



How can I reduce the cost of networking for monitoring rack PDUs and reduce network traffic?

Daisy-Chain 8 ePDUs from one IP port and one IP address

This reduces the cost of networking, reduces IP addresses and data packets on the network. Daisy Chaining reduces network infrastructure costs by up to 87%.

Power management for IT equipment

Intelligent Power Software

Eaton Intelligent Power Software integrates seamlessly with your power hardware **to provide unparalleled business continuity capabilities**. It manages all network connected power infrastructure, triggers virtual machine migration plans and shuts down non-essential devices in order to keep your business running during power events. Seamless integration with leading virtualisation environments enables simplified management from a single pane of glass.

Intelligent Power software suite consists in 3 parts:

- **UPS Companion:** provides safe system shutdown for SOHO, small business & Residential users looking for an easy way to enhance the protection capabilities of their Eaton UPS.
- **Intelligent Power Protector (IPP):** helps you avoid data loss by gracefully shutting down computers and servers powered by an Eaton UPS during an extended power outage. Can be remotely managed, configured and updated with Eaton's Intelligent Power Manager.
- **Intelligent Power Manager (IPM):** monitor and manage multiple UPS and ePDU devices across your network from a single interface — any device with a Web browser or virtual machine manager software dashboard.

- Instantly access critical information, such as UPS battery condition, load levels and battery runtime
- Remotely and gracefully shut down servers and select storage devices during a power event
- Prioritise and shed non-critical loads to extend runtime during an extended power outage
- Integration with platforms like vCenter and XenCenter™ helps datacentre managers reduce infrastructure and operating costs while increasing uptime, productivity and operational responsiveness
- View critical power information on devices including UPSs, ePDUs and environmental sensors from the vCenter or XenCenter dashboard
- Trigger vMotion, XenMotion™ and other migration applications to transparently move virtual machines to an available server on the network

Intelligent Power Manager capability overview by license

Intelligent Power Manager (IPM) offers two editions — the Manage Edition and the Optimize Edition.

The Manage Edition is a free download for up to 10 power devices. Paid tiers are available for larger deployments.

The Optimize Edition—our premium offering—provides the most complete set of capabilities for implementing power management strategies in virtual and hybrid environments including the ability to monitor and manage third-party power devices in addition to Eaton equipment.

Trial Licenses are available upon request. Please contact your local Eaton account representative or support team to obtain a trial license.

The table below outlines the capabilities of each edition.

Standard Power Management Features	Manage	Optimize	Benefits
Protected Servers (IPP) and Virtual Servers	•	•	Gracefully shutdown servers.
Storage Shutdown Module	•	•	Remotely shutdown select storage devices.
Generic Drivers and Third Party Devices	•	•	Monitor 3rd party devices via a generic SNMP driver.
Configuration Policy	•	•	Create power & environmental event business continuity policies for groups of devices.
Control ePDU outlets	•	•	Enable policy based control of ePDU outlets.
Advanced Event Action with Standard Events	•	•	Use standard power events in configuration policies.
Advanced Event Action with Custom Events	-	•	Use custom user defined events in configuration policies.
Generic SSH action	-	•	Easily configure custom actions on any SSH enabled device.
3rd party power device support	-	•	Create business continuity policies on events generated by supported 3rd party devices.

Virtual Infrastructure Features	Manage	Optimize	Benefits
Plugin for VMware vCenter	•	•	Integrate power management into your vCenter environment.
Plugin for Citrix XenCenter	•	•	Integrate power management into your XenCenter environment.
Basic Power Actions: • Shutdown Storage Devices • Shutdown Virtual Hosts • Shutdown Virtual Machines • Enter/Exit Maintenance Mode	•*	•	Perform basic graceful shutdown actions in business continuity policies by shutting down virtual machines, virtual hosts, shutting down select storage devices and/or by entering/exiting maintenance mode.
Advanced Power Actions: For VM/Volume: • Load shedding • Shutdown Targeted Virtual Machines • Migrate Virtual Machines to Targeted Hosts • Automatic VM group assignment For Hosts: • Shutdown VMware vApp • Automate VMware SRM Recovery Plan	-	•	Reduce power load by integrating policy driven VM load shedding into your business continuity policies Target a specific VM or groups of VMs for shutdown and/or migration in load shedding policies Target VMware vApps for shutdown in load shedding policies Automatically trigger the execution of your VMware SRM Recovery Plan when runtime hits a predefined threshold.
Virtual IT Infrastructure Level: • Fully virtualized VMware cluster shutdown • VMware vSAN shutdown • Nutanix Acropolis shutdown	-	•	Enable 100% safe shutdown and restore of VMs and host servers in high availability environments.

3rd Party IT Solution Connectors	Manage	Optimize	Benefits
Cisco UCS Manager	•	•	Dynamically power cap Cisco UCS devices in your business continuity policies
NetApp Storage	•	•	Trigger the shutdown of NetApp storage devices in your business continuity policies
CA Nimsoft	•	•	Open IPM from directly within Nimsoft

Management Packs	Manage	Optimize	Benefits
Eaton IPM Management Pack for VMware vRealize Operations Manager	-	•	Monitor and analyze power information directly from within VMware vRealize

* Not included for Eaton Essential UPS Models (9E and 93E) and all non Eaton UPS Models.
Competitor UPS support requires an Optimize Licence level to enable Basic and Advanced virtualization features.

Connectivity Options

Web/SNMP cards
are complete UPS monitoring, control and shutdown solutions in a networked IT environment. In case of alert the Web/SNMP card can notify users and administrators through e-mail and SNMP traps. In case of a prolonged power failure the protected computer systems can be shut down in a graceful manner with Intelligent Power Protector software.

Network Card-MS

Modbus MS card

Network Card-MS
Web/SNMP adapter (P/N Network-MS) The Eaton Network Card-MS supports SNMP v1 and v3; IP v4 and v6; http, https and SMTP Works with: 5130, 5PX, 9130, EX, 5SC, 5P, 9PX, 9SX, 93E, 93PS and 93PM

PXGX UPS

PXGMS UPS

Network and MODBUS Card-MS
(P/N MODBUS-MS) offers ModBus RTU in addition to Web and SNMP for 5PX, 9130, EX, 5SC, 5P, 9PX, 9SX, 93E, 93PS and 93PM

Power Xpert Gateway X-slot UPS card - PXGX UPS card
(P/N 103007974-5591) - offers ModBus TCP, BACnet IP as well as Web and SNMP interfaces for 9155, 9355, PowerXpert 9395P and BladeUPS.

Environmental Monitoring Probe

BD relay card (for Eaton 9130 UPS)

The Power Xpert Gateway Mini-slot Card
(PXGMS card) is the all-in-one communication solution for 93PM and 93PS UPS. Its web interface delivers a comprehensive view of UPS data even to the level of individual power modules. In addition to web UI function it also communicates with management systems through SNMP v1/v3, Modbus TCP and RTU as well as BACnet IP.

X-Slot relay card

Environmental Monitoring Probe – EMP
(P/N EMP001) - adds temperature, humidity and two contact closure monitoring capability to Web/SNMP cards and ePDUs. It is well suited for monitoring rack temperature and door status, as well as battery temperature. Operating system shutdown can be triggered if user defined thresholds are exceeded or contact closure status changes. EMP works with Network-MS, Network and Modbus – MS, PXGMS and PXGX cards as well as network enabled ePDUs.

Connectivity Options

Relay/AS400 cards

are an easy connection to IBM AS/400 series computers as well as industrial and building management systems. P/N 1018460 for Eaton 9155, 9355, PowerXpert 9395P, BladeUPS. P/N 1014018 for Eaton 9130. C/N RELAY-MS for 5130, 5PX, EX, 5SC, 5P, 9PX, 9SX, 93E and 93PM

Relay MS

Industrial Relay Interface Card Mini Slot

Industrial relay card MiniSlot is the recommended choice when connecting MiniSlot UPSs to automation and facility management systems. Its 5 output relays are rated to 250 Vac/5A. Each relay has its own common connection and Normally Open/Normally Closed (NO/NC). The card also has one digital input.

Industrial Relay Interface Card Mini Slot

X-Slot Modbus card

connects the UPS to industrial and building management systems using ModBus/JBUS RTU protocol. P/N 103005425-5591 for Eaton 9155, 9355, PowerXpert 9395P, BladeUPS.

X-Slot Modbus card

ViewUPS-X remote display

is an LCD panel that lets users view the status of the UPS from as far as 100 m. ViewUPS-X has also four status LEDs and an alarm sound. The display is bundled with a dedicated X-Slot card that also powers the display through the communication cable. In addition to the remote display connection the card has also a SELV isolated relay port for connection to monitoring systems and AS/400 computers. P/N 1027020 for 9155, 9355, PowerXpert 9395P and BladeUPS.

ViewUPS-X

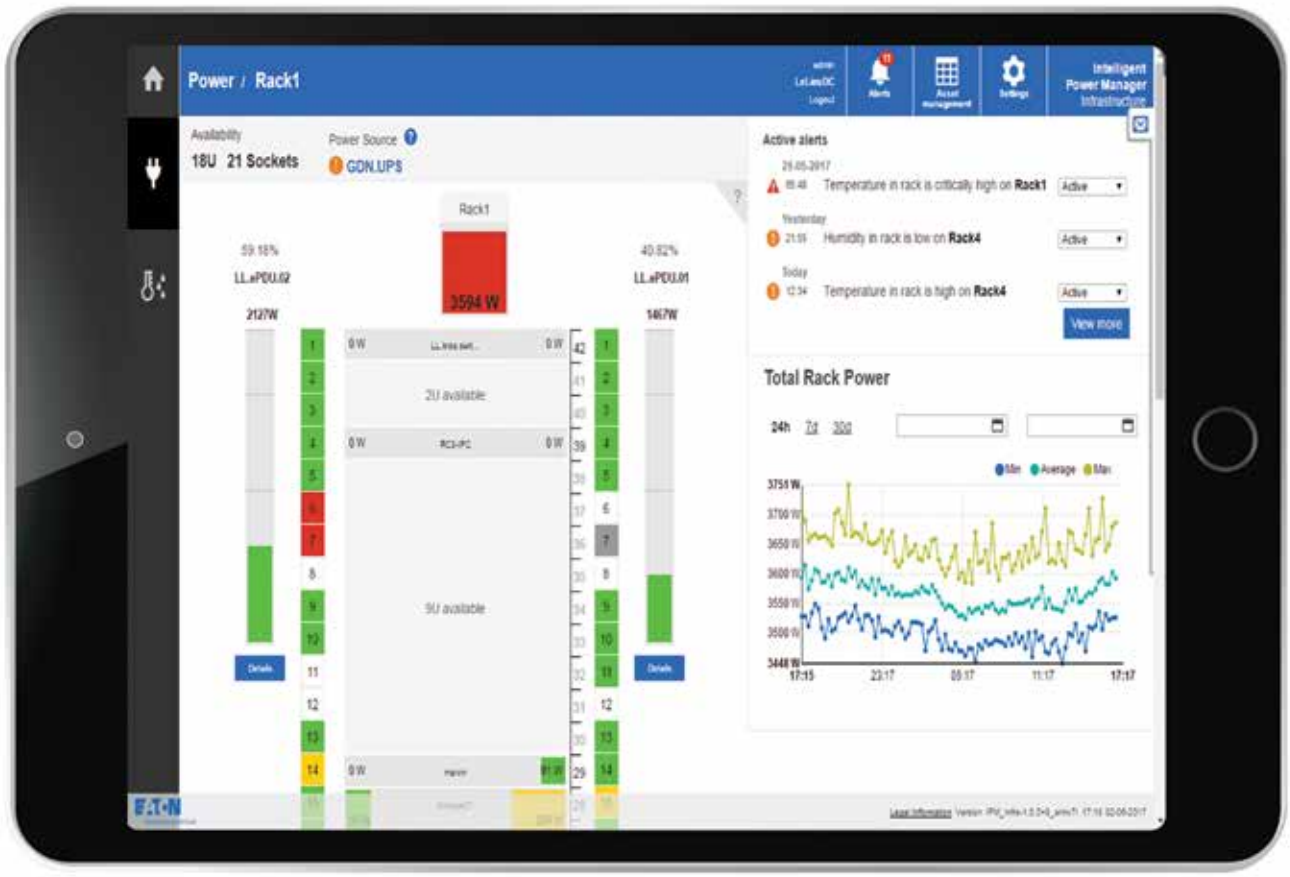
IPM Infrastructure

Environmental monitoring including temperature and humidity with more functionality to follow

Simple IT asset management including business prioritization capabilities

Power chain monitoring including power kW, energy consumption (kWh), phase and circuit balancing

Trending analysis via an intuitive web interface with auditable logs and email alerts



Understanding your infrastructure

IPM Infrastructure gives you a unique insight into what's happening in your data center.

Its power chain monitoring capabilities keep you informed about power usage (kW) and energy consumption (kWh), in addition to phase and circuit balancing. Environmental monitoring covers temperature and humidity while IT asset management helps you manage business prioritization.

All the information gathered from these inputs is reported via an intuitive web interface, with email alerts.

Simple and centralized

IPM Infrastructure has been designed from the start to be easy to use. As a powerful monitoring solution, it has a number of valuable features which make comprehensive data center monitoring intuitive, simple and centralized.

Intuitive, drill-down interface Easily understand physical infrastructure constraints within the context of the IT infrastructure.

Centralized management appliance
The Intelligent Power Controller acts as a local, centralized repository. It is accessible via the network through a powerful, intuitive and responsive HTML5 / AngularJS web interface or SSH.

Simplified capacity management
See and understand the physical infrastructure's available capacity at a glance. Space, power and environmental metrics provide essential information for ensuring business continuity and maximizing IT device operating lifetimes.

Intelligent Power Manager Infrastructure

Real-time intelligence

By providing you with real-time information, IPM Infrastructure enables quick and effective responses to events, to reduce MTTR (Mean Time to Repair).

Real-time monitoring and graphical trending analysis

Real-time device monitoring provides instantaneous visibility of the state of your physical infrastructure and its constraints.

Alert notification

Email, and email to SMS gateway alerts, ensure you are informed of critical alerts in real time.

Trends and evolution

Key power and environmental data is conveniently stored, and converted into easy to use in-application trend indicators and graphs. This means you can better understand how your data center capacity is evolving over time.

Load balancing

By automatically tracking power draw from the UPS through the rack power distribution, IPM Infrastructure helps you to ensure the load is equally distributed across all phases at all times.

Diversity, interoperability, support

You can rely on IPM Infrastructure to support whatever devices you currently operate.

Multi-vendor device support

IPM Infrastructure supports Eaton power devices out of the box, but is based on the 42ITy™ open source project, enabling us to provide vendorneutral data acquisition via the NUT open source engine (www.networkupstools.org). Multi-vendor device support is provided via the SNMP protocol.

Extreme support

If we don't support your SNMP power device out of the box, we'll build a new driver configuration within 72 business hours of receiving your complete device profile information.

Integration

Open RESTful API facilitates third-party application integration.

Application highlights

Data Center Dashboard:
Understand your data center. All the key KPIs you need for peace of mind.

- Total DC energy consumption
- Data Center Temperature
- Humidité du datacenter
- Data Center Humidity
- Power availability KPI
- Trends on all KPIs
- Alert summary

Data Center Power Chain view:
Master your critical power consumption and extrapolate future usage trends.

- Simplified power chain
- UPS overview including phase detail
- Total power consumption per rack
- Total critical power consumption
- Historical power trend graph
- Alert summary

Rack level :
Where IT and Power meet. Understand the intersection of power and physical capacity at a glance.

- Available capacity – outlet and U space
- Installed devices
- Total rack power consumption
- Power consumption per rack PDU
- Feed balance
- Outlet identification per device
- Historical power trend graph
- Alert summary

Simplified asset management:
Manage the lifecycle of your IT devices.

- Installed devices
- Contact details per device
- Business priority per device
- Simple alert notification per device
- Warranty details per device with alert capability
- Import / Export to .csv

Intelligent Power Manager Infrastructure

TECHNICAL SPECIFICATIONS

Intelligent Power Controller 3000

Processing and storage characteristics	
CPU	1GHz Dual Core ARM processor
Boot Flash storage	128 MB
Mass storage	4 GB SD Card
RAM	1 GB
Power connections	
Input	2 x IEC C14 redundant power connectors
Cables	2 x 2m C13 – C14 power cables included
Communication connectors	
Ethernet ports	2 x front facing RJ45 10/100/1000 Ethernet for redundant monitoring network connectivity
	1 x rear facing RJ45 10/100/1000 Ethernet for rack PDU data aggregation
USB ports	4 x USB ports, including 1 x powered 5V/2A
RJ45 Serial ports	4 x RS232 T&H ports with EMP001 auto configuration capability
	8 x RS232 serial ports for future monitoring probe aggregation or device monitoring
	4 x RS232 / RS485 software selectable serial ports for select 3rd party Modbus T&H sensors
Service console port	1 x DB9 serial service port
Dry contact	10 x dry contact terminals for dry contact sensors
Relays	5 x output relays, 12V
Indicators / Display	
LED indicators	2 x Power Feed Status LEDs, 1 x Network Status LED, 1 x Device Power Status LED, 1 x Service Status LED, 1 x Heart Beat LED
Display	1 x Monochrome LCD
Dimensions H x W x D / Weight	
IPC3000 dimensions	42 x 300 x 211 mm
IPC3000 weight	2.2 kg / 4 lbs
Housing	Rack mount; 1U, ½ width
Operating Conditions, standard and approvals	
Operating temperature	Maximum 45° C continuous, for indoor operation only
Operating humidity	Maximum 90%
Noise level	Fanless
Safety Approvals	CE ; cTUVus
Integration	
Open REST API	HTTP/HTTPS RESTful API for integration with 3rd party applications
Protocols	
Supported network protocols	TCP/IP, HTTP, HTTPS, SNMPv1, SNMPv2c, DHCP, DNS, SSH
Graphical User Interface	
Browser support	Desktop: Most recent versions of modern web browsers including MS Internet Explorer, Chrome, Firefox, and Safari Mobile: Most recent versions of modern mobile web browsers
Technology	Fully responsive, HTML 5 & AngularJS client application
Customer Service and Support	
Hardware warranty	2 Year
Software	Free 1 Year IPM Infrastructure Software Subscription included

Accessories

Product Code	Description	Status	Image
EMP001	Temperature and Humidity Sensor	Available	
DCS001	Door contact sensor	Available	
WLD012	Water leak detector	Available	
VIB001	Vibration detector	Available	
SMK001	Smoke detector	Available	
PIR001	PIR motion detector	Available	

Why service matters

Eaton offers a comprehensive range of different service products, which help install, commission and maintain power devices during their life cycle, while meeting your financial constraints and technical requirements.

UPS placement
We help you select the best operating environment for your UPS.

Installation
Our service technicians will help with installing and programming your UPS system. We also provide the necessary connectivity to your own monitoring system or Eaton's remote monitoring.

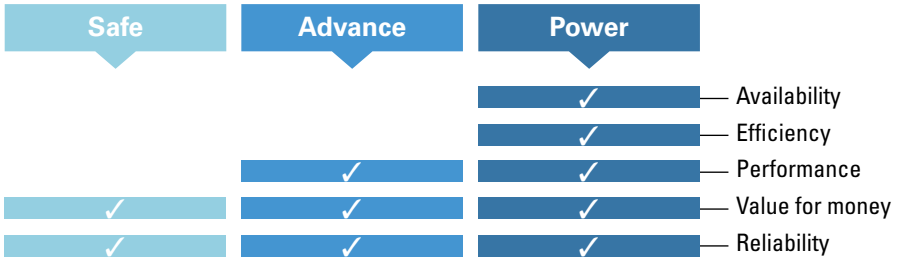
Commissioning/User training
Before your system is commissioned, we thoroughly check UPS connectivity and ensure the new UPS will reliably protect your IT
or production system against all types of electrical disturbances. We start up the UPS system and provide user training.

Maintenance. Service contracts.
An effective maintenance strategy for power infrastructure products can be one of the most cost-effective measures you can take to detect a wide range of ailments before they become serious issues, ensure the ongoing health of power devices, significantly reduce the probability of a load loss event and thus ensure continuity of your entire business. It includes, among other things, 24/7 telephone support, regular preventive service according to factory specifications, battery testing, reporting, recommendations as well as rapid-response repairs as needed and optional remote monitoring of UPS.

Service contracts

At Eaton, we like to keep things simple. So, we have compiled three distinct service plans to match different types of maintenance needs and budgets - **Safe, Advance and Power**.

Whichever plan you choose, you can rest assured it will deliver power security and reliability that will keep your business running.



Make sure you keep going

This maintenance contract includes all the essential services you need to keep your UPS system and your business running safely.

Gives you more financial benefits

Advance contract gives you the same level of service as Safe, but with additional benefits. Because travel and labour are included in the package price, you can draw up your annual service budget more accurately.

Allows you almost to forget about power

The flagship of Eaton service packages gives you complete peace of mind regarding power security. If you opt for a Power contract you will have the expert Eaton service team at your disposal at any time of the day every day of the year.

What is included:

Standard features	Safe	Advance	Power
One preventive maintenance visit per year (during normal working hours)	✓	✓	✓
Technical Updates	✓	✓	✓
Hotline	✓	✓	✓
Repair Service (within working hours)	✓	✓	
Repair Service 24/7			✓
Discount on Labour	✓		
Travel & Labour included		✓	✓
Discount on Spares	✓	✓	
Spare Parts included (excludes batteries except under warranty)			✓
Emergency Service response, travel to site within 8 hours (Normal working hours)	✓	✓	
Emergency Service response, travel to site within 8 hours 24/7			✓

Additional Options	Safe	Advance	Power
Additional preventive maintenance visits	✓	✓	✓
Remote monitoring	✓	✓	✓
Batteries replacement included	✓	✓	✓
Discount on Batteries	✓	✓	✓
Emergency Service response 2 hours 24/7	✓	✓	✓
Emergency Service response 4 hours 24/7	✓	✓	✓
Emergency Service response 6 hours 24/7	✓	✓	✓
Emergency Service response 8 hours 24/7	✓	✓	
Spare Parts included (excludes batteries except under warranty)	✓	✓	
Emergency Service response 2 hours (within working hours)	✓	✓	
Emergency Service response 4 hours (within working hours)	✓	✓	
Emergency Service response 6 hours (within working hours)	✓	✓	

Remote monitoring with Eaton SmartQmmunicator

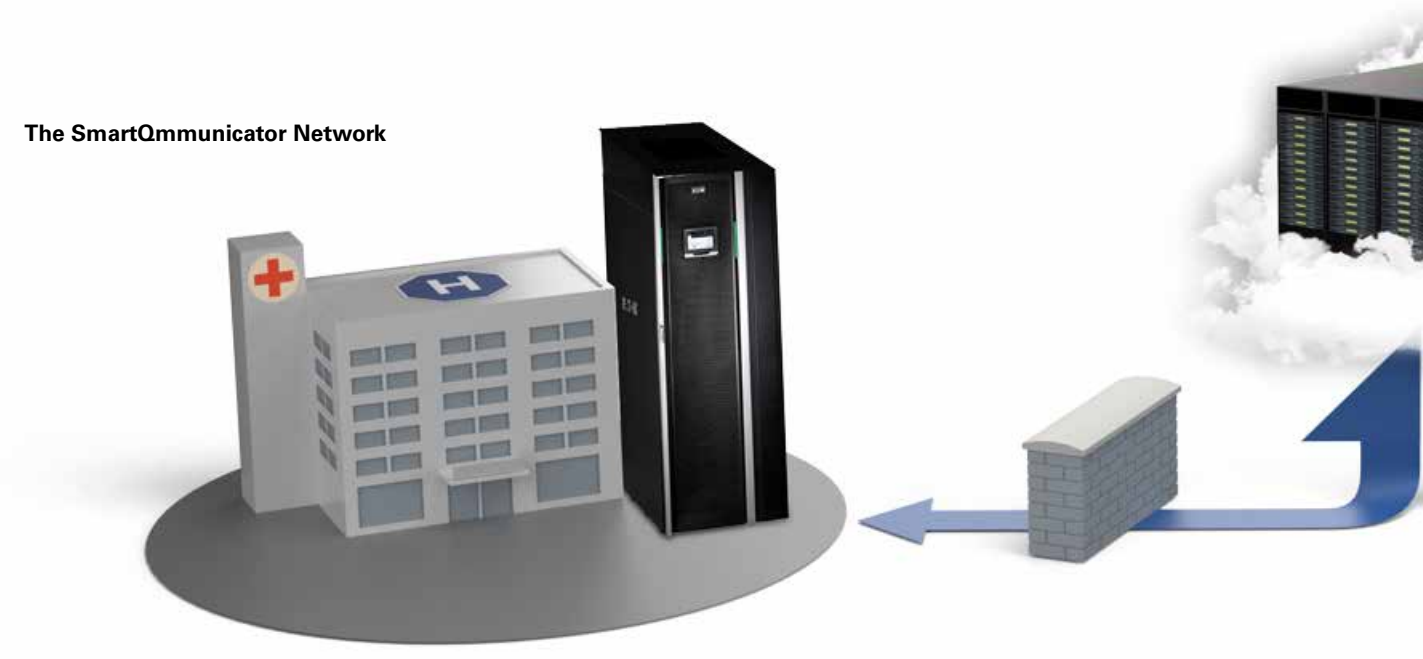
SmartQmmunicator is a complementary remote monitoring service, supervised by trained Eaton product technicians overseeing the performance of customers´ Eaton UPS and battery systems.

Eaton technicians can identify problems before they became load loss events, saving customers money while increasing power reliability and reducing downtime.

Available in either wireless and Ethernet models, the SmartQmmunicator is equipped with firewall-secure technology, enabling a secure and encrypted remote connection.

In the event of incorrect UPS performance, the SmartQmmunicator notifies customer´s IT-department and an Eaton service technician, who will then take action according to customer´s service level agreement.

The SmartQmmunicator Network



Remote monitoring with Eaton SmartQmmunicator

Move to a 24/7 Remote Service

Thanks to SmartQmmunicator, we can offer a new service plan which is both faster and greener: GreenCare.

This plan is designed to provide the highest level of service to cover your needs and offers you the full peace of mind.

GreenCare

GreenCare includes:

- 24/7 System Monitoring by an Eaton specialists
- 24/7 Repair service by an Eaton specialists
- 100% spare parts and labour coverage
- Intervention within 8 hours or less in case of emergency
- Monthly Eaton Health Index Report of the System
- 2 or more physical maintenances in 5 years

*Availability of the GreenCare is country-dependent. Please contact your Eaton service office to check the local agreements.

Quick guide

Through its extensive channel network Eaton offers a range of warranties and service extensions for plug-and-play and hardwired UPSs up to 200kVA power range. The different options available mean you can choose the most beneficial method to safeguard your equipment performance and reliability.

Extended Warranties for new UPS/ePDU

Warranty+1

This service gives you a peace of mind for **1 year** in addition to the standard warranty of the product.

- During this period, the product is covered by a **standard exchange**
- Shipping costs covered by Eaton
- **Professional helpline**
- This offer covers both electronic parts and batteries*

Warranty+3

This service gives you a peace of mind for **3 years** in addition to the standard warranty of the product.

- During this period, the product is covered by a **standard exchange**
- Shipping costs covered by Eaton
- **Professional helpline**
- This offer covers both electronic parts and batteries*

* Batteries are covered only for failures, not reduced autonomy

Warranty Advance

This service provides customers with a higher service level compared to a standard warranty for 3 years:

- **1 on-site intervention** (in case of breakdown) during the first 2 years, simply by contacting the call centre in your country
- **1 maintenance visit** in the last year
- Technical updates
- 25% of discount on spare parts and batteries during 2nd and 3rd year
- A **professional, customised helpline** at your service
- **Emergency response** (travel to site within 8 hours)

Eaton Extended Warranties can be bought only during standard warranty or extended warranty period.

Services for running UPS/ePDU

Extend

This service gives peace of mind for **one additional year** after warranty period expiration:

- UPS/ePDU **standard exchange** on site
- **Professional helpline**
- Fast and efficient service wherever you are located
- Covers electronic parts and batteries*

Battery+

This service provides the correct batteries for your UPS:

- Up to 3 KVA
- **High-speed efficient service** regardless of site location
- Standard **replacement of old batteries**
- Installation instructions for new batteries
- Safety instructions concerning handling of the batteries

Intervention

This distributed service provides an **Eaton technician** for UPS commissioning or a preventive maintenance visit:

- **Professional helpline** to offer support and book intervention dates
- Intervention service can be bought from Eaton resellers at any time during the life of your UPS
- This offer is not intended to be used as a repair service in case of UPS failure

Easy Battery+

This is a service product which is offering Eaton final customers a complete batteries tray to exchange their batteries. The whole batteries exchange process will be therefore much **quicker and safer** than swapping batteries one by one.

Register/activate your service product: www.eaton.eu/registration

*Normal battery aging and « recommend battery replacement» message visible on the display do not imply batteries'faults and therefore are not covered by the warranty

Green by design

Eaton is constantly working with customers to develop solutions that drive sustainable growth around the globe. Our UPS solutions strive for unparalleled energy efficiency, efficient resource use, maximimum use of recyclable materials and the reduction of emissions throughout the entire life of the product, from cradle to grave.

Our engineers are constantly developing smarter ways to deliver ecological and economic benefits. This includes the development of energy efficient and environmentally friendly technologies.

Design

Taking account of the environment is a part of the design process at Eaton. Four characteristics guide the design team during their work: energy efficiency, resource efficiency, recycling and compliance with regulations.

The Life Cycle Assessment (LCA) process is used to gather information about the potential environmental impact of a product.

✉ LCA@Eaton.eu

Eaton is constantly monitoring the use of hazardous substances and material its design and manufacturing processes. Our products do not contain **REACH** SVHCs (Substances of Very High Concern) and Eaton is seeking to comply with the **RoHS Directive** in advance of it becoming a legal requirement to do so.

Manufacturing

Eaton is focused on building sustainable operations and managing Environment, Safety and Health (EHS) through standardisation. Our global Managing Environment, Safety and Health (MESH) programme is a unified system that consolidates existing programmes (ISO 14001, OHSAS 18001, OSHA VPP) into a single integrated management system.
All EMEA manufacturing locations are ISO14001 certified.

Use Phase

Green technologies

Energy Saver System (ESS)	Enables extremely high energy efficiency and reliability under normal operating conditions	Eaton 93PM and Power Xpert 9395P UPSs
Easy Capacity Test (ECT) technology	Enables testing of entire power train under full load stress without the need for an external load	Eaton 9355, 93E, 93PM and Power Xpert 9395P UPSs
Hot Sync technology	Start from a single module and add power when required	BladeUPS, Eaton 9PX, 9155, 9355, 93E, 93PM and Power Xpert 9395P UPSs
Advanced Battery Management (ABM) technology	Increases the life of batteries by employing a three-stage charging technique	BladeUPS, Eaton 5P, 5PX, 5SC, 9130, 9SX, 9PX, 9155, 9355, 93E, 93PM and Power Xpert 9395P UPSs
Hot-Swappable batteries	Allows batteries to be replaced or removed one string at a time while the equipment is still running	BladeUPS, Eaton 5130, 5P, 5PX, EX, 9130, 9SX and 9PX UPSs
EcoControl technology	Automatically disables peripherals when the master drive is turned off	Eaton Protection Station, Ellipse ECO and Ellipse PRO
Variable Module Management System (VMMS)	Maximises efficiencies at lighter loads without compromising reliability.	Power Xpert 9395P UPSs

End of Life

Eaton takes into account the environmental effects of the packaging and the end-of-life processing of our products and to aid more responsible dismantling, end-of-life instructions are available for recyclers.

We are committed to adhering to the following legislation when applicable:

WEEE (Directive 2002/96/CE)
Waste Electrical and Electronic Equipment

Batteries (Directive 2006/66/CE)
Batteries and accumulators and waste batteries and accumulators

Packaging (Directive 2004/12/CE)
Packaging and packaging waste

Hot Sync Technology

Paralleling UPS technology

The number one function of a UPS is to supply continuous conditioned, reliable electricity to a critical load. In case of a single unit, reliability can be increased by modular design, where redundant internal modules can take over each others' tasks, if one of the modules fails.

To further increase reliability, a true parallel configuration can be employed, where two or more units share the load. A failed unit is isolated while the remaining ones continue to support the critical load. Competitive UPS products on the market utilise centralised or distributed load-sharing technology with the master-slave principle, which introduces a risk of single point failure. The absolute reliability of a UPS system can be achieved with patented Powerware Hot Sync® parallel load-sharing technology. (**Figure 1**)

Hot Sync technology is designed for parallel redundant N+1 systems to satisfy 24/7 applications. It can also be used in parallel capacity systems to benefit from scalability for customers' ever-increasing load demands modules can share loads without any communication wiring to the outside world.

User benefits

- Available for both single- and three -phase products to meet any mission-critical need up to 7.7 MW (400 V) systems
- Easy and modular parallel UPS system upgrade with additional capacity or redundancy
- Erases single point of failure, load sharing is not endangered by loss of communication

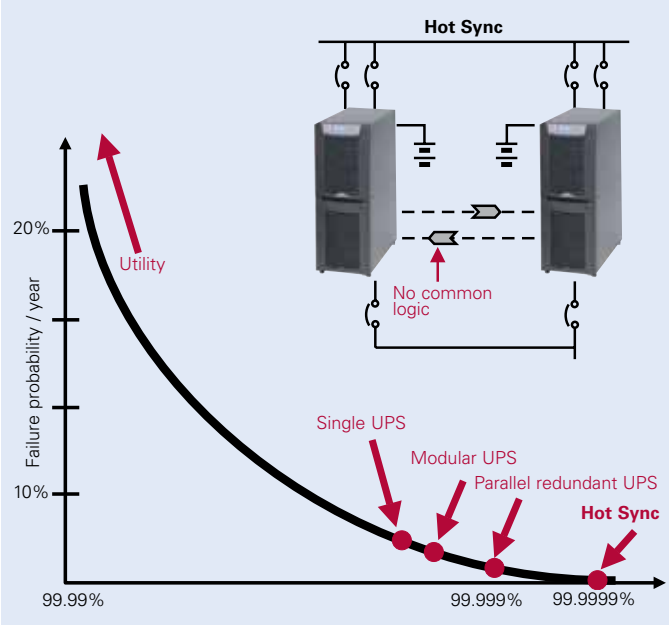

Figure 1. Power availability with various power supply configurations.

Hot Sync Technology

The internal output impedance of a UPS is inherently mainly inductive, i.e. it looks as a small inductor in series with a stiff alternating voltage source. So, if there is any difference between the output voltage phases, it means that there is a power flow from unit to unit, resulting in unequal load sharing. In the **Figure 3**, two units have equal output voltages with phase angle displacement.

The voltage Vdiff and current Idiff between units exhibit a 90 degrees phase shift due to the inductive source impedance. The main voltage (V1 and V2) and the current between units Idiff are in phase resulting in active power flow.

The greater the phase shift, the heavier the power imbalance. If we now introduce a controller to adjust the voltage phase by the output power, the phase difference can be forced to decrease. To adjust the phase difference to zero and to achieve accurate load sharing, we may integrate the measured phase thus arriving at power-controlled frequency. For the purpose of fast frequency locking and to enable synchronisation to external bypass, a term containing the power level change rate is added.

The flow diagram (**Figure 4**) shows how the load sharing proceeds.

The output power is monitored and the new frequency calculated at 3000 times per second. The measurements are also used for fast identification of a failed module. This feature is based on the computation of instantaneous output power. A negative value, even for a single instant, is an indication of an internal failure, e.g. a shorted inverter IGBT. In a response the UPS trips immediately off-line, causing minimal voltage disturbance. This feature is known as 'selective tripping'.

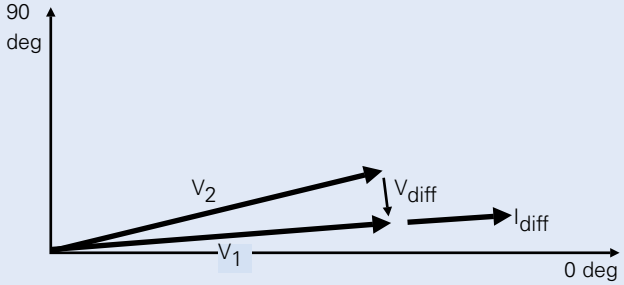

Figure 3. A phase displacement between parallel connected UPS voltages (V1 and V2) causes current flow between the units thus imbalances load share.

Hot Sync technology allows full maintenance to be performed one-by-one on redundant UPS modules without an external maintenance bypass switch. The critical load does not need to be disconnected from the conditioned power. Scheduled or unscheduled maintenance can be performed with the load supported continuously by the UPS-grade clean power.

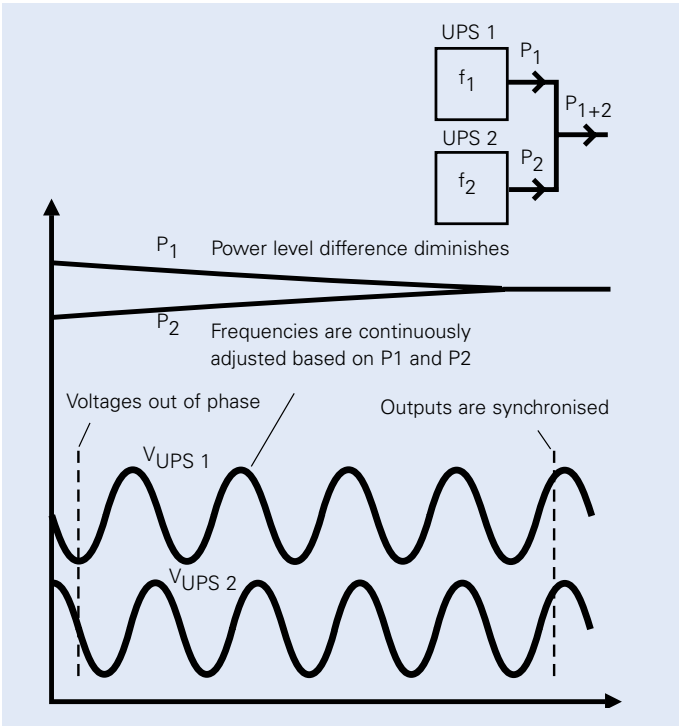

Figure 2. Well-balanced load share is achieved by adjusting output frequencies; thus the phase difference between parallel UPS output voltages is forced to zero.

$Fn = F_{n-1} - K1(Pn) - K2(Pn)$

Where:

Fn = frequency

F_{n-1} = previous frequency

Pn = power to load

K1 = frequency reduction factor

K2 = power change rate factor

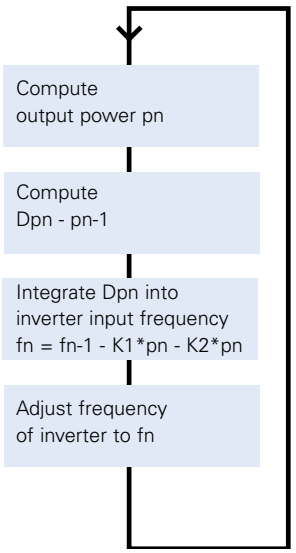

Figure 4. With HotSync algorithm, inverter phase angel is adjusted by output power and its change rate.

Accurate, equal load share is the number one characteristic to determine the integral quality and reliability of the parallel UPS system providing redundancy or increased capacity. With HotSync technology this is achieved without need for additional communications line between UPSs thus no single point of failure is added when introducing parallel modules to a system. From operational and also economical viewpoint, the achieved "close to perfect" reliability returns clear savings in the long run as every downtime incident is costly and might lead to unpredictable consequences.

ABM Technology

ABM technology significantly increases battery service life.

Superior battery management

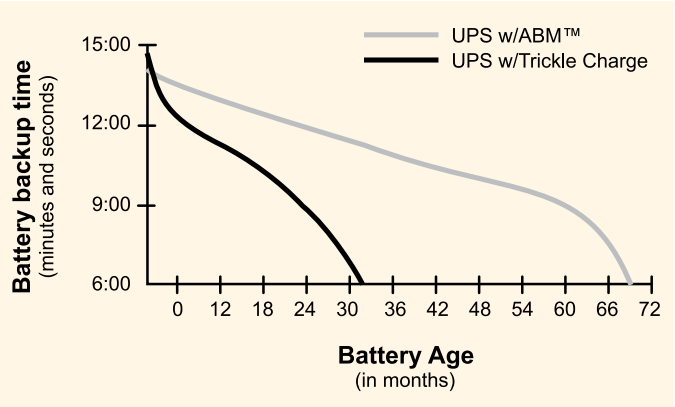
Battery service life is a major contributor to UPS reliability. Since batteries are electrochemical devices, their performance gradually decreases over time. Premature wear-out means higher costs in terms of replacement labour and shorter service cycle. A worn battery entails a risk of unexpected load loss. In normal UPS operation, backup power is needed only occasionally and the battery 'wearing' rate depends strongly on how the full charge is being maintained. Excess charging is detrimental under any operating circumstances.

Significant extension of battery life

Eaton has created ABM® technology to extend the life of valve-regulated lead-acid batteries by applying sophisticated logic to the charging regime. Using the traditional trickle charge method, batteries become subject to electrode corrosion and electrolyte dry-out, especially in standby service use due to continuous float charging. ABM is essentially an addition of intelligence to the charging routine by preventing unnecessary charging, thus significantly retarding wear-out. ABM provides an additional feature for monitoring battery condition and advance warning about the end of battery life upon detection of a weak battery. It also optimises the recharge time, which is advantageous when there may be consecutive power outages within a short period. ABM has been used for over 15 years is now applied in UPSs up to 1100 kW.

User benefits

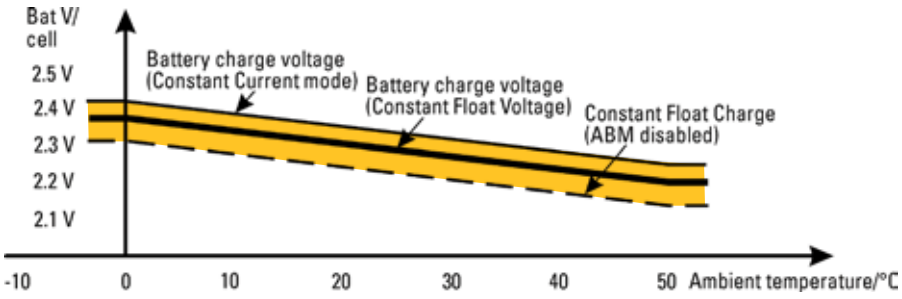
- Predictive and automatic diagnostics of battery health
- Significant extension of battery life compared to traditional charging method
- Optimisation of battery recharging time with dual mode charging method
- Automatic battery charge voltage compensation within 0 to +50°C temperature range



ABM cycle and operation – how does it work?

The basic idea of ABM is to leave a fully charged battery in rest mode for most of the time, and then apply charge current only at certain intervals. Initially, in order to charge up a fully or partly discharged battery, the charger starts at a constant current appropriate for the battery type used. When the battery voltage reaches a set level, the operation is changed to float mode using a constant but lower voltage, thus providing an optimum recharge time. The battery is kept at this voltage for 24 hours until it comes to the first test point. This takes approximately one minute, and during this period voltage drop measurements are taken while loading the battery, giving an indication of battery condition. The float charging is continued for an additional 24 hours, plus a period equal to 1.5 times the constant current charging time, before the rest mode is initiated. At this point, charging is discontinued for a maximum of 28 days – as if the batteries were disconnected. During the first 10 days the battery voltage is continuously monitored, and if it drops below 2.1 V/cell, the ABM restarts in charge mode and the user gets a notification of improper battery operation. If it drops below this limit after the 10-day period, charging is resumed without an alarm being raised. In short, the algorithm uses three charging stages in its operation. Thus, the batteries experience much less stress than in the case of traditional charging. A typical battery charging cycle without power interruptions is shown in the graph below.

For convenience, the user has the facility to disable the ABM and instead select continuous 'constant voltage' charging whereby the charger uses a constant float voltage. 'ABM enabled' is the default setting. The charger voltage levels are (by default setting) programmed to be dependent on an internal temperature sensor measurement, thus providing further enhancement to battery health. The external batteries can be also provided with temperature dependent charger voltage. For this purpose a Web/SNMP card with Environmental Monitoring Probe (EMP) is required.



Temperature compensated charger between ±0°C...+50°C internal/external measurements.

Optional Web/SNMP card with EMP probe for temperature measurement of an external battery cabinet or rack.

Energy Saver System
ESS

Energy Saver System

The rising demand for highly available, reliable and efficient power is a continuous challenge for data centre operators. Higher energy efficiency helps to address increasing environmental, regulatory and economic pressures.

Eaton has developed innovative and proprietary technologies that improve system efficiency without compromising on reliability. Energy Saver System (ESS) is one of these technologies.

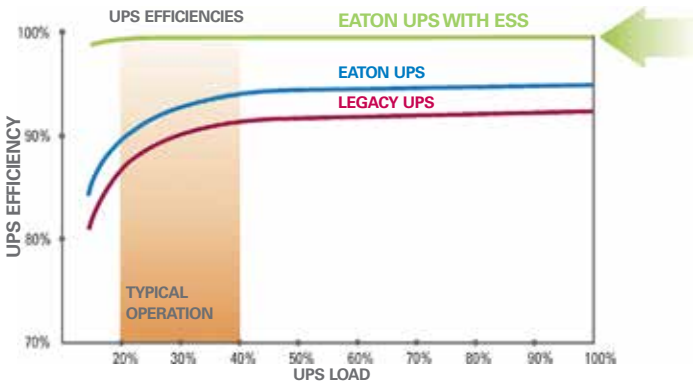
Maximised energy efficiency

With **85 percent reduction in UPS energy losses,** ESS technology dramatically reduces energy consumption, environmental impact and power costs without compromising load protection. With these outstanding energy savings, it is possible to recover the entire cost of the UPS over a three to five year period.

Applications

Energy Saver System is available for all Eaton 93PM and Power Xpert 9395P UPSs including:

- stand-alone single UPSs
- parallel systems
  All existing installations
  can be upgraded with the ESS capability.



ESS enables market-leading 99 percent efficiency across the entire operating range. Compared to conventional 'eco-mode' capabilities available with legacy products, ESS offers the best possible efficiency and the fastest transition times to double-conversion when power disturbances occur.

Energy Saver System

No compromise on reliability

In ESS mode the UPS safely provides mains current directly to the load when the input is within the acceptable limits by its voltage and frequency. If input power exceeds the predefined limits by frequency or voltage, the UPS switches to double-conversion. If input power is outside the tolerances of the system, the UPS draws power from available battery modules.

Superior detection and control algorithms continuously monitor incoming power quality and allow the UPS to engage power converters in less than two milliseconds when the utility source exceeds predefined limits by its voltage or frequency, thus always providing secured power to the critical load while maximising efficiency. If the UPS detects a fault condition while operating in ESS, it is able to detect and determine whether the fault is caused by the load or if it is upstream from the UPS. A fault at the bypass source results in immediate switchover to the inverter; a fault in the load keeps the UPS in Energy Saver System (ESS).

Proven Eaton technology ensures reliability and continuous load availability without compromising the protection of the supported equipment.

Extensive configurability

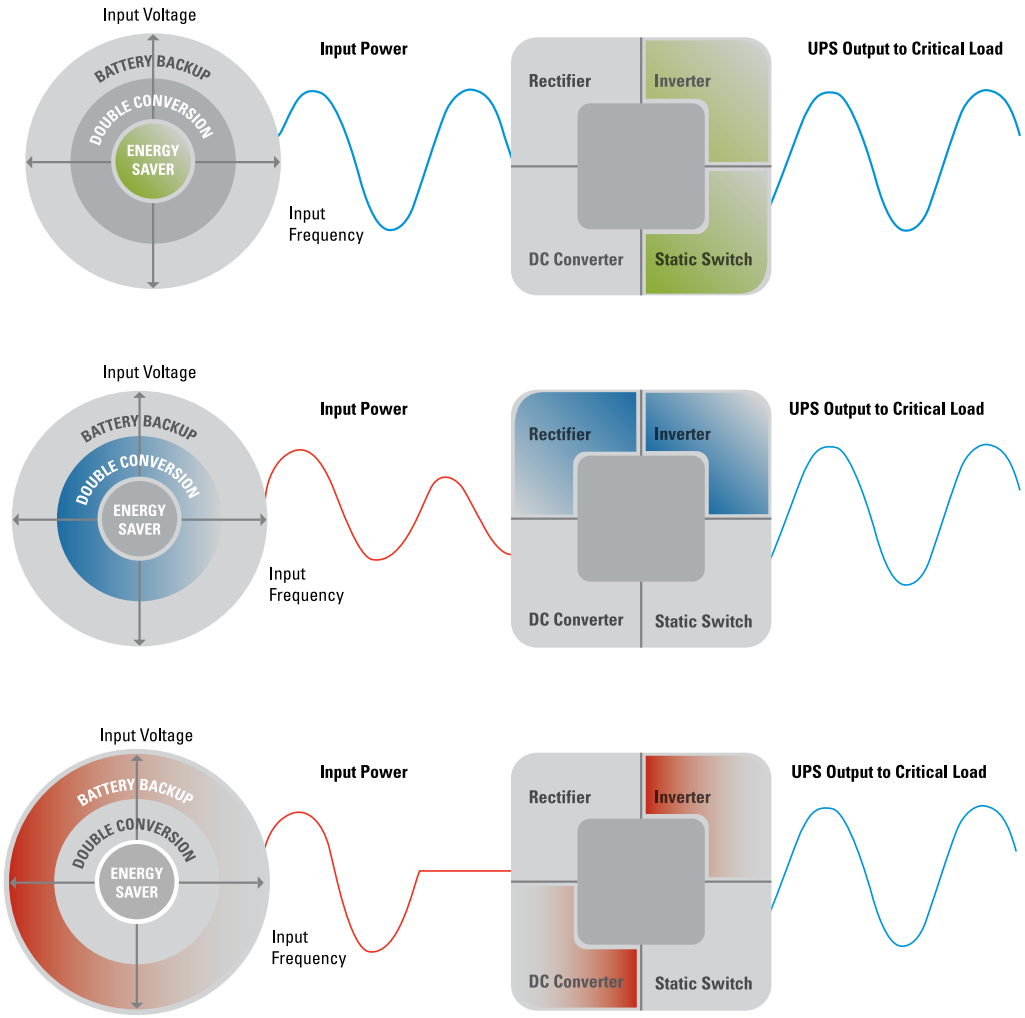
Eaton UPS with Energy Saver System features three configurable modes of operation:

- Standard double-conversion mode: the UPS operates as normal, supplying power through the power converters.
- Energy Saver System: the power converters are in ready state and the static bypass switch allows the UPS to supply mains power directly.
- High Alert mode: the UPS automatically transfers from ESS to double-conversion mode and in case of multiple recurring utility line disturbances it stays there for a predefined time (default one hour) until it is safe to return to ESS.

The UPS seamlessly executes transitions through different operating modes as needed. This is only possible with transformer-free topologies.

Availability

ESS is available for all 93PM and Power Xpert 9395P UPSs. Parallel UPS systems also support operation in ESS mode. Existing installations can be upgraded with ESS capability.



Active components engaged during Energy Saver System mode

Variable Module Management System

VMMS

Variable Module Management System (VMMS)

The rising demand for highly available, reliable and efficient power is a continuous challenge for data centre operators. Higher energy efficiency helps to address increasing environmental, regulatory and economic pressures.

Eaton has developed innovative and proprietary technologies that improve system efficiency without compromising on reliability. Variable Module Management System (VMMS) is one of these technologies.

Typical field operations are usually within low load range, but UPSs do not operate at optimal efficiency when used for lighter loads.

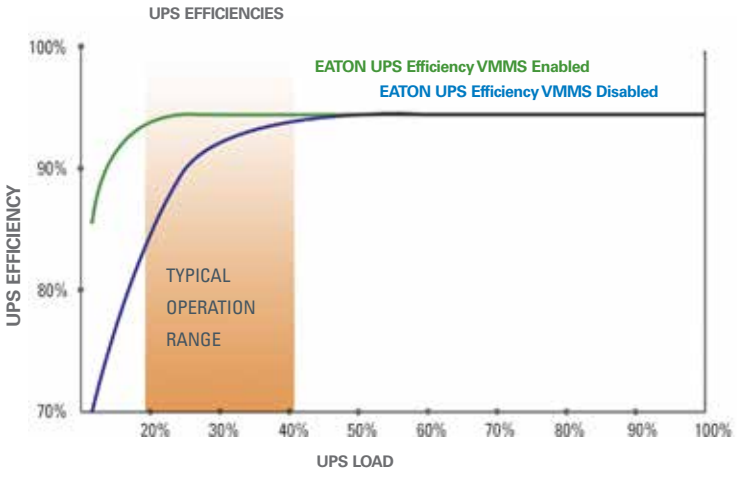
In some multi-UPS parallel systems used with lighter loads, the system maximises the load percentage of the UPSs by putting the UPSs that are not needed to power the load into idle mode. This results in partial energy savings and is limited to multi-UPS systems, with no efficiency improvements for -single-UPS systems.

Variable Module Management System (VMMS) technology maximises efficiencies at lighter loads without compromising reliability.

Applications

Typical applications where VMMS is particularly efficient include:

- UPSs in redundant N+1 and 2N systems
  - Lightly loaded: UPSs in these systems typically operate at low loads, < 45% load level
- Data centres, especially when the UPS system feeds dual-corded servers
- Any applications where load is not constant



Variable module management technology maximises efficiencies at lighter loads

Variable Module Management System (VMMS)

Maximised energy efficiency

VMMS optimally employs uninterruptible power modules (UPMs) in the UPS to achieve higher efficiencies in double-conversion mode in order to maximise the percentage load level of the remaining active UPMs by switching UPMs that are not needed to ready state*.

This is calculated according to the UPMs' VMMS load threshold – 80% by default – and the system configuration (redundancy requirements). This results in maximised energy savings.

VMMS is only possible thanks to Power Xpert 9395P UPS modularity. VMMS can also be applied in multimodule single-UPS systems.

***In "ready state", the UPM rectifies the DC-link, generates logic level PWM (Pulse Width Modulation) signals and filters EMI and lightning spikes.**

No compromise on reliability

When a disturbance or load increase occurs on a critical bus, all the UPMs in ready state are able to react quickly, immediately switching back to double-conversion mode connecting the existing PWM signals to the IGBT gates.

In VMMS, all UPMs will switch to double-conversion if:

- the output voltage fluctuates by more than 3% for any reason
- any UPM reaches its current limit or discharges its battery
- battery recharge is necessary.

Once the above conditions are resolved, the system switches back to VMMS, after a customer-preset time delay (1 to 60 hours): once the load stabilises, Eaton proprietary design and algorithms allow the system to determine which UPMs to switch back to ready state to maximise efficiency according to the new operating conditions.

Extensive configurability

Customers can decide how to configure their system, establishing the number of redundant UPMs and the max percentage load level per UPM allowed in VMMS setting other UPM's in ready state.

VMMS can be used in all multi-module (multiple-UPM) Power Xpert 9395P systems:

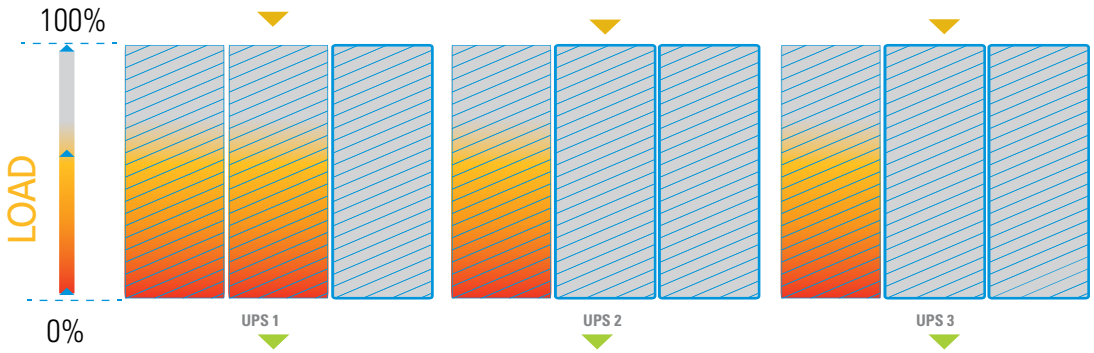
- Single 9395P units from 550 kVA to 1100 kVA
- All parallel 9395P systems

Existing installations can also be upgraded with VMMS capability:

- VMMS maintains redundancy and achieves higher efficiency by intelligently controlling the load levels of UPMs
- Number of redundant UPMs can be selected (N+0, N+1, N+2, N+X)
- UPMs in ready state can be used as redundant units (N+0)

VMMS Parallel Power Xpert 9395P – 900 kVA modular UPS and VMMS

Full system efficiency is automatically optimised according to the load level



Data centre with dual-corded servers, Power Xpert 9395P-900 kVA UPS on A and B side - 320 kVA load

UPS configuration	Without VMMS	With VMMS
Efficiency @ 320 kVA load	94.6%	96.1%
UPS energy savings	Used as reference for savings calculation	41 MWh / year
UPS energy savings	Industry-leading UPS efficiency in double conversion	Additional energy savings from reduced cooling in VMMS (typically 30-40% on top of UPS energy savings) UPMs in VMMS ready state available for redundancy

Eaton is dedicated to ensuring that reliable, efficient and safe power is available when it's needed most. With unparalleled knowledge of electrical power management across industries, experts at Eaton deliver customised, integrated solutions to solve our customers' most critical challenges.

Our focus is on delivering the right solution for the application. But, decision makers demand more than just innovative products. They turn to Eaton for an unwavering commitment to personal support that makes customer success a top priority.
