*Powering Business Worldwide*

# Why Eaton?

Eaton is dedicated to ensuring that reliable, efficient and safe power is available when it's needed most. With unparalleled knowledge of electrical power management across industries, experts at Eaton deliver customized, integrated solutions to solve our customers' most critical challenges.

Our focus is on delivering the right solution for the application. But we offer more than just innovative products. We also provide an unwavering commitment to personal support, that makes customer success a top priority.

Eaton's range of accessories for 3ph UPS systems provides flexible installation options that expedite deployment and save valuable space. The aesthetically designed accessories enable coordinated solutions that enhance both safety and reliability while reducing installation time and total cost. They are designed, manufactured and tested according to relevant standards. Eaton accessory offering consists of both general and product line specific options.

# Eaton battery cabinets

## Quality and safety

All Eaton battery cabinet solutions have been designed with long experience, specifically to be used with Eaton 3ph UPS. Quality is ensured by utilizing standardized processes, testing and careful consideration of details, such as customer interface, proper cooling, air circulation and sizing protective equipment. The Eaton battery cabinets are designed in according to UPS standard IEC 62040, thus making it safe to use. Cabinets are always available at least in an IP20 enclosure to protect personnel nearby them. Available up to IP54 protection, the Eaton battery cabinet solutions are also appropriate for preserving the batteries from external sources.

## Easy to operate

Eaton battery cabinets come with a user guide for easy installation and operation. Most cabinet types are equipped with wheels for easy offloading and positioning the cabinets. For the marine use, there are lifting equipment available for easier hailing of the cabinets at the yard.

## Lower installation cost

Cabinets with batteries pre-installed by Eaton, ensure rapid deployment of cabinets, thus reducing installation time and cost at site significantly.

## Serviceability

Eaton battery cabinets are fully front-accessible. They come with either battery slide out trays or removable battery torpedoes for easy maintenance of the batteries. A DC-rated battery circuit breaker provides protection and enables isolation for maintenance.

## Look and feel

Eaton battery cabinets form a lineup and match design with Eaton UPS giving a uniform appearance and minimizing footprint.

b) Lifting lugs cannot be used if batteries inside  
c) Exact dimensions depends on fixation type

# Eaton supercapacitor cabinets

Eaton supercapacitor cabinets for 3ph UPSs introduce a very low maintenance solution for short runtime (<1 min) applications. Supercapacitor provides a solution where batteries cannot work - in hot environment, places with no possibility for hydrogen removal, areas requiring weight limitation or sites with no easy access for periodic replacement of batteries. They are easily scalable by adding an extra string in parallel with old capacitors.

## Features:

- High efficiency - low operational costs
- Fast recharge (5-6 times to runtime)
- High ambient temperature range
- Life time up to 20 years
- Suitable for cyclic operation
- Internal fuses provides protection
- Battery circuit breaker enables isolation for maintenance
- Daisy-chain cabinets for extended runtime

# Eaton battery breaker kits

Eaton battery breaker kits includes a wide range of breakers to be used with external UPS battery solutions like racks and DC switchgear.

## Features:

- Kits include a breaker, a shunt trip coil for remote tripping and AUX contact for remote monitoring. Some larger models also include the extension handle and additional terminals for bigger cables
- 24 V Shunt trip coil is for the Eaton 93PS and 93PM UPS families, 48 V for Power Xpert 9395P products

Contact local Eaton sales for support with selecting breakers.

# UPS Battery Switchgear (UBS)

Eaton UPS Battery Switchgear family consists of single breaker with casing and multi breaker solutions with main DC breaker and dedicated battery string breakers.

## Features:

- All breakers in the family, include a shunt trip coil (24 VDC) and auxiliary contacts for remote tripping and monitoring
- Models with multiple breakers include wall mounting kit which enables cable routing behind the casing
- Single breaker models up to 500 A have a plastic casing. Single 700 A and models with multiple breakers come with metal casing
- All UPS Battery Switchgear products are designed and tested by the switchgear standard IEC 61439-2

Contact local Eaton sales for support with selecting breakers.

# External Maintenance Bypass Switches (MBS)

External Maintenance Bypass Switches (MBS) increase safety and reliability by enabling seamless transfers to bypass and isolation of the UPS system for maintenance. Eaton External MBSs are designed to UPS standard IEC 62040. External MBSs are available for power range from 8 kW to 150 kW

## Features:

- Cabinet color: Black
- IP rating: IP21 / 22
- Operation Temperature: 0-40 °C
- 100/150 kW models with interlocking plate
- All cabinets are wall-mounted

External MBS 50 kW

External MBS 100 kW and 150 kW

External MBS 100 kW and 150 kW door closed

\*200 mm is required for both sides of the cabinet for air flow.

# Eaton 93PM Specific options and accessories

For the Eaton 93PM UPS family, there is a wide range of special options available. Deployment of the UPS system with these options is much easier, when airflow and cabling routes can be managed.

## Eaton 93PM Top air exhaust kit

The Top Air Exhaust -kit converts the UPS cabinet airflow from Front-to-Rear to Front-to-Top. This enables direct placement against a wall and directing UPS exhaust away from any adjacent battery cabinets to prevent heating of the batteries and the resultantly reduced battery life. This kit is available for Eaton 93PM 80-500 kW units. This kit can only be assembled on the Eaton factory.

## Eaton 93PM Top Cable access kit

The Top Cable Access -kit adds ample space for top cable entry while maintaining a compact footprint. This kit is available for Eaton 93PM 30-150 kW units.

## Eaton 93PM Sidecar MBS for 200 kW frame, SIAC

Sidecar Integrated Accessory Cabinet (SIAC) MBS option for the Eaton 93PM 200 kW frame, expands the MBS offering up to 200 kW. Sidecar MBS option adds safety and reliability by enabling seamless and easy transfers to bypass for the UPS system maintenance. This kit can only be assembled on the Eaton factory.

## Eaton 93PM EMC C2 kit for 30-50 kW units

As a default, all Eaton 93PM units are in EMC category C3. With EMC kit Eaton 93PM UPS with single 30-50 kW power module in 50 kW frame is suitable for environments requiring EMC category C2. This kit can only be assembled on the Eaton factory.

Eaton 93PM 30-150 kW unit with Top cable access kit

# Power Xpert 9395P Specific options and accessories

For the Power Xpert 9395P product family there is a very wide offering of options and modifications available. Outside of the standard offering, Power Xpert 9395P units can be widely modified based on the customer requirements.

Please contact local Eaton sales for support with Power Xpert 9395P products.

## UPM Status LEDs

Power module status lights allow the user to detect the system status with one look. The power module lights change color depending upon their status. This optional feature makes the visual detection of the UPS system status easier, increasing operational safety and reducing the time required for trouble shooting.

## HMI Display

As a default, there is a 7" display in the Power Xpert 9395P units up to 600 kVA. In the bigger 900 kVA and 1200 kVA units 10" display will be installed by default. Optionally this bigger 10" display can be installed into smaller units also.

## Available options

- Seismic kits
- Special colors
- Higher IP ratings
- Marine solutions
- Alternative layout design (L- and U- shapes)
- Separate rectifier feeds
- No neutral kits
- Factory tests
- Frequency conversion mode
- UPS-as-a-Reserve feature
- Flanges

P-103002689	KIT 93PS 40 kW IP21	Increased depth within required clearances for maintenance/air flow.

Eaton 93PS

# Eaton 9PHD Specific options and accessories

For the Eaton 9PHD product family there is a very wide offering of options and modifications available. Outside of the standard offering, the 9PHD units can be widely modified based on the customer requirements.

Please contact local Eaton sales for support with 9PHD products.

## Available options

- Seismic kits
- Special colors
- Higher IP ratings up to IP54
- Marine solutions
- No neutral kits
- Internal transformers
- Wide voltage range (380-480 V)
- Factory tests
- Frequency conversion mode
- Lifting lugs
- Top air exhaust kits
- Insulation monitoring relays
- Up to 125 kVA + 100 kVA transformers in one matching transformer cabinet

Eaton 9PHD marine UPS with IP54 filters. Spacious power cabling area on the right side

# Eaton 93 STS

Eaton 93 STS family provides Static Transfer Switches for seamless and reliable automatic transfer from one power source to another.

## Seamless power transfer

- 3-phase Static Transfer Switch, for automatic transfer of critical AC loads to and from one power source to another, without interruption
- Rated from 100 A to 1250 A
- Available in 3- and 4-pole versions

## Reliable performance

- Continuous monitoring of sources ensures automatic and instantaneous power transfer, without cross-connecting the sources
- Retransfer is also automatic, and there is the capability for manual transfer if required
- All the system control boards feature redundant internal power distribution
- A dual manual bypass is built in, to enable safe maintenance with no disruption of the power supply
- A global installed base reflects the widespread acceptance and popularity of the Eaton 93 STS

## Connectivity and easy management

- The Eaton 93 STS has RS232 and RS485 interfaces, with Modbus protocol. It also features output relay contacts
- There is a built-in HMI and system mimic panel. The LCD screen and block diagram of the STS – with integrated LEDs – allows a quick check of the switch's operating status
- Metering, alarms and event logs are also provided
- The Eaton 93 STS range is supplied in a free-standing cabinet

Part number	Description	Width (mm)	Height (mm)	Depth (mm)	Weight (kg)
P-105000040-001	93 STS 100 A, 4-pole	820	1475	835	265
P-105000040-002	93 STS 250 A, 4-pole	820	1475	835	290
P-105000040-003	93 STS 400 A, 4-pole	820	1475	835	305
P-105000040-007	93 STS 630 A, 4-pole	1220	1900	860	615
P-105000040-004	93 STS 800 A, 4-pole	1220	1900	860	660
P-105000040-005	93 STS 1000 A, 4-pole	1220	1900	860	710
P-105000040-006	93 STS 1250 A, 4-pole	2000	2100	1000	800
P-105000030-001	93 STS 100 A, 3-pole	820	1475	835	265
P-105000030-002	93 STS 250 A, 3-pole	820	1475	835	290
P-105000030-003	93 STS 400 A, 3-pole	820	1475	835	305
P-105000030-007	93 STS 630 A, 3-pole	1220	1900	860	615
P-105000030-004	93 STS 800 A, 3-pole	1220	1900	860	660
P-105000030-005	93 STS 1000 A, 3-pole	1220	1900	860	710
P-105000030-006	93 STS 1250 A, 3-pole	2000	2100	1000	800

# Eaton synchronization options

There are three types of options available for Eaton UPS products synchronizing their outputs for various purposes.

## Sync Control II

- Device to keep two separate Eaton UPS system outputs in sync to each other
- Typical requirement when two UPS systems are feeding inputs of an STS (static transfer switch)
- Having systems synced allows the STSs make seamless transfers between system
- Either system can be a sync master in this application
- Can't be used to parallel outputs of two systems

## Fixed Master Sync Control

- Purpose of this device is the same as the Sync Control II, but the master is always fixed
- Typical applications are where multiple UPS systems need to be synced to one master system
- Alternatively fixed master can be used to sync Eaton UPS as permanent slave and the other UPS (static or rotary type) system as fixed master
- Can't be used to parallel outputs of two systems

## Power Block Sync

- Allows using one maintenance UPS system for multiple UPS systems
- Can be used for scaling up the installation by adding more UPS systems
- Used to firmly synchronize two separate Power Xpert 9395P systems in order to temporarily parallel outputs of both systems
- Allows for example to transfer loads from one system to another while UPS systems remain online and loads protected
- Can be called as UPS protected bus bar transfer
- Power Block Sync system is to be used only temporarily during load transfers

Contact local Eaton sales for support with selecting the right sync control unit.

Eaton Sync Control II

# Eaton 3ph UPS communication options

## Network card MS (Network-MS)

Provides Web interface and SNMP communication over Ethernet

- Installation in Eaton Mini-Slot Enhancement Bay (also BD Slot)
- 10/100 Mbit Ethernet
- IP v4 & v6, SNMP v1 & v3, http & https
- Alarms through Email (SMTP)
- Automatic Time Synchronisation (NTP)
- Configuration via RS232, DHCP, Telnet, CLI
- Supports optional EMP (Temperature, Humidity, 2 x Digital inputs)
- Can be monitored with Eaton Intelligent Power Software
- Package contents: Card; Configuration Cable; Manual

## Network and MODBUS card MS (MODBUS-MS)

Provides Web interface and SNMP communication over Ethernet and ModBus through RS 485

- Installation in Eaton Mini-Slot Enhancement Bay (also BD Slot)
- 10/100 Mbit Ethernet, MODBUS/JBUS (RTU, RS232 & RS485)
- IP v4 & v6, SNMP v1 & v3, http & https
- Alarms through Email (SMTP)
- Automatic Time Synchronisation (NTP)
- Configuration via RS232, DHCP, Telnet, CLI
- Supports optional EMP (Temperature, Humidity, 2 x Digital inputs)
- Can be monitored with Eaton Intelligent Power Software
- Package contents: Card; Configuration Cable; Manual
- Limited support for 93E

## ConnectUPS-X Web/SNMP card (116750221-001)

Provides Web interface and SNMP communication over Ethernet

- Installation in Eaton X-Slot Enhancement Bay
- 10/100 Mbit Ethernet (4-Port-Hub)
- IP v4, SNMP v1, http & https
- Alarms through Email (SMTP)
- Automatic Time Synchronisation (NTP)
- Configuration through RS232, DHCP, Telnet
- Supports optional EMP (Temperature, Humidity, 2 x Digital inputs)
- Can be monitored with Eaton Intelligent Power Software
- Package contents: Card; Configuration Cable; Manual

### PowerXpert UPS X-Slot card (PXGX UPS) (103007974-5591)

Provides Web interface, ModBus TCP, BACnet IP and SNMP communication over Ethernet

- Installation in Eaton X-Slot Enhancement Bay
- 10/100 Mbit Ethernet (2 port hub for daisy chaining)
- IP v4 & v6, SNMP v1 & v3, http & https
- MODBUS TCP
- BACnet IP (from fw 2.3.6)
- Alarms through Email (SMTP)
- Automatic Time Synchronisation (NTP)
- Configuration through USB, DHCP
- Supports optional EMP (Temperature, Humidity, 2 x Digital inputs)
- Can be monitored with Eaton Intelligent Power Software
- Package contents: Card; Configuration Cable; Manual

### PowerXpert UPS MiniSlot card (PXGMSUPS)

Provides Web interface, ModBus TCP, BACnetIP and SNMP communication over Ethernet

- Installation in Eaton 93PM MiniSlot Enhancement Bay
- 10/100 Mbit Ethernet D85
- IP v4 & v6, SNMP v1 & v3, http & https
- MODBUS TCP, BACnet IP, MODBUS 2-wire RS-485
- Alarms through Email (SMTP)
- Automatic Time Synchronisation (NTP)
- Configuration through USB, DHCP
- Supports optional EMP (Temperature, Humidity, 2 x Digital inputs)
- Can be monitored with Eaton Intelligent Power Software
- Package contents: Card; Configuration Cable; Manual
- **Eaton 93PM and 93PS support only!**

### ConnectUPS-E Web/SNMP adapter (116750223-001)

Provides Web interface and SNMP communication over Ethernet

- External
- 10/100 Mbit Ethernet
- IP v4, SNMP v1, http & https
- Alarms through Email (SMTP)
- Automatic Time Synchronisation (NTP)
- -Configuration via RS232, DHCP, Telnet
- Supports optional EMP (Temperature, Humidity, 2 x Digital inputs)
- Can be monitored with Eaton Intelligent Power Software
- Package contents: Adapter; Power supply; Configuration Cable; Communication cable; Manual

### Environmental Monitoring Probe [EMP] (EMP001)

Accessory to Web cards and select ePDUs, adds monitoring of temperature, humidity and two digital inputs.

- External device
- Connects to Eaton Web cards and select ePDUs through RJ45 Cat 5 patch cable (1,5 m provided, 20 m max)
- Alarm limits for temperature and humidity can be set in Web cards
- Two potential free digital inputs
- Used as the temperature probe in temperature compensated charging
- Facilitates graceful shutdown of servers in case of unacceptable environmental conditions
- or contact closure
- Can be monitored with Eaton Intelligent Power Software through Web cards or ePDUs
- Package contents: EMP; RJ45 Cable(1,5m); Mounting accessories, Manual

### Relay card MS (Relay-MS)

Provides communication through voltage free relays or RS-232.

- Installation in Eaton Mini-Slot Enhancement Bay
- 1 x 9-pin Dsub connector
- 1 x RS232 or 5 x Relay output / 1 x Input
- Package contents: Card; Manual
- Works in 3 phase Minislot units as well, but recommendation is to use the INDRELAY-MS

### Industrial relay card MS (INDRELAY-MS)

Provides communication through voltage free relays.

- Installation in Eaton Mini-Slot Enhancement Bay
- Terminal connectors, 250 VAC/5A rating
- 5 x Relay output / 1 x Input
- Package contents: Card; Manual
- **Compatible with all MiniSlot UPS!**

### X-Slot Relay Card (1018460)

Provides communication through voltage free contacts.

- Installation in Eaton X-Slot Enhancement Bay
- 1 x 15-pin Dsub Connector/Terminal
- blocks
- 4 Switching Relays (both NO and NC) / 1 x Digital Input
- 12VDC unregulated voltage supply
- Package contents: Card; Manual

### X-Slot MODBUS Card (103005425-5591)

Provides MODBUS RTU communication.

- Installation in Eaton X-Slot Enhancement Bay
- MODBUS/JBUS (RTU, RS232 & RS485)
- 3 x 9-pin Dsub connectors; 5 wire terminal block
- Configuration through RS232 and DIP switches
- Package contents: Card; Configuration Cable; Manual

# Eaton UPS Communications options

## Compatibility with UPS models.

	<b>Product Description</b>	<b>Reference</b>	<b>Blade UPS</b>	<b>Eaton 9155</b>	<b>Eaton 93PS</b>	<b>Eaton 93E</b>	<b>Eaton 93PM</b>	<b>Eaton 9PHD</b>	<b>Power Xpert 9395P</b>
