Eaton's New UPS Provides Boost to Power Performance, Management & Flexibility

SYDNEY, 1 August 2014 - Power management company, Eaton, today announced the launch of the Eaton 9E single phase UPS (Uninterruptable Power Supply) 6-20kVA online series targeted at the electrical distribution, contractor and wholesale markets.

Designed with an emphasis on simplicity & flexibility, 9E provides an all-in-one power protection & backup solution that increases flexibility of physical and electrical installation, whilst reducing cost.

Key product features include:

- Increased kVA v kW ratings over its predecessor series
- Internal to UPS and external cabinet battery options to cater for a multitude of customer uptime requirements.
- Combo 1 phase/3 phase input terminals on 10-20kVA models
- Compatibility with standard Eaton network and industrial communication card accessories
- Compatibly with Eaton's Intelligent Power Manager monitoring and management software
- User intuitive LCD display for diagnostics & status at a glance

Typical applications:

- Industrial automation & PLC systems
- Emergency Lighting
- Telecommunications
- Security Systems

The Eaton 9E UPS constantly monitors power conditions and regulates voltage and frequency due to its online double conversion topology.

Rob Steel, Product Manager - Power Quality ANZ, Eaton Industries, said, "The new 9E series will enable Eaton's electrical channel markets to easily select, configure & deploy highest level power quality solutions for increasingly cost-conscious end users"

9E series is available to source in Australia & New Zealand from Eaton's electrical channel distribution specialists.

About Eaton

Eaton's electrical business is a global leader with expertise in power distribution and circuit protection; backup power protection; control and automation; lighting and security; structural solutions and wiring devices; solutions for harsh and hazardous environments; and engineering services. Eaton is positioned through its global solutions to answer today's most critical electrical power management challenges.

Eaton is a power management company with 2013 sales of US\$22.0 billion. Eaton provides energy-efficient solutions that help our customers effectively manage electrical, hydraulic and mechanical power more efficiently, safely and sustainably. Eaton has approximately 103,000 employees and sells products to customers in more than 175 countries. For more information, visit www.eaton.com
