

PredictPulse™

Remote monitoring and management

PredictPulse is compatible with most Eaton® UPSs and connectivity cards. An environmental monitoring probe (EMP) must also be connected for PredictPulse to work. Cards and EMPs can be ordered separately or as part of a PredictPulse connectivity kit, which includes the recommended connectivity card for your UPS and an EMP.

| UPS model | Recommended connectivity card [part number] | EMP part number | PredictPulse connectivity kit part number | Compatible legacy card [part number] |
|--|---|-----------------|---|--------------------------------------|
