Eaton Intelligent Power Manager (IPM) setup guide

The first time you use IPM, you will be required to activate the software in the <u>Setup Wizard</u> or later in the <u>Settings > License</u> menu.

To activate your license, you will be required to perform an offline activation for the initial activation. Subsequent renewals or updates may be performed online if the IPM instance has access to the internet.

Activate IPM with these easy steps:

1 Simply cut and paste the activation ID from the email into the <u>Activation ID</u> field. Be careful to not copy any

leading or trailing spaces.

- 2 Click on the Export the activation request button. This will generate and download a "capability request" file.
- Open the Eaton licensing website by clicking on the dedicated <u>Open licensing</u> <u>website</u> button and click on the <u>Register</u> link.

Activate License						
Activati	on id *					
The field is required						
Don't have an activation code ? Find your reseller						
Activate license online						
You may activate your software license later. You will then have 7 days to do it from the menu Settings / License.						
Offline activation						
1	Export the activation request 2		Export			
2	Send the activation request to the licensing website to get the license file	Open licensing website				
3	Import the license file to software (No file selected)	Import file				
		Cancel	Activate License			

4 Enter your registration information in the form, including the name of your preferred reseller if you know it and select <u>Complete</u> when finished.

F.T.N **Register for Account** Fill out the required fields to register a new user **Registration Details** Activation ID* First Name Last Name mail Address Fa Cit Country United States Locale English (United States) Time Zone (GMT -8.0) Pacific Time 🗸 in to receive email O Yes (No Reseiler Reset

Please note that we may contact you in the future regarding updates and/ or renewal of the IPM software. Your contact information will not be used for marketing purposes without your express consent and opt-in via the Eaton Preference Center which may be found here. <insert link>

5 Navigate to the <u>Devices > Offline</u> Device Management menu.

6	Verify that the <u>Generate license</u> radio button is selected, then			
	choose the <u>Capability request</u> file			
	that you generated in IPM to upload by			
	clicking on the <u>Choose file</u> button.			
7	Click <u>Upload</u> .			

8 When the process is complete, a blue message area will appear near the top of your browser window with a link to download a <u>Capability</u> response file.

Click the link to download the <u>Capability response</u> file.

Return to the IPM browser window and click on the <u>Import file</u> button to select and upload the capability response file.

Click on the <u>Activate License</u> button.
