

# Eaton's SPD Series: Discover the power of integration

The latest and most advanced surge protection system for commercial and industrial applications

## Maximize application flexibility

- Available in all common voltages
- Surge current capacity ratings from 50 through 400 kA
- Configurations for service entrances, distribution switchboards, panelboards and point-of-use

## Save time & space

- Save valuable wall space with integrated SPD Series design
- Available pre-assembled in panelboards, switchboards, motor control centers, switchgear and bus plugs

## Increase equipment protection

- Safest, most reliable CSA and cUL certified surge protectors
- Factory installation reduces risk of contact with harmful voltages

## Enhance performance

- Integrated design keeps installation conductor lead lengths as short as possible to maximize performance
- Direct bus connection without wire provides outstanding surge protection

## Simplify indication

- Dual-colored LEDs indicate true status of protection
- SPD Series also provides indication of the N-G protection status

## Decrease maintenance cost

- No user-serviceable parts or items that require periodic maintenance
- No wire lugs that require periodic retightening

## Discover the integrated SPD Series performance advantage

Eaton provides a full range of innovative, reliable surge protection solutions to help reduce costly downtime and protect sensitive electronic equipment. Each product is independently tested and backed by the largest engineering and technical support in the industry.
