

Genuine Eaton® Clutches

Don't risk your reputation: Recommend genuine Eaton Clutches

In a world with a lot of bargain options, make sure your customers know what they are getting.

You've heard the saying "you get what you pay for." That is the case with aftermarket clutches. Eaton clutches may not be the cheapest on the market, but they are the proven choice for quality and durability in North America.

The proof is in our performance: Eaton clutches have navigated millions of miles for thousands of customers in a variety of applications.

Some all-makes clutches have recently entered the market behind a recognized brand name, but these clutches are actually made by a completely different company.

Eaton clutches are made by Eaton – that's what we mean by genuine.

Eaton is the only supplier of aftermarket manual clutches that is also the production supplier.

We design our products with OEM, chassis and engine manufacturers to assure the best performance and driveline protection for each application. No other clutch supplier can say that.

Only Eaton designs and manufactures a complete range of clutches to meet your performance and value needs. Whether it is an original equipment clutch in a new truck or a genuine Eaton aftermarket clutch, each is backed by Roadranger support.

- Proven choice
- Performance tested
- Production quality

- Self and manual adjust

Reman Series

- Prolong the life of an older truck
- Self and manual adjust

Your customer's trucks are manufactured with quality parts designed and engineered to work together for performance, reliability and durability. Is there any reason why you wouldn't recommend they use the same quality for their service replacement parts?

Eaton clutches are specifically engineered to work with Eaton transmissions. They reflect the highest standard of quality and over 100 years of experience in the commercial vehicle market.

That's why we put our name on them. It's your assurance that you're giving your customers the same reliability originally built into the product. Imitators can't carry our name or give you that same assurance. Our intense and comprehensive testing regimen ensures that every Eaton part you sell will deliver the long-lasting performance your customers depend on.

So, if you're looking for the difference between Eaton clutches and other options, the answer is the peace of mind that comes from the industry leader. Always recommend a genuine Eaton clutch.

Support: Our Roadranger representatives throughout North America are ready to support you and an easily accessible call center is available to guide you through the troubleshooting process. Roadranger Academy also offers both computer-based and onsite training from industry experts on how to best maintain and service your drive-train systems. In addition, industry leading warranties support your peace of mind. Diagnostic tools, literature and videos are available online at Roadranger.com.

Solutions: Our expertise and support work together to provide customized solutions that result in the efficiency, productivity and performance needed to ensure maximum uptime for the lifecycle of the product.

Expertise: Well-trained representatives have the knowledge to understand complex needs and specify the right powertrain for any application and service demand, as well as recommend the best approved lubricants to protect your investment.
