## Product Description

## Safety Switches

Safety switches have a number of applications from service entrance to branch circuit protection. They are also horsepower rated for use as motor circuit switches. Table 28.2-1 lists some of the specialty products designed and manufactured by Eaton that provide solutions for a variety of applications.

Double Door

Elevator Control

NEMA 7/9

Six-Pole Motor Circuit

If you don't see your specific application listed below, make sure to call your local Eaton salesperson to discuss the capabilities of our Flex Center that will provide custom switches to meet many industry needs.

The following pages give more details on the many types of switching devices Eaton can provide to meet your every need.

Table 28.2-1. Safety Switch Application Guide—See Catalog Selection Tables for Specific Ratings

| Specialty Product | Description | NEMA Rating / Protection | Website |
| :---: | :---: | :---: | :---: |
| Quick-connect single throw and double throw switches | Factory installed/interlocked Cam-Lok ${ }^{\text {TM }} /$ Posi-Lok ${ }^{\text {TM }}$ receptacles | NEMA 1 and 3R / fusible and non-fusible 30-1200 A | Eaton.com/quickconnect |
| Double door switch | Allows access to fuse compartment with no exposure to line side power | NEMA 12/3R, 4X / fusible 30-1200 A | Eaton.com/doubledoor |
| OLI switches | Allows access to control panel without exposure to line side voltage | NEMA 12 and 4X / fusible 60-400 A | Eaton.com/oli |
| Elevator control switches | Provides shunt trip capability, voltage monitoring, selective coordination and fire safety signal interface for elevator applications | NEMA 1, 3R, 4, 12 / fusible 30-400 A | Eaton.com/elevatorcontrol |
| NEMA type 7/9 switches | Class I, Div I and II rated for harsh industrial application and environments | NEMA 7/9 / fusible and non-fusible 30-100 A | Eaton.com/switches |
| Solar PV | Providing the best solution for switching 600 Vdc and 1000 Vdc photovoltaic (PV) circuits | NEMA 1, 3R, 12 / fusible and non-fusible 30-600 A | Eaton.com/switches |
| Six-pole motor circuit switches | Compact safety switch that's ideal for use in heavy industry when an "in sight" disconnecting means is required for two-speed motors that are remote from their motor control devices | NEMA 12/3R, 4X / fusible and non-fusible 30-800 A | Eaton.com/switches |

Table 28.2-2. Safety Switch Selection Guide

| Type |  | Fuse Class Provision (1) | Ampere Rating | Number of Poles | EnclosureTypes |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Heavy-duty double door | Max. 600Vac horsepower rated | $\begin{aligned} & \mathrm{H} \\ & \mathrm{~L} \end{aligned}$ | $\begin{gathered} 30-600 \\ 800-1200 \end{gathered}$ | (2) | - | - | Yes | - | Yes | Yes | - |
| Elevator control switch | Max. 600 Vac horsepower rated | J | 30-400 | (2) | Yes | Yes | Yes | Yes | Yes | - | - |
| NEMAType 7/9 | Max. 600Vac horsepower rated | J | 30-100 | (2) | - | - | - | - | - | - | Yes |
| Solar PV | $600 \mathrm{Vdc}, 1000 \mathrm{Vdc}$, NOT horsepower rated | $\begin{aligned} & \hline \mathrm{H}(600 \mathrm{Vdc}) \\ & \mathrm{J}(1000 \mathrm{Vdc}) \end{aligned}$ | $\begin{gathered} 30-400 \text { (3) } \\ 100-400 \end{gathered}$ | 1-6 (4) | - | Yes | - | Yes | Yes | Yes | - |
| Six-pole motor circuit | Single-throw max. 600 Vac | H | 30-800 | 6 | - | Yes | Yes | - | Yes | - | - |

(1) Class J, R andT available in many instances with the use of adapter kits listed on Page 28.2-9.
(2) NEMAType 12 enclosures ( $30-1200 \mathrm{~A}$ ) can be field modified to meet NEMA 3R rainproof requirements when a factory provided drain screw is removed.
(3) Single circuit (DH16 series) available 30-600 A.
(4) Varies between one and six circuits (not poles), based on amperage and grounding application.

## Quick-Connect Switches

## Quick-Connect Double-Throw

Provides a safe and quick means of connecting portable generators to facilities, transferring the building to backup power, or providing for temporary connection of portable loads.

■ Single-throw and double-throw designs
■ Single-throw receptacles can wire to the line side or the load side
■ Safety interlocks prevent access to the receptacle compartment unless the lower switch is in the "open" position. This prevents against accidentally unplugging a circuit under load

- For short-circuit ratings, see Table 28.2-42
- 30-1200 A switches
- $600 \mathrm{Vac}, 600 \mathrm{Vdc}$ maximum
- Fusible or non-fusible
- Fusible and non-fusible switches are $100 \%$ load break and load make rated
■ Cam-Lok ${ }^{\circledR}$ or Posi-Lok ${ }^{\circledR}$ receptacle options
- NEMA 1 or NEMA 3R enclosure ratings
■ NEMA 3R stainless steel enclosures available
- Switching neutral option

## OEM Line Isolation (OLI) Switch

## General Description

Traditional control panels may expose operators to line side system voltage (i.e., 480 Vac ) even when the internal main disconnect is in the OFF position. Many panel-building OEMs and OEM customers are concerned with arc flash hazards and arc flash categories and may be looking for ways to reduce them.

The solution is the OEM Line Isolation (OLI) switch-the newest product in Eaton's expanding offering of safer switching devices. The OLI switch provides an external disconnecting means for industrial control panels. It allows an operator to access the control panel without exposure to the line side voltage, thus enhancing safety and allowing for reduced PPE, which improves worker dexterity and mobility.

## OLI Switch Integrated onto

 Disconnect EnclosureThe OLI switch is designed to universally integrate to major manufacturers' "disconnect enclosures" that will work with the Eaton C371-style handle and operating mechanism. The Eaton solution is a complete package, including enclosure, disconnect, handle, flexcable operator and all other necessary components.

## Features and Benefits

Flex Shaft ${ }^{T M}$ operator and handle assembly is included and shipped with switch loose, for field installation.

## Modifications

Additions are available such as custom paint, 316-stainless enclosures, custom OEM labeling and more. Call the Flex Center at 1-888-329-9272 for more information.

## Standards and Certifications

■ UL/cUL
■ UL 98 standard, file no. e222859
■ UL 50 standard, file no. e478865

Heavy-Duty Double Door Safety Switch

## General Description

Eaton's double door safety switch is the industry's first compartmentalized fusible safety switch. The revolutionary two-door design includes an internal barrier that separates the upper switching compartment from the lower fuse compartment. This allows operators to access the fuse compartment with no exposure to line-side power, providing enhanced safety during fuse replacement.

## Features

- 30-1200 A

■ NEMA 12/3R and NEMA
■ 4X stainless enclosures

- External viewing window over switching blade standard
■ Enhanced visible blades included
- Interlocking mechanism keeps door closed when the switch is ON
■ Optional voltage monitors

## Standards and Certifications

■ UL 98 Standard, file no.
■ E5239

## Elevator Control Switch

## Elevator Control Switch

The elevator control switch provides an all-in-one product solution and selective coordination for elevator circuits. The elevator control switch uses a shunt trip disconnect as standard with Class J time-delay current-limiting fuses for meeting several code and user requirements for such circuits. Ratings are 30-200 A, 600 Vac, NEMA 1, 3R, 12 and 4 enclosures. The elevator control switch carries a 200 kAIC rms symmetrical short-circuit rating.

## Why do Buildings Require Eaton Elevator Disconnects?

Eaton's Elevator Disconnect is a simple, all-in-one solution that takes the mystery out of meeting the many codes associated with fire protection and safety in elevator shafts. The model national building codes that prescribe the requirements for sprinklers, elevators and electrical equipment, and how the various systems shall interact are:

■ NFPA ${ }^{\circledR} 70$ (National Electrical Code ${ }^{\circledR}$ )

- NFPA 72 (National Fire Alarm Code)
- ANSI/ASME A17.1 (Safety Code for Elevators and Escalators)
- NFPA 13 (Installation of Sprinkler Systems)
In addition to these national codes, state and local jurisdictions or other agencies of the government (such as the Veteran's Administration) may edit or amend the codes, as they deem necessary for public safety.
Eaton's Elevator Disconnect enables consultants, contractors and building owners to install a single device that meets the requirements of the various codes.

## Why is There a Need for the Eaton Elevator Disconnect?

1. According to 2010 NFPA 13 , fire sprinkler protection is required (with some exceptions) at the top and bottom of elevator shafts. Additionally, NFPA 13 requires the installation of sprinklers in the elevator machine room. When sprinkler heads are installed in elevator shafts, or in elevator machine rooms, then they must also be installed according to the State-Adopted Elevator Code (in many cases, ANSI/ASME A17.1).
2. The ASME A17.1 Safety Code for Elevators and Escalators, Rule 102.2
(c) (3), requires the shutdown of power to the elevator prior to the application of water in the elevator machine room or hoistway.

Shutdown of power is usually accomplished with the use of a shunt trip device in the elevator circuit, and is done for two valid safety concerns.

The first of these is to minimize the potential for electric shock due to the release of water on energized electrical equipment. The second, and less obvious, is to reduce the possibility of elevator car slippage after the car has gone to the recall floor and the doors have opened. Slippage is possible when the hoisting equipment (cables, sheave, braking system, etc.) become wet from discharged water.

Eaton's Elevator Disconnect is a fusible switch that is equipped with a shunt trip mechanism. The shunt trip is operated by a control relay (called a Fire Safety Interface Relay) in the unit that is wired to a normally open contact in the remote Fire Alarm Control Panel (FACP).

When the FACP receives a signal from the fire alarm system that there is going to be a sprinkler release in an elevator shaft, a normally open contact in the FACP closes, energizing the Fire Safety Interface Relay and completing a circuit to initiate a trip.

The Fire Safety Interface Relay is available with a 120 Vac or 24 Vdc coil. The 120 Vac coil should be selected when powered by the Elevator Disconnect control circuit, and the 24 Vdc relay should be selected when the power is supplied from the fire alarm system.

## NEMA 7/9 Hazardous Location Disconnect Switch

NEMA Type 7/9

## General Description

The cast aluminum enclosure is ideally suited for harsh industrial applications including petrochemical facilities, mining operations, pharmaceutical plants and waste-water treatment facilities. Eaton's Type DS switch is used as the switching device. Ratings are 30-100 A, 600 Vac , fusible and non-fusible

## Certifications and Compliances

■ Class I, Divisions 1 and 2, Groups B, C, D

- Class I, Zones 1 and 2

■ Class II, Division 1, Groups E, F, G

- Class III

■ NEMA 3, 3R, 4, 4X, 7BCD, 9EFG
■ UL standard: 1203
■ cUL to CSA C22.2 No. 30

## Standard Materials

- Body and cover-copper-free aluminum
- Gasket-neoprene

■ Cover bolts-steel, stainless steel
■ Hinges-stainless steel

- Mounting plate sheet-aluminum
- Rotary actuating handle-aluminum

## Standard Finishes

- Copper-free aluminum-natural

■ Steel-electrogalvanized

## Solar PV

Heavy-Duty-Solar Photovoltaic Switch Single-Circuit

## Heavy-Duty-Solar Photovoltaic Switch

Marked as suitable for NEC 690 PV applications up to 600 Vdc .

- UL 98 listed
- All switches are single-pole and suitable for switching one circuit
- Clear polycarbonate deadfront to guard against accidental contact with live parts
- Suitable for positive and negative grounded systems-100\% load break rated with current flowing in either direction
- NEC 690.17-compliant labeling warning that the switch terminals may be energized in the open position
■ NEC 690.14.(C) two required "PV System Disconnect" labels included
- Isolated ground terminals (neutral) for grounded conductors
- Ground lug for equipment grounding conductor
- NEMA 3R, 12 and 4 X stainless enclosures
- Fusible and non-fusible configurations-Class R fuse clips standard
- Fuse clips are located on the center pole to ensure that both fuse clips are de-energized - meets NEC Article 690.16, which requires isolation of the fuse from all potential supply sources

## Heavy-Duty Solar Photovoltaic Switch Multi-Circuit

Heavy-Duty Solar Photovoltaic Switch Multi-Circuit

Marked as suitable for NEC 690 PV applications per UL 1741 requirements. 600 Vdc per pole and 1000 Vdc .

■ UL Listed to the UL 98B standard

- Products designed and available for grounded and ungrounded (floating) systems
Note: Catalog numbers beginning with DCG are for use on grounded systems. Catalog numbers beginning with DCU are for use on ungrounded systems.
- Grounded designs can be used on positive and negative grounded systems
- Not polarity sensitive
- Bi-directional functionality
- Will break high-energy DC arc regardless of direction of current flow
■ Ampacity range $-30,60,100$, 200 and 400 A
- Clear polycarbonate deadfront shield
- Equipment ground
- NEMA 3R, 4 and $4 X$ stainless steel enclosures
- Flex Center modification available, such as viewing windows, pilot lights and more

## Six-Pole Motor Circuit

Six-Pole Motor Circuit
A compact safety switch that's ideal for use in heavy industry...when an "in sight" disconnecting means is required for two-speed motors that are remote from their motor control devices.

■ $600 \mathrm{Vac}, 250 \mathrm{Vdc}$ maximum
■ 30-800 A
■ Fusible or non-fusible
■ Trunk-type latches keep the cover tightly closed and a neoprene gasket seals out moisture and dust from the switch assembly
■ Visible double break rotary blade mechanism. Two points of contact provide a positive open and close, easier operation, and also help to prevent contact burning for longer contact life

- Clear line shield protection
- Built-in fuse pullers

■ Clearly visible handle
■ Triple padlocking capability. Cabinet door can be further padlocked at the top and bottom

- De-ionizing arc chutes. Arc chutes confine and suppress the arcs produced by contacts under load

## Flex Center

## Introduction

The Switching Device Flex Center is a special facility at the site of Eaton's Cleveland, Tennessee plant that is dedicated to providing customized safety switches and enclosed breakers that meet customer's challenging applications.

Table 28.2-3. Common Flex Center Design Offerings

| Modification | Catalog Suffix | Description |
| :---: | :---: | :---: |
| Custom paint | (varies) | Special paint colors are available such as red, orange, yellow, green, black, white. Other colors may be available upon request. Custom color is applied over the standard ANSI-61 gray finish. |
| Nameplates | -00NP | Plastic or phenolic nameplates are available. Up to three lines of text, 25 characters per line. Standard offering is white with black letters. Custom colors and sizes available upon request. Specify text at order entry. |
| Lock on provisions | -00LO | Available on heavy-duty and double-throw safety switches. Provision will accept a single lock. |
| Trapped key interlock | -00TK | Available on heavy-duty and double-throw safety switches. Trapped key systems are used on safety switches to prevent unauthorized operations or to predetermine a series of power transfers by an authorized operator. |
| Upper viewing window | W | An upper viewing window is centered over the switching contacts to provide visual verification of ON/OFF status. Available on NEMA 12/3R and NEMA 4X stainless steel heavy-duty and double-throw safety switches. Note: $30-100$ A switches are now provided with a full view cover window for both blade and blown fuse viewing. |
| Lower viewing window | LW | A lower viewing window is centered over the fuses and provides visual verification of blown fuse indicators. Available on 200-1200 A NEMA 12/3R and NEMA 4X stainless steel heavy-duty and double-throw safety switches. Available for fusible switches only. <br> Note: 30-100 A switches are now provided with a full view cover window for both blade and blown fuse viewing. |
| Neutral assemblies | N | Factory-installed field neutral accessory kits. Add Suffix $N$ on non-fusible switches, or replace the 6th character " $F$ " with " N " on fusible switches. |
| Class "R" fuse clips | 5 or 6 | Factory-installed Class R fuse clips/provisions. Add Suffix 5 for 240 V switches, and Suffix 6 for 600 V switches. Available on 30-600 A safety switches. |
| Class "T" fuse clips | T | Factory-installed ClassT fuse clips/provisions. Available on 200-1200 A safety switches. |
| Class "J" fuse clips | J | Factory-installed Class J fuse clips/provisions. Available on 30-600 A safety switches. Note: Field modification kits are not available for 30 A heavy-duty safety switches. 30 A switches requiring Class J fusing must be ordered factory installed with J suffix. |
| Fungus proofing | -00FP | All non-metallic components of the switch are coated with a moisture and fungus-resistant varnish.The inhibitor used meets military specification: MIL-V-173C for MOISTURE AND FUNGUS-RESISTANTTREATMENT. The treated switch meets military specification MIL-T-152E for MOISTURE AND FUNGUS-RESISTANTTREATMENT OF COMMUNICATIONS, ELECTRONICS, AND ASSOCIATED EQUIPMENT. Not UL Listed. |
| Fuse pullers | FE | Factory-installed fuse pullers. <br> Note: Standard NEMA 12/3R and 4X switches 30-200 A are supplied with fuse pullers from the factory. |
| Crimp lug pads | -00CK | Factory-installed crimp lug pad kits. Available on 400-800 A safety switches. Crimp lugs are not included. <br> Note: Standard heavy-dutyType DH switches 30-200 A are adaptable to crimp lugs; simply remove the box lugs. |
| Copper lugs | -00CL | Factory-installed copper lug kits. Available on 30-800 A safety switches. |
| Ground lug kits factory installed | G | Factory-installed ground lug kits. Provides additional ground lug capacity when compared to ground lugs that come with standard safety switches. Available on 30-1200 A safety switches. |
| Custom lugs | -000L | Customer-specified lug arrangements are available on heavy-duty and double-throw safety switches. |
| Auxiliary contacts | 2 or 3 | Factory-installed auxiliary contact kits (DS200EK1 or DS200EK2). Auxiliary contacts are Early-Make/Early-Break operation. To specify 1NO/1NC contact, add Suffix 2 . To specify 2NO/2NC contacts, add Suffix 3. |
| Control pole | -00CP | The K-Series control pole provides one NO contact. It mounts in the exact location as the neutral block using the same pre-drilled holes. This is directly connected to the power pole operating shaft. Direct connection and visible blades provide more secure electrical interlocking than handle linkage operation of a snap/switch type interlock. This reliability meets the requirements of many specifications for four-pole switches when the fourth pole is required for secure electrical interlocking.This control pole provides Same-Make/Same-Break operation. |
| Control pole with offset | -0CP2 | Same as above except this control pole provides Late-Make/Early-Break operation. Both Control Pole options are provided when you purchase the DS16CP field kit. |
| Switching neutral double throws | SN | UL Listed for three-pole and four-pole non-fusible double-throw safety switches. Switching neutrals are required for separately derived systems when bonding the neutral of the generator to a grounding system at the generator. |
| Surge protection | (varies) | Factory-installed EatonType 1 (SP1 series) orType 2 (CVX series) surge protective device products. SPD installed and wired to load side of disconnect. |

## Additional Flex Center Design Offerings

■ Left-hand design (30-200 A)

- Cover controls
- 200\% neutrals

■ Seam-welded stainless steel
■ Quick Connect products with
Cam-Lok and Posi-Lok receptacles
■ Custom enclosures

■ 316 grade stainless steel

- Mill-duty switches
- Irrigation switches
- Fuses installed

■ Hook stick handles (heavy-duty switches only)

- Custom labels
- Custom mounting
- Pad-mount designs
- Non-standard receptacles
- Enhanced visible blade
- Voltage indicators

## Contact

For more information on these or any other modifications, please contact the Switching Device Flex Center at 1-888-329-9272, email FlexSwitches@eaton. com or visit Eaton.com/FlexCenter.

## Accessories and Field Kits

## For General-Duty, Heavy-Duty and Double Throw Safety Switches

Table 28.2-4. Safety Switches-Accessories

| Description |  | Catalog Number |
| :---: | :---: | :---: |
| Neutral Kits ${ }^{1}$ |  |  |
| DH030NK | 30 A DG | DG030NB |
|  | 60-100 A DG | DG100NB |
|  | 200 A DG, DH (NEMA 1,3R enclosures) | DG200NK |

Miscellaneous Kits

| Hookstick handle | DH800HSH |
| :--- | :--- |
| Lubricating grease for safety switch blades and contacts <br> (each kit contains three 30 cc tubes of lubricating grease) | DSLUBEKIT |

(1) Service entrance bonding kit and sticker are included with the neutral kit.
(2) Ground bar kit is not listed on device publications.
(3) Order one kit per switch.
(4) For duty ratings, see table on following page.
(5) Order one kit for three poles.
(6) Order one kit for each pole.
(8) 30 A Class J available as factory option only.
(8) If Class J fuse kit is not listed, then switch will accept Class J fusing by repositioning either fuse base or fuse clips. No drilling required.
(9) Order one kit for six poles.

Note: Accessories are not applicable to NEMA 7/9 switches unless indicated otherwise.

## Auxiliary Contact Rating

Table 28.2-5. AC Pilot Duty Ratings

| Description | Volts | Break <br> (Amperes) | Make <br> (Amperes) | Catalog Number |
| :--- | :--- | :--- | :--- | :--- |
| 1NO-1NC | 110 | 15.0 | 40.0 |  |
| 1NO-1NC | 220 | 10.0 | 20.0 | DS200EK1 |
| 1NO-1NC | 440 | 6.0 | 80.0 | DS200EK1 |
| 1NO-1NC | 600 | 5.0 | DS200EK1 |  |
| 2NO/2NC | 110 | 3.0 | DS200EK1 |  |
| 2NO/2NC | 220 | 1.5 | 15.0 | DS200EK2 |
| 2NO/2NC | 440 | 1.0 | 8.0 | DS200EK2 |
| 2NO/2NC | 600 | 0.8 | 6.0 | DS200EK2 |

Table 28.2-6. DC Pilot Duty Ratings

| Description | Volts | SingleThrow <br> (Amperes) | DoubleThrow <br> (Amperes) | Catalog Number |
| :--- | :--- | :--- | :--- | :--- |
| 1NO-1NC | 115 | 2.0 | 0.5 | ( |
| 1NO-1NC | 230 | 0.5 | 0.2 | DS200EK1 |

## Double Door

## Dimensions

Approximate Dimensions in Inches (mm)
Note: Dimensions are for estimating purposes only.
Table 28.2-14. Heavy-Duty Double Door Safety Switch

| Ampere Rating | Height (H) | Width (W) | Depth (D1) | Depth (D2) |
| :--- | :--- | :--- | :--- | :--- |
| $30 / 60$ | $37.49(952.3)$ | $9.30(236.2)$ | $8.22(208.8)$ | $6.37(161.8)$ |
| 100 | $39.19(995.4)$ | $12.33(313.2)$ | $10.21(259.3)$ | $6.37(161.8)$ |
| 200 | $49.90(1267.5)$ | $17.18(436.4)$ | $11.62(295.1)$ | $7.31(185.7)$ |
| 400 | $72.46(1840.5)$ | $24.32(617.7)$ | $16.41(416.8)$ | $14.56(369.8)$ |
| 600 | $77.96(1980.2)$ | $25.32(643.1)$ | $19.31(490.5)$ | $17.80(452.1)$ |
| 800 | $86.73(2202.9)$ | $26.57(674.9)$ | $22.16(562.9)$ | $17.81(452.4)$ |
| 1200 | $91.02(2312.0)$ | $43.11(1095.0)$ | $27.18(690.4)$ | $21.23(539.2)$ |

(1) Switches ranging from 30 A to 400 A can relocate clips/base for class J fuses. All other classes/amperages require a kit. Please consult catalog or contact the Technical Resource Center (TRC) for specific kit catalog numbers.
(2) Lay-in type lug uses 30-100 A. Two ground lugs are provided for 200-1200 A switches, each accommodating the wire range listed above.
(3) Single barrel lug that accepts one or two cables per phase as detailed above.
(4) Double barrel lug that accepts two cables per phase as detailed above.
(5) Remove wireway in bottom compartment. Necessary for 30-200 A units only.

| 1200 (2) | 200 k at 600 V | 200 k at 600 V | 200 k at 600 V | 200 k at 600 V |

(1) Applicable to quick connect single throw, OEM line isolation (OLI) switches, double door, elevator control switches, six-pole motor circuit switches.
${ }^{(2)}$ Class " $L$ " fuse connectors supplied as standard for 800 A and 1200 A .
Note: Class " $\mathrm{H}^{\prime}$ fuse clips supplied as standard for 30-600 A. Rated at 10,000 A rms symmetrical when using Class " H " fuses.

## NEMA Type 7/9

Fusible and non-fusible versions are rated up to 10 kAIC at 600 Vac .

## Quick Connect Double Throw

Table 28.2-42. Short-Circuit Ratings Using Class "R," "J" or "T" Fusing where Applicable

| Ampere <br> Rating | Short-Circuit Ratings (Amperes) (600V) |  |
| :--- | :--- | :--- |
|  | Type 1 | Type 3R |
| 100 | 100 k | 100 k |
| 200 | 100 k | 100 k |
| 400 | 100 k | 100 k |
| 600 | 100 k | 100 k |
| 800 | 100 k | 100 k |
| 1200 | 100 k | 100 k |

Note: Class "H" fuse clips supplied as standard for 100-200 A, Class "T" for 400-800 A. Rated at 10,000 A rms symmetrical when using Class " $\mathrm{H}^{\prime \prime}$ fuses.
Note: Class "L" fuse connectors supplied as standard for 1200 A.
Note: Safety switch short-circuit ratings are applicable to AC only.
Note: Safety switch $I^{2} t$ and $I_{p}$ values are identical to UL maximum acceptable $I^{2} t$ and $I_{p}$ values for the corresponding class fuse.

## Fuse Dimensions

Figure 28.2-11. Typical Fuse Dimensions in Inches
Note: For typical fuse dimensions in millimeters, see Figure 28.2-12 on Page 28.2-21.

Figure 28.2-12. Typical Fuse Dimensions in Millimeters
Note: For typical fuse dimensions in inches, see Figure 28.2-11 on Page 28.2-20.

Note: There are no applicable Catalog Numbering Systems available for NEMA 7/9 disconnects or Six-Pole motor circuits. The Catalog Numbering Systems on this page can be used for those catalog number product selections.

Table 28.2-43. Ouick Connect Single Throw Safety Switch Catalog Numbering System

(1) For a two-pole switched neutral device, the catalog number will build as a three-pole, such as DH323SNRKLC 2P/3W.

For a three-pole switched neutral device, the catalog number will build as a four-pole, such as DH423SNRKLC 3P/4W.
(2) This field is used only when a switch is completely non-fused. If the switch is fusible, the neutral will be included with that character.

(1) Not all configurations for ampere rating and number of circuits are available. All circuit configurations can be found in the product dimension tables.

[^0]:    (3) When upper and lower switches are the same, the switch configuration is consolidated in one letter (e.g., " $U$ " not " $U U$ ").
    (4) This field is used only when a switch is completely non-fused.
    (5) 1200 A is only available as fully fused or fully non-fused as it incorporates the stacked double throw design.

[^1]:    (1) 100VA with Primary and Secondary fusing (120V Secondary).
    (2) F3 Option only available with R1 relay selection.
    (3) All Elevator Control Switches come with 1NO/1NC auxiliary contact as standard.
    (4) For specific information on Eaton's SP1 surge protective devices, refer to Product Aid PA01005006E.
    (5) Required by some codes in Arizona.
    (6) Not in Bid Manager ${ }^{\circledR}$ but available through the Flex Center (FlexSwitches @Eaton.com or 1-888-329-9272).
