

Date: October 16, 2017

To: Bussmann series CHPV modular photovoltaic fuse holder customers

Subject: Product change notification

Dear valued customer:

Effective immediately, the fuse carrier on the Bussmann series™ 1000 Vdc photovoltaic CHPV DIN-Rail modular fuse holder has changed from grey to black as shown in the images below. This change affects both the indicating and non-indicating, 1- and 2-pole versions. This change is color only and the newer versions retain the same form, fit and electrical characteristics as the ones they replace. Additionally, all accessories available for the old CHPV fuse holders remain the same for the new CHPV fuse holders.

Any existing inventory is saleable product and should not be returned.

Orders for the CHPV fuse holder will be filled with the older, grey fuse holder versions until inventory is depleted. Once existing inventory is depleted, orders will then be filled with the new black fuse carrier versions.

The following catalog numbers are covered by this product change notice.

| Catalog no. | Description | UPC |
|-------------|-----------------------|--------------|
| CHPV1IU | 1-pole indicating | 051712362726 |
| CHPV1U | 1-pole non-indicating | 051712362719 |
| CHPV2IU | 2-pole indicating | 051712362740 |
| CHPV2U | 2-pole non-indicating | 051712362733 |

Old, grey fuse carrier version

New, black fuse carrier version

If you have any questions about this product change notice, please contact your local Bussmann series product representative. If you need technical assistance, please contact our Application Engineering team at FuseTech@eaton.com.

Best Regards,
