

## Eaton's digital NZM circuit breakers – the next generation

### Connectivity and advanced safety technology in one device.

With the new digital NZM, Eaton is launching a comprehensive range of circuit breakers that is ahead of its time. Eaton is invested in the future of its customers – based on their exact needs, we have developed tailor-made solutions that are reliable, innovative and future-proof.

#### Ready for Industry 4.0

- Integrated Class 1 energy metering
- Communication on board

#### A new model – but 100% compatibility

- Identical dimensions
- Identical accessories
- Design verification valid (e.g. IEC 61439)

#### Life-cycle management

- Lifespan indicator
- Status message
- Event log

#### Safety above standard

- Protection from internal arc flashes (Arcflash Reduction Maintenance System™)
- ZSI – zone-selective interlocking

#### Enhanced performance

- New 70 kA switching capacity
- Improved selectivity

#### Optimized Handling

- New push-in terminals
- Integrated communication
- New added-value features
- Integrated test function
- Micro-USB interface
