

Eaton's medium-voltage E-series relays

8 REASONS WHY YOU SHOULD CHOOSE EATON'S E-SERIES RELAYS FOR YOUR SUBSTATION

- 1 Integrated IEC 61850 with GOOSE**
Mitigate faults, bolster electric system reliability, protect people and processes, and achieve ultimate flexibility.
- 2 Eliminate up to 75% of copper wiring for control circuits**
Enhances personal safety through reduction of control wiring voltage.
- 3 The E-Series makes programming a breeze**
Reduced programming complexity through hardware and software commonality with an intuitive user interface with flexible configurations and simple alarming and notification.
- 4 10-year standard warranty**
Confidence in your operation through knowing you have a relay with one of the best warranties in the industry.
- 5 20+ years providing relays**
Reliable technology; proven over the past 20 years.
- 6 24 hour support line**
Piece of mind as you can troubleshoot 24 hours a day.
- 7 Easy retrofitting**
No-hassle modernization as we make it easy to swap our your older devices.
- 8 Proven manufacturer of medium voltage breakers and switchgear**
One-stop shop as Eaton's been designing, manufacturing and servicing critical electrical infrastructure for over 100 years.
