Date: August 31, 2013
To: Eaton Electronics ETF Radial Fuse Customers
Subject: End-of-Life Notice

On March 15, 2013, Eaton Electronics (Bussmann) issued an End-of-Life notice stating the ETF Series of radial leaded fuses would be discontinued effective on June 28, 2013, with a last-time order date of April 15, 2013.

This notice confirms the ETF Series is now obsolete.

The recommended replacement for the ETF Series is the SR-5 Series from the part numbers listed below.

Any inventory of ETF Series fuses is still saleable and should not be returned.

Any order placed for an ETF Series fuse will not be accepted. Eaton Electronics suggests you contact Applications Engineering to positively identify a replacement from the SR-5 Series and place a new order with your customer service representative.

If you have any questions or concerns about this End-of-Life notice, please contact your local Eaton Electronics (Bussmann) Sales Representative or Applications Engineering at FuseTech@CooperIndustries.com.

Thank you for your business and cooperation with this notice.
