

**Date: April 17, 2014**  
**To: Eaton's Electronics Customers**  
**Subject: Manufacturing Location Change**

Dear Valued Customer:

Between January 1, 2014 and July 31, 2014 Bussmann branded product produced in our Goldsboro, NC plant will transition and be relocated to manufacturing facilities in either Lagrange, NC or Juarez, Mexico.

The tables in the following pages of this notice list the part numbers affected by this transition and the plant location that will be producing them.

These production moves have been planned using a process that goes to great lengths to ensure uninterrupted supply and consistent product quality.

Prior to any customer shipments, products will undergo a complete suite of validation testing at the new location to assure product size, specifications and electrical properties are the same as when they were produced at the Goldsboro, NC plant.

All part numbers remain the same as does the ordering process, and any inventory you may have remains saleable product and should not be returned.

PPAP level 3 and PSW documentation will be provided as needed. If you have any questions about this Manufacturing Location Change, please contact your Eaton representative.

Best Regards,
