

The dual cleaning disc and twin actuator design of the DCF-3000 mechanically cleaned filter can be fabricated in a variety of materials and options. It can be used in many different applications and operating temperatures up to 400 °F (200 °C). It is ideal for highly viscous or sticky liquids with flow rates of up to 500 GPM (110 m³/h). For water-like liquids, it can handle flow rates up to 1,500 GPM (340 m³/h).

FEATURES

- No need for disposable filter media reduces operating, material and disposal costs
- Minimum product loss through highly concentrated discharge of contaminants
- Virtually maintenance- and interruption-free operation
- Safe operation through reduction or elimination of operator intervention
- Compact and cost-effective design to fit most installations
- Slotted wedge wire elements in stainless steel from 15 µm and perforated filter elements up to ¹/₄" (6.35 mm) handle a wide range of filtration requirements
- Available with POM (Delrin®) or PEEK cleaning discs
- Optional with Eaton control unit
- ASME U stamp available

TYPICAL APPLICATIONS

- Paper coatings PCC/GCC slurries Phenolic resins
- Detergents Petroleum based greases Ethanol processing
- Hot fry oils CIP fluids (sodium hydroxide) Starch
- Lime slurries Adhesives Curtain coaters Nutraceuticals
- Machining coolants Paint Ink Chocolate Edible oils
- Tallow

When filtering high viscosity liquids for demanding applications, the DCF-3000 filter's twin actuator, dual disc models deliver tremendous benefits. It is available in flow rates up to 1,500 GPM (340 m³/h) with retentions of 15 µm to 1/4" (6.35 mm).

The DCF-3000 filter is equipped with the proven twin actuator and mechanical cleaning similar to the DCF-1600 filter. It is designed for higher flow rates and compatible with a wide range of fluid process conditions. A maximum operating pressure of 150 PSI (10 bar) along with a maximum temperature of up to 400°F (200°C) allows for multiple seals and cleaning disc material options.

isolate the actuation

mechanism from the filtrate with a

bridged system. The benefit is a long

operating life for high pressure, high

temperature conditions.

Dual circular cleaning disc design ensures intimate contact with the screen to thoroughly and uniformly clean the media.

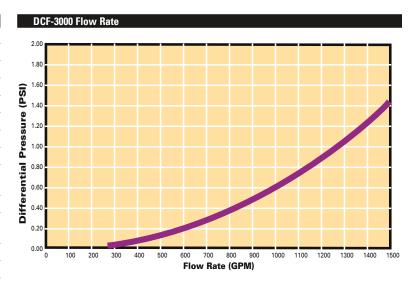

DCF-3000 Specifications			
Approx. weight	639 lbs (290 kg)		
Service height:	136 in (3,454 mm)		
Flow rates at 100 µm:	Up to 1,100 GPM (250 m³/h)		
Operating pressure:	30 - 150 PSI (2 - 10 bar)		
Operating temperature, max.:	400 °F (200 °C)		
Viscosity:	Water-like to 500,000+ cP		
Standard retention:	15 - 1,100 μm		
Housing material:	316 Stainless steel		
Elastomers:	EPT/EPDM, FPM (Viton®),		
	White Nitrile (food grade)		
Cleaning discs:	POM (Delrin), PEEK		
Packing:	Urethane, Teflon®, Viton and		
	Gylon®/Viton		
Process connections:	4 - 8 in 150# ANSI flanged		
Purge connection:	2 in NPT/2 in BSPT		
Air for actuator drive	80 PSI (5.5 bar) min 116 PSI (8 bar) max.		
(clean, dry, non lubricated air):	5.0 cfm (141.5 l/min)		
Electrical for controllers:	115 VAC or 230 VAC, 50/60 Hz		
Semi-auto voltage:	24 VDC, 115 VAC, 230 VAC		
Flooded weight:	1,049 lbs (476 kg)		

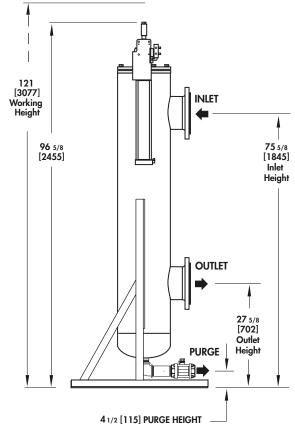

Slotted Wedge Wire Strainer Element Options

Inch	Micron	Mesh	% Open Area
.002	50	325	6
.003	75	200	9
.004	100	150	12
.006	150	100	17
.007	180	80	19
.008	200	70	21
.009	230	60	23
.015	380	40	33
.024	600	30	44
.030	700	20	50
.045	1140	15	60

Additional retentions available, consult Eaton.
