Automatic Self-cleaning Strainers

Model 2596

Eaton's Model 2596 automatic self-cleaning cast pipeline strainers are available in 10", 12", 14" and 16" sizes. The Model 2596 is recognized across industries for its continuous flow, simplified maintenance and worry-free operation.

Features / benefits

• Flow rates up to 1,476 m³/h

Cast ductile iron construction

Automatic backwashing

• A broad selection of screen options

• Exclusive idL[™] seal for leak free service

• Unitized modular assembly for easy maintenance

The Eaton Model 2596 automatic self-cleaning strainer is designed for the continuous removal of entrained solids from liquids in pipeline systems.

With an automated control system monitoring the strainer operation, cleaning is accomplished by an integral back- wash system. A small portion of the screen element is isolated and cleaned by reverse flow while the remaining screen area continues to strain-providing uninterrupted flow. This efficient design uses only a small amount of the liquid being strained to carry debris away from the strainer element.

The Model 2596 features the idL shaft seal that positively prevents leakage from the backwash shaft at the top of the strainer. This unique quad seal keeps the exterior of the strainer dry and prevents external leakage or weeping of the process media down the sides of the strainer.

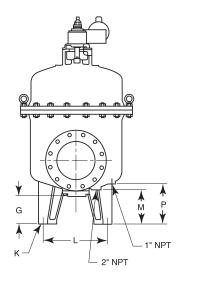

To simplify maintenance the Model 2596 features a unitized modular assembly. The motor, gear reducer and the internal operating mechanism are all housed within the strainer cover and lift off as a unit. This makes all components easily accessible and reduces associated maintenance costs.

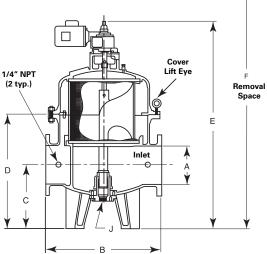

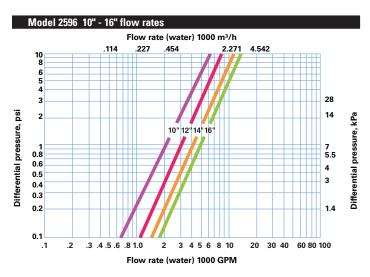

Pipeline Strainer Cast Construction

Model 2596 10" to 16" Automatic Self-cleaning Strainers

Pressure drop data indicates results to be expected with clean water, under normal flows with standard screens and in clean strainer.

Application limits

• Ductile iron class 125 flange (-29 to 65 °C): 10.3 bar

Application limit 16" size

 Ductile iron class 125 flange (-29 to 65 °C): 10.3 bar Based on ASME Code. Lower pressure ratings at higher temperatures
