

NEMA Contactors for the Construction Market

NEMA Size 1 Contactor

Freedom Series NEMA Contactors – Overview

- Market leader in NEMA power control
- Most complete line in the industry
- Ideal for project construction, HVAC, pump and industrial applications
- Open and enclosed versions

Freedom Series NEMA Starters – Overview

- Three-phase, full voltage magnetic starters most commonly used to switch AC motor loads
- Bimetallic ambient compensated overload relays
- These overload relays feature:
 - Interchangeable heater packs adjustable $\pm 24\%$ to match motor FLA
 - Selectable manual or automatic reset operation
 - Single-phase protection, Class 20 or Class 10 trip time
 - Overload trip indication
 - Electrically isolated NO-NC contacts (pull RESET button to test)
- Also available with solid-state overload relays (see Tab 33 of the Control Products & Services Catalog, CA08102001E)

¹ When ordering, replace magnet coil alpha designation in catalog number () with proper code suffix from table below.

² The service-limit current ratings represent the maximum RMS current, in amperes, which the controller shall be permitted to carry for protracted periods in normal service. At service-limit current ratings, temperature rises shall be permitted to exceed those obtained by testing the controller at its continuous current rating. The current rating of overload relays or trip current of other motor protective devices used shall not exceed the service-limit current rating of the controller.

³ Common control. For separate 120V control, insert letter D in seventh position of listed catalog number (ex. CN15VND3C).
