Small size. Big impact.

Eaton's comprehensive line of **XT** IEC power controls

The XT Line of IEC Power Control, consisting of contactors, overload relays, mini controls, manual motor protectors and combination style starters, is one of the world's newest and most complete IEC Power Control product lines on the market. The XT applies new technology and design to help OEMs address five basic needs:

Improving production

Toolless assembly

- Requires no tools to assemble
- Applies to B-Frame (10 hp, 15A) reversing and star-delta contactors, combination style starters and surge suppressor accessories

Combination style starters

 One unit replaces traditional breaker/fuse block with contactor and overload, saving installation time and effort

Coil terminations

 Easily accessible coil terminations in the front of the contactor make installation, testing, and replacement much easier and safer

Lowering material costs

Small contactors

- Smallest 10 hp contactor on the market
- All XT DC controlled contactors have the same depth as AC controlled **XT** contactors
- Reduced panel space can help decrease enclosure size and costs

Side-by-side mounting

- Low coil consumption allows for side-by-side mounting
- Reversing contactors require no additional width for the mechanical interlock
- Reduced panel space can help decrease enclosure size and costs

Combination style starters

- Replaces traditional breaker/fuse block with contactor and overload
- Reduced panel space can help decrease enclosure size and costs

Electronic coils

- Efficient coil design—185A to 2000A
- XT contactors have low coil consumption, translating to smaller, less expensive CPTs and power supplies
- Unique control scheme allows for direct control from a PLC or low consumption command device
- Can eliminate the need for a large CPT and interposing relay leading to a reduction in component costs, and smaller enclosure size and costs

Surge suppression

- Surge suppression built-in to electronic coils
- Included in all DC coils
- Included in all AC coils above 185A

Improving equipment performance

Electronic DC coils

- Larger pick-up voltage tolerance and operation range
- Consistent switch-on and switch-off
- Voltage dip ride-through
- Surge suppression included

Better motor performance and protection

• Phase loss and phase imbalance protection conserve motor life and ensure optimum motor performance

Excellent quality performance

• XT has best in class warranty PPM (parts per million) when compared with similar electrical manufacturers

Improving equipment usability

Slideable DIN rail adapter

- Allows for easy component terminations
- and design flexibility

Visible coil power indication

• Applies to contactors and combination style starters up to 150A

Overload selectability

• 5:1 ratio current adjustment range, selectable trip class part numbers

replacement without removal of adjacent components and

• Allows for last minute changes

 Enables easy troubleshooting and testing of contactor operation

(5, 10, 20, 30) and selectable reset style as standard, allowing for greater flexibility using less

Improving equipment safety

Better termination

- Top/bottom dual chamber terminals provide a more secure termination for wires of differing size, minimizing the chance that a wire could become loose
- Applies to contactors up to 500A and manual motor protectors (MMPs)/combination style controllers up to 65A

Removable electrical bridge

- Removing electrical bridge ensures starter is off-line during servicing
- Applies to combination style starters up to 15A

Finger-safe and back-of-hand proof

- Requires no additional shield accessories
- Applies to contactors up to 150A and MMPs up to 65A

We make what matters work.*

At Eaton, we believe that power is a fundamental part of just about everything people do. Technology, transportation, energy and infrastructure—these are things the world relies on every day. That's why Eaton is dedicated to helping our customers find new ways to manage electrical, hydraulic and mechanical power more efficiently, safely and sustainably. To improve people's lives, the communities where we live and work, and the planet our future generations depend upon. Because that's what really matters. And we're here to make sure it works.
