Applications:

Hazard-Gard® EVLP low profile luminaires are used in:

- Areas where flammable or explosive vapors or gases are present
- Hazardous areas, both indoors and outdoors, where long life and low maintenance costs are desired
- Petroleum refineries, chemical, petrochemical and pharmaceutical plants, oil terminals, gas plants and other heavy process industry facilities
- Waste treatment facilities
- Drilling platforms and other coastal and offshore hazardous areas

Features:

- Small, compact size is perfect where low mounting restrictions are a concern
- Two start Acme threaded construction allows for easier assembly, installation and maintenance
- Lightweight copper-free aluminum housing with powdered epoxy finish for superior corrosion resistance
- All exterior hardware is corrosion-resistant stainless steel
- Four mounting arrangements – pendant, ceiling, wall bracket and stanchion – suit any lighting layout
- Wide range of light sources and wattages to meet specific lighting needs
- Marine and NEMA 4X construction suitable for outdoor, hose down, marine and corrosive environments
- Integral ballast for lowest installed cost
- High power factor (90%+) ballasts allows more fixtures per circuit
- Uses same mounting modules as the standard Hazard-Gard for easy retrofitting when the EVLP is the preferred choice
- Internally fluted glass globe reduces glare and distributes light evenly – ideal for adverse environments typical of industrial facilities
- Krydon construction dome and angle reflectors – won't rust, corrode, dent, chip or peel
- Now available in components – luminaire body, mounting module, guard, reflectors – allowing for easy stocking for quick ship requirements

Certifications and compliances:

NEC/CEC:

- Class I, Division 1, Groups B (with suffix GB), C, D – all wattages
- Class I, Zone 1, Groups IIB + H₂ (with suffix GB), IIB, IIA – all wattages
- Class II and Class III

UL standards:

- UL844 – Hazardous (Classified) Locations
- UL1598 – Luminaires
- UL1598A – Marine Locations

CSA standard:

- C22.2 No. 137

Standard materials:

- Mounting modules, cover, ballast housing, globe holder – copper-free aluminum
- Globe – heat- and impact-resistant glass
- Exterior hardware – stainless steel
- Reflectors (dome and angle) – Krydon fiberglass-reinforced polyester
- Guard – stainless steel

Standard finishes:

- Copper-free aluminum – Corro-free epoxy powder coat
- Krydon – white

Electrical ratings:

Sources/wattage:

- Mogul base – 70-150W HPS; 70-250W MH

Voltages:

- Mogul HID
 - Multi-tap (120, 208, 240, 277V, 60 Hz)
 - Tri-tap (120, 277, 347V, 60 Hz)
 - 480V, 60 Hz
- Other voltages – consult Eaton's Crouse-Hinds Division

Conduit entries:

- 3/4", 1" NPT – pendant, wall bracket, ceiling mount
- 1 1/4" NPT – stanchion mount

Options:

Description	Suffix
• Group B suitability	GB
• Ballast-Gard (HPS only)	BG
• Instant restrike	IR
<i>Available with 70-150W LX HPS Cannot be used with BG option</i>	
• Fused	S658^A
<i>Not suitable for marine applications</i>	
• Quartz auxiliary lighting	QTZ
<i>Cannot be used with IR option Uses 100W single-ended double contract lamp Quartz lamp not included</i>	
• Factory assembled with lamps	FA

Accessories (ordered separately):

Description	Cat. #
• Dome reflector	RD739
• Angle reflector	RA739

Photometrics:

- Complete photometrics can be found at www.crouse-hinds.com/photometrics

^AWhen ordering fuses for luminaires, you must specify the operating voltage. S658 cannot be ordered with /MT in the catalog number.

Complete catalog number as follows:

1. Add voltage suffix to end of catalog number.

Standard voltage ballasts – 60 Hz

NEC/UL			CEC/CSA (cUL)	
Voltage	Multi-tap	120V	Tri-tap	120V
Suffix	/MT	/120	/TT	/120

Optional voltage ballasts – 50 or 60 Hz

CEC/CSA (cUL) – CWI isolated ballasts [®]				Export			
Voltage	208V CWI	240V CWI	600V CWI	220V 60 Hz	220V 50 Hz	230V 50 Hz	240V 50 Hz
Suffix	/208CWI	/240CWI	/600CWI	/220	/220 50	/230 50	/240 50

2. 150W HPS luminaires only:

- 55V lamps standard – use suffix LX; for 100V lamps – use suffix CE

[®] Ceiling and wall bracket mounts have four hubs; three are plugged.

[®] CWI isolated ballasts are only available for high pressure sodium and 175-250W metal halide (non-pulse start) luminaires.
