

Which Eaton breaker is right for you?

Choose from breaker options for single-home, residential/light commercial tenant or multi-building applications.

Loadcenter main breakers

Catalog Nos. BR2100, CH2100, BW, BWH, CSH, and CSR2200

Primary application

- CSR-style breakers - Main breaker inside the loadcenter
- BR and CH - Backfed main breakers on 100 A and 125 A loadcenters

Secondary application

- Some styles install in an enclosed main breaker as an outdoor or emergency disconnect

Residential tenant mains

Catalog Nos. BR2125, BRH2100, BRHH2100, BRHX2125 and BRX2100

Primary application

- Main breakers inside 125 A residential meter stacks
- Primary disconnect for a main lug-only loadcenter in individual apartments in multifamily dwelling

Secondary application

- Main breaker in 100 and 125 A loadcenters
- Sub-feed a 100 A panel or for other 100 A loads

Light commercial tenant mains

Catalog Nos. CCV2200 and CV3200

Primary application

- Tenant mains in commercial (200 A) meter stacks

Secondary application

- Enclosed main breaker or a separate enclosure with the main breaker
- Outdoor disconnect for emergency first responders where required

Notes

- CCV2200 replaces CC breaker and is interchangeable with CV3200 using a conversion kit
- Both can deploy in meter stacks and enclosed main breakers

Sub-feeds

Catalog Nos. BJ2200, BJ3200, BRPSF225 and BRSF125

Primary application

- Power downstream subpanels

Notes

- Protection for conductors can be in main panel or nearby subpanel
- Protection for conductors required for subpanel in separate building, and possibly for main panel conductors
