

Product Specifications

- 5mA Sensitivity
- 10kA Interrupting Capacity
- 120/240V AC.
- Single Phase Three Wire
- NEMA type 3R
- Two extra single pole circuit breaker positions for additional lighting or receptacles

Catalogue Number	Amperes	Circuit Breaker Type	Dimensions
CH30SPA	30	CH	11-1/2" H X 6-1/4" L X 4" P 292mm X 159mm X 102mm
CH40SPA	40	CH	11-1/2" H X 6-1/4" L X 4" P 292mm X 159mm X 102mm
CH50SPA	50	CH	11-1/2" H X 6-1/4" L X 4" P 292mm X 159mm X 102mm
CH60SPA	60	CH	11-1/2" H X 6-1/4" L X 4" P 292mm X 159mm X 102mm

With Factory Installed Audible Alarm (Includes Circuit Breaker and Panel)

Eaton Ground Fault Protection Kit

for Hot Tubs, Whirlpools, and Pool Pumps

A Factory-Assembled Unit Means Quicker and Easier Installation for You

- It's delivered assembled, prewired, factory tested, and ready to install. No more expensive, time-consuming on-site assembly of multiple parts.
- Preinstalled neutral and ground bars.
- Door swings up and stays open for easy interior access.
- Bottom feed or top feed using a bolt-on raintight hub.
- Audible alarm option, field or factory installed.

Designed for Your Customers' Safety

- Two additional single pole circuit breaker positions for lighting or receptacles.
- Interior deadfront cover is held securely in place, providing protection against contact with energized parts.
- A padlockable door prevents tampering or having the switch turned on or off by unauthorized personnel.
- Your customers can make certain the GFCI is operating properly by using the push-to-trip button.

15 Year Warranty on the Rugged Type CH Enclosure

- NEMA type 3R rainproof, welded steel construction.
- Tough powder-coated painted galvanized steel enclosure stands up to II types of weather conditions.

Lifetime Warranty on the World's Best Ground Fault Circuit Interrupter (GFCI)

The heart of the kit is the two-pole CSA approved Eaton GFCI that includes a state-of-the-art electronic package that monitors the circuit and trips when it detects a ground fault of five milliamperes or greater.

Optional Audible Alarm

- Especially important when freezing conditions exist.
- Alarm identifies the breaker has tripped, signifying power is shut off to the hot tub.
- Resetting a tripped circuit breaker helps prevent costly expense and damage to the hot tub.
- Factory installed and field installation kit available.

PROTECTION
Plus

It's the Best and Easiest Way to Meet Canadian Electrical Code (CEC) Requirements While Saving Time and Money

CEC Rule 68-086 (1) and (6) requires a Ground Fault Circuit Interrupter, of Class A Type, to be installed not closer than 3 meters (10 feet) to pool or spa water.

Check local codes for compliance.

Eaton Ground Fault Circuit Interrupters (GFCIs) trip on a ground fault, and may also serve as a disconnect switch to turn the pump on and off.
