

Marina Power and Lighting

Admiral SS® Power Pedestal

Supply power and water to larger boats

For vessels requiring larger shore power connections, the Admiral SS features a variety of increased amperages. It is made from durable stainless steel and stands up to harsh weather conditions. When marinas need a bigger pedestal to meet the utility needs of larger boats, they rely on the commanding presence of the Admiral SS.

Benefits

- **Stainless steel enclosure** withstands harsh weather conditions
- **Increased amperage options** power vessels up to 250 feet long
- **Durable design** meets IEEE C57.12.29 coastal corrosion requirements
- **Modularity and customization** allow for a more creative design and more boat types to be suited by a single pedestal style

Recommended boat sizes

Sailboats
80+ feet

Mixed boats
80+ feet

Power boats
Up to 250 feet

Standard features

General
