

Marina Power and Lighting

Lighthouse power pedestal

Light the way to reliable shore power

With more than 150,000 units installed at residential docks and commercial marinas around the world, the industry-leading Lighthouse™ power pedestal provides easy access to all utilities. Its durable housing is constructed of white heavy resin with a polyurethane coating and features a UV-resistant, long-lasting finish.

Benefits

- **Durable construction** designed to withstand outdoor conditions and heavy sunlight
- **Double-sided receptacle access** saves on space, cost, time and labor
- **No-hinge base** makes installation and maintenance easy
- **Cable TV, phone, internet and water connections** provide dockside convenience
- **Digital Metering & optional remote monitoring** tracks each vessels power usage

Recommended boat sizes

Sailboats
80+ feet
