Powerhouse SS Pedestal

Add durability and greater reliability to your RV park

Provide electric and water for up to two recreational vehicles — and save space and money — with the Eaton Powerhouse SS power pedestal. Our double-sided and durable stainless steel pedestal mounts to a pad or via direct burial. Plus, it can house devices for electric and water metering.

Benefits

- **Stainless steel enclosure** withstands any weather conditions
- **Double-sided design** services two RVs and saves space and money
- **Digital electronic metering options** track electric and water usage
- **Durable design** meets IEEE C57.12.29 coastal corrosion requirements
