BAB Bolt-on Loadcentres

Get the benefits and features of the commercial class leading Eaton bolt-on circuit breakers with the smaller footprint of a “plug-on” loadcentre enclosure. Commercial grade protection and performance in the smallest possible footprint.

Designed for the protection and distribution of commercial or light industrial loads, our Eaton BAB type loadcentres utilize bolt-on breakers for heavy-duty applications such as lighting, heating, and small motor branch circuits.

Commercial Grade Main Breaker:

- 10kAIC series rated BAB main breaker for 125 ampere loadcentres
- 125 ampere loadcentres
- 65 kAIC series rated ED main breakers for 225 ampere loadcentres

Additional Features:

- Available with aluminum or copper bus
- Flexible knockout arrangement
- Split neutral design
- Factory pre-attached neutral bonding strip
- Single keyhole mounting
- Breaker twist outs included
