

EV panelboard Pow-R-Line Xpert EV charging panelboards

Eaton's EV charging panelboard is Build America, Buy America Act certified

What is the Build America, Buy America Act (BABAA) with regards to electrical distribution equipment?

- Minimum requirement for all federally funded infrastructure projects
- An assembly must be manufactured in the United States
- An assembly must contain 55% or greater domestically sourced components

Recommended configurations include:

- Maximum 225 A thermal-magnetic main circuit breaker or 400 A main lugs
- Minimum 200 kA surge protective device (SPD) with Surge Counter feature package
- Maximum of five EV smart breaker chargers

Recommended configurations may comply without waiver but must be confirmed by product line and contracts teams. Additional configurations may be available with or without waiver. Additional government program certificates may also be available. Contact your sales or product line representative for more information.
