Description

The VER series is a range of cost effective, medium power, single output converters. Featuring a very small footprint, the standard version complies fully with the latest rail specifications and norms for protection and EMC. For applications requiring compliance with class S2 supply interruptions (10ms hold-up time), an enhanced version is available which also adds active inrush current limiting and output health indication.

Special features include:

- Very compact, lightweight and cost effective
- High efficiency
- · Each model covers two nominal vehicle battery voltages
- Standard and Enhanced versions available
- Fully compliant with rail standards, including EN50155 & EN50121.3.2

Input specifications

The following input voltages versions are available as standard:

72 / 110V	(50.4	-	137.5V)	dc	(Suffix AD)
24 / 36V	(16.8	-	50.4V)	dc	(Suffix BF)
