

When you need more than 'off the shelf'

Eaton's Dry-Type Distribution Transformer Flex Center can help.

Customer-driven specs

- Custom-painted enclosures
- Special labeling
- Tailor-made dimensions and configurations
- Custom efficiency, sound, altitude, operating ambient, impedance and temperature rise

Safer designs

- Compliance with industry and regional standards
- Infrared viewing windows to ease diagnostics
- Hinged front cover to simplify maintenance and testing
- Integrated breakers on secondary side to reduce arc-flash hazard

Harsh environments

- NEMA® 4X, 304 or 316 stainless steel enclosures
- NEMA 12 totally enclosed, non-ventilated
- Hazardous location ratings with Class I, Division 2 encapsulated transformers

Packaged solutions

- Configurations with quick connectors (military grade)
- Pre-terminated cable for ease of installation
- Primary or secondary breakers and ventilated transformer in a single component

Providing transformers to meet unique customer requirements for more than 25 years—custom solutions are our specialty.
