

CC 757542

Date 09 September 2021

CERTIFICATE OF COMPLIANCE

This certificate of compliance validates the following

TEST REPORTS NUMBER 'Assessment Reports' are not acceptable	8895884 8331677 Rev1 3389302	CERTIFICATES NUMBER	KM 704454
DATE OF ISSUE	4 September 2018 29 October 2018 06 July 2021	DATE OF ISSUE	05 August 2021
DATE OF EXPIRY	By expiration of the standard(s)	DATE OF EXPIRY	13 February 2022

Manufacturer details

NAME OF FACTORY / MANUFACTURER	Eaton Electrical Systems Ltd	NAME OF THE BRAND	JSB
FACTORY ADDRESS / REGION (STREET / TOWN / CITY / COUNTRY)	Digital Lighting (Dongguan) Company Limited Xinmin Road Chang'an District Dongguan Guangdong China	MODEL / NO	ECS110 EC125 (SVAEL) EC125B EC125BVEL EC140 EC141
WEBSITE	www.eaton.com www.cooper-ls.com	LOGO ON THE PRODUCT	 JSB
TEL	+971 4 8066100	EMAIL	EatonMiddleEnquiries@eaton.com

Product Details From Test Report		Reference Test Report page NO
DESCRIPTION OF THE PRODUCT <small>(TECHNICAL DETAILS FROM TEST REPORT, SUCH AS ACTUAL FIRE RATINGS/DIMENSIONS/THICKNESS/SENSITIVITY ETC)</small>	<p>The ECS110 is an addressable module for monitoring the function of self-contained luminaires in conjunction to EC2001 Easicheck panel.</p> <p>SVAEL Interface: EC125(SVAEL), EC125B, EC125BVEL The SVAEL interface board is a circuit monitoring device, used with a luminaire in line with the mains input and a control gear, which are all part of a central battery system. The SVAEL circuit is purely to monitor the current drawn by a control gear module via a current transformer; it plays no part in the emergency operation. Changeover for the luminaire occurs at the central battery unit, either (220-240 V) AC from the mains, or (220-240 V) AC from the inverter when mains is not present, there is no DC supply used for the emergency operation. The 230V AC from the mains is fed to 'Lin' terminal through the current transformer and back out the 'Lout' terminal to the driver, thus being in line with mains input and the control gear, capable of detecting the drop in normal supply. Furthermore, there is a communications bus for the monitoring; this also powers the SVAEL (24V DC, 2mA).</p> <p>EC140/EC141 The Eaton Electrical Systems EC141 and EC140 are addressable monitoring and switching device designed for use with static inverter-based emergency lighting applications. When the monitored unswitched local mains supply is healthy, the emergency luminaires connected to the EC141 are fed from their normal switch mains supply and can be switched as required. In the event of a failure of the monitored unswitched supply, or the instigation of an automatic test, the luminaire is automatically disconnected from the normal switched supply and connected to the maintained output of the static inverter. Additionally, at EC141 an auxiliary contact is also provided rated at 1A, 24 Vdc, which opens in the event of a mains failure or test and is designed to interface with external lighting control systems. and at EC141 the function of the connected luminaire is monitored (like EC125). Both modules need to be installed in a luminaire or in an independent enclosure.</p>	1,6

TEST STANDARD (SUCH AS ASTM/BS EN/ DN ETC)	Tested to the full requirements of BS EN 61347-2-11:2002 in conjunction with BS EN 61347-1:2015	4
TEST DESCRIPTION	<p>The following tests were part of the certification process:</p> <ul style="list-style-type: none"> - Classification - Product Marking - Protection against accidental contact with live parts - Terminals - Moisture resistance and insulation - Electric strength - Fault conditions - Construction - Printed circuits - Insulation between circuits and accessible parts - Creepage distances & clearances - Screws, current carrying parts and connections - Electrical connections - Resistance to heat, fire and tracking 	7-31
SPECIFICATION OF TEST SPECIMEN	The complete above-mentioned tests have been carried out on models considered as representative of the listed models. (see appendix 1)	
TEST RESULT (SUCH AS PASSED CRITERIA __ / COMPLIED TO __ / DURATION __ /OBSERVATION __ /ETC)	All applicable clauses as mentioned in the Test Report have passed the test.	7-31

APPENDIX 1

1- Easicheck addressable interface modules

Model	Description /Application	Voltage Supply	Hz	Duration	Computability
ECS110	Easicheck addressable interface modules for building in to Emergency luminaires (self-contained)	24 V DC	N/A	180 min for the connected emergency luminaries	Compatible with EC2001 Panel KM 636748
EC125 (SVAEL) EC125B EC125BVEL	Easicheck addressable interface modules for building in to Emergency luminaires (centrally supplied)	24 V DC	N/A	180 min for the connected emergency luminaries	Compatible with Central Battery system Loadstar KM 569812 and EC1002 Panel KM 636748
EC140	Easicheck addressable monitoring and switching device	230/240 V AC, 3A	50/60 Hz	180 min for the connected emergency luminaries	Compatible with Central Battery System Loadstar KM 569812 and EC1002 Panel KM 636748
EC141	Easicheck addressable monitoring and switching device with luminaire monitoring	230/240 V AC, 3A	50/60 Hz	180 min for the connected emergency luminaries	Compatible with Central Battery System Loadstar KM 569812 and EC1002 Panel KM 636748
