VisionGuard
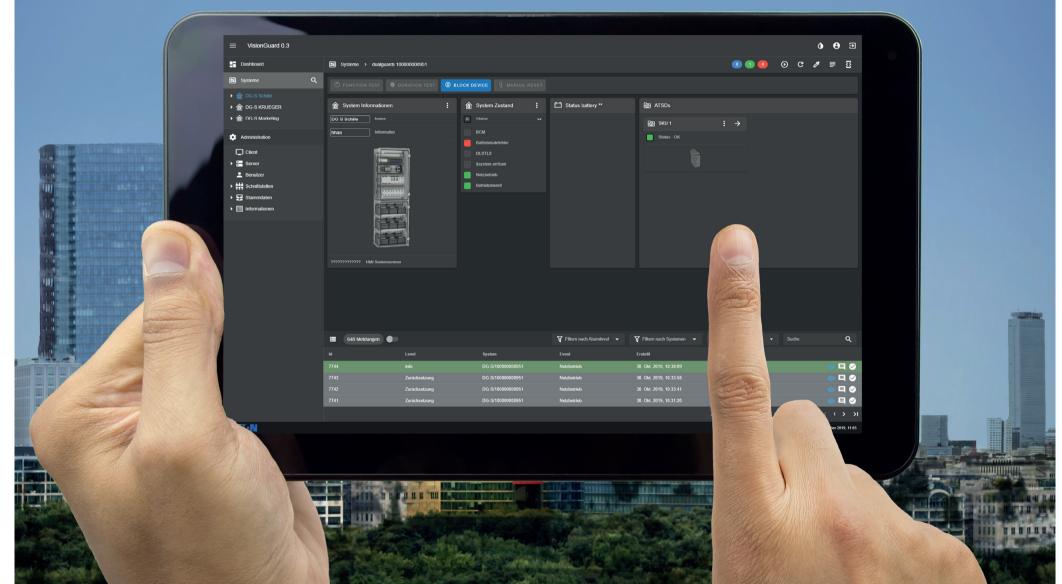

The powerful Visualization Software

As the successor to our successful CGVision software, the powerful new visualization software VisionGuard offers state-of-the-art monitoring, control and configuration. Designed for all current Windows environments based on WIN10 or Windows Server 2016/2019, the software covers all common application types, from dedicated PC workstations to virtualized environments with remote access.

The intelligent and user-friendly VisionGuard visualization software offers maximum reliability, even when it comes to controlling and monitoring large emergency lighting systems. Up to 500 individual emergency lighting systems with over a million light points can be monitored via a single control room monitor.
