

Self-contained luminaire system CGLine+

Simply the most flexible,  
reliable monitoring  
for peace of mind

**EATON**

*Powering Business Worldwide*

# Energizing a world that demands more.

## We deliver:

- **Electrical solutions** that use less energy, improve power reliability and make the places we live and work safer and more comfortable
- **Hydraulic and electrical solutions** that enable machines to deliver more productivity without wasting power
- **Aerospace solutions** that make aircraft lighter, safer and less costly to operate, and help airports operate more efficiently
- **Vehicle drivetrain and powertrain solutions** that deliver more power to cars, trucks and buses, while reducing fuel consumption and emissions

Discover today's Eaton.

## Powering business worldwide

As a global power management company, we help customers worldwide manage the power needed for buildings, aircraft, trucks, cars, machinery and businesses.

Eaton's innovative technologies help customers manage electrical, hydraulic and mechanical power more reliably, efficiently, safely and sustainably.

We provide integrated solutions that help make energy, in all its forms, more practical and accessible.

With 2014 sales of \$22.6 billion, Eaton has approximately 100,000 employees around the world and sells products in more than 175 countries.

## Enhanced safety by providing reliable and efficient monitoring

Bringing all the best features from existing platforms, Eaton's portfolio of life safety products has now been enhanced with the launch of its latest emergency lighting monitoring system for self-contained luminaires. Offering best in class functionality CGLine+ is the evolution of three existing systems combined into one. For smaller buildings a simple web based HMI is available and for larger sites supported by CGVision software, the system is capable of monitoring from 1 to over 25000 luminaires offering the scalability your project requires.

Individual building plans can be uploaded into the system creating a graphical representation of the location of each luminaire, allowing quick and easy identification in the event of any maintenance requirements. The Auto-ID function eliminates the manual addressing of the luminaires which reduces commissioning time and the automatic testing of each individual luminaire reduces maintenance cost.

CGLine+ issues an alert and pinpoints the location for any remedial work as soon as its detected. Also all events and tests are auto-populated into the digital log book where history and system configuration are securely backed up providing reliable efficient monitoring of your emergency lighting system and allowing you to comply with regulations.

This easy to use system supports a legal responsibility to ensure the safety of people in the building as well as giving you peace of mind by creating an environment that helps keep your business running safe and strong.

# All safety luminaires are important. They help protect the life and health of people.

Emergency lighting must be fully functional to provide protection in case of failure of the general lighting.

Even if a single safety luminaire or exit sign luminaire fails, depending on the particular local conditions, there is a significant risk of accidents, for example in a stairway. For this very reason legislation requires continuous testing of the emergency lighting. The operation of the luminaires in battery mode for example (function test) must be verified at least once a week.

#### Self-contained luminaires without an automatic test function

The function test is performed in case of single self-contained luminaires by pressing a button on the luminaire, and the result must be recorded by hand in a log book. An additional duration test for the duration of the rated operating time (1, 3 or 8 hours) must be performed once a year. This test checks whether there is still sufficient battery capacity available. All log book entries must be kept on file for 4 years. If there are a large number of luminaires, manual testing is an extremely laborious process and therefore involves significant costs.

#### Automatic testing simplifies the process

Eaton has implemented automatic test functions in all CGLine+ self-contained luminaires. A microprocessor monitors and controls all functions of the luminaires automatically. The required tests, the function test and the duration test, are performed automatically. The test results are shown on site on the luminaire by a status indicator. Without a central monitoring device, the results must be recorded by hand in the log book and kept on file in paper form for at least 4 years.

CGLine+ exit sign luminaires like the GuideLed CGLine+ are fitted with a microprocessor controller, and perform all luminaire tests completely automatically.

#### Central controller provides more safety

The new CGLine+ Web-Controller initiates the tests, displays the results centrally and stores them with ease in a paperless form in an electronic log book. The electronic log book can be printed off and shown on demand. This process ensures the safe operation of the building, and the building operator meets his duty of documentation.

# CGLine+ self-contained luminaire system

Enhanced safety by providing reliable and efficient monitoring

## CGLine+: More luminaires. More convenience. More safety!

**CG+**  
Line

The new CGLine+ Web-Controller

The tried and tested self-contained luminaire system CGLine 400 has been used since 2004 for the safe monitoring of self-contained luminaires. The new CGLine+ system is a more powerful system to make the operation of self-contained luminaire systems safer and even more convenient.

### Now up to 800 luminaires monitored

The new CGLine+ Web-Controller can visualise a total of 800 CGLine+ luminaires (four lines of maximum 200 luminaires each or two lines of maximum 400 luminaires each). The number of luminaires is doubled as compared to the monitoring capacity of a controller of the CGLine 400 system. This lowers investment costs for larger-scale projects.

Typical installation with max. 4 lines of 200 luminaires each (above) or 2 lines of 400 luminaires each (below).

### Addressing CGLine+ luminaires

Luminaires do not need to be manually addressed in the CGLine+ system. CGLine+ luminaires are fitted with a unique address by the manufacturer consisting of a six-digit ID number in hex code format. Using this address the Web-Controller identifies the luminaires automatically when the system is launched.

In addition, each luminaire can be configured to receive a short digital address and an individual name with a maximum of 20 characters. Hence it is possible to use a name which corresponds to the name of the location according to the planning documents. This simplifies the localisation of luminaires in the building and additional repair procedures can even be remotely planned in case of failure.

### Safety under control worldwide

An integrated web server is available for convenient visualization, control and monitoring of all connected CGLine+ luminaires. The controller can be accessed from any PC with an IP connection and a regular web browser without requiring any special software. The controller provides an overview of faulty luminaires, regardless of where the maintenance personnel are located. Safety issues caused by failed luminaires can be evaluated and the relevant correct measures can be implemented. Regardless of location, completed maintenance works can then be conveniently checked. This means greater efficiency for the building operator, making it simpler to meet his obligations to eliminate any safety hazards as quickly as possible.

Presentation of zones on the first page in a browser view

### Maintain an overview: Allocate the luminaires to zones

Maintaining an overview is important if there are a large number of luminaires. Luminaires of each line can be allocated to up to 8 zones (up to 16 zones in case of installing only two lines). The zones can be areas where the luminaires need be brought together, for example on a floor, in an area or in a room. The exit sign luminaires can be switched off or blocked in different parts of a building which are not being used at certain times. By doing this, energy costs are reduced. By blocking the signs, unintentionally discharging batteries when the mains power is switched off is avoided, for example when maintenance work is being carried out. The zone can be used immediately after turning on the mains power, because batteries have not been discharged and the luminaires can perform their safety function immediately being unblocked.

# CGLine+ self-contained luminaire system

Enhanced safety by providing reliable and efficient monitoring

## Tests are not forgotten, and are carried out at the right intervals for maximum safety

The timing and the intervals of regular function and duration tests can be conveniently and precisely set down to the minute, ensuring that the equipment is ready for operation at any time during the operating hours of the building. This allows luminaires to be grouped into up to eight test groups for this purpose, for example to ensure that duration testing of luminaires installed next to each other is not started at the same time. The image below shows the luminaires of a floor allocated into two test groups. The period between tests is completely adjustable.

The advantages of test groups: Up to eight test groups can be created for testing in order to guarantee the operational readiness of the entire system.

The log book is available at any time using a web browser. Data are stored for at least four years in compliance with standards.

## The electronic log book saves the need for manual logging

All test results are stored in the electronic log book for at least four years, in compliance with standards. The data is available directly using a web browser. The log book can be downloaded directly from the controller through a web server for further analysis of the log book in TXT or DAT file format. The DAT file can then be stored and transported using a regular USB memory stick. The CGLine+ PC software is used for reading the log book in DAT format, providing efficient and convenient analysis of the test results.

The electronic log book simplifies the requirement for the building operator to provide documentation, and it removes the need for laborious, manual logging.

# CGLINE+ self-contained luminaire system

Enhanced safety by providing reliable and efficient monitoring

## Automatic e-mail notification in case of faults

The integrated e-mail service automatically sends e-mails to up to ten recipients in case of allocatable events, for example in case of a luminaire failure being detected following an automatic function test. The aim of this function is to actively notify without delay those persons responsible for building safety about any faults, even if they have no direct connection with the controller at that point in time.

E-mail addresses can be divided into two groups to implement hierarchical escalation. This ensures that when a recipient in the first group is unexpectedly absent, other people are informed to ensure the safety of visitors of the building.

## Selective assignment of commands

The web browser interface is useful for

- Blocking/unblocking instructions
- Manual starting/stopping the function test and duration tests
- Switching on/off maintained light

This can be done in detail for all luminaires, for a line, for a zone and down to individual luminaires.

Furthermore this view offers a system status overview with the most important status messages and the operating condition of the input and output contacts.

# CGLine+ self-contained luminaire system

Enhanced safety by providing reliable and efficient monitoring

## Keep your bearings in complex buildings

The programming of building layout function offers new opportunities. Building layouts can be loaded in the program to display the status of luminaires at the installation location on the floor. Up to 30 different building layouts can be displayed for each controller. Luminaires are displayed with colour codes according to their current status. By touching a luminaire with the mouse pointer, a status window opens up with more information about the luminaire.

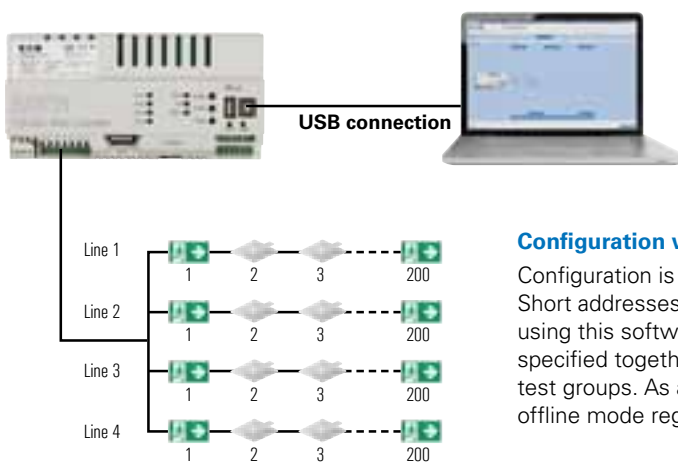

The overview helps provide better orientation in the building. The situation can be judged more effectively and repairs better prioritised.

## Compatibility with the CGLine 400 System

The comprehensive functionality of the CGLine+ controller can only be used in conjunction with CGLine+ luminaires. But of course CGLine+ luminaires and CGLine 400 luminaires can be connected to the CGLine+ controller in a straightforward manner in a mixed setup. In this set-up the controller operates in CGLine 400 mode only. The extended CGLine+ functions can be used only when only unmixed CGLine+ luminaires are installed. The new CGLine+ luminaires can also be used together with the proven CG controller CGLine 400 in CGLine 400 mode.

	CGLine+ luminaires	CGLine 400 luminaires
<b>CGLine+ Controller</b>	CGLine+ mode	CGLine 400 mode
<b>CGLine 400 Controller</b>	CGLine 400 mode	CGLine 400 mode

Comprehensive CGLine+ functions using CGLine+ luminaires connected to a CGLine+ controller

## Configuration with PC software

Configuration is carried out using the CGLine+ PC software. Short addresses and unique names of luminaires can be assigned using this software; the time and interval of automatic tests are specified together with the zone assignment and the definition of test groups. As a result, the entire system can be configured in offline mode regardless of whether the IT network is available.

# CGLine+ self-contained luminaire system

## CGLine+ Web-Controller

### CGLine+ Bus

The communication of all data and commands takes place using the CGLine+ bus installed in a free topology using a two-wire unshielded cable. Should there be a possible break in the bus cable, the additional integrated test function of each CGLine+ luminaire ensures that the tests required are performed automatically, and this is displayed on site at the luminaire. The required cross-section of the bus cable depends on the length of the wire.

### Cable length of a line

Cross-section	Length	For 4 lines in total
0.5 mm <sup>2</sup> *	330 m	1,320 m
1.0 mm <sup>2</sup>	660 m	2,640 m
1.5 mm <sup>2</sup>	1,000 m	4,000 m

\* e.g. J-Y(ST)Y 2x2x0,8

### Electrical data per line/bus

Supply voltage Bus	Max. allowable voltage drop	Bus current
25 V DC	14 V	400 mA

### Set-up of the CGLine+ Web-Controller

- 1 LEDs for line 1 to line 4:**  
It signals the sending or receiving of data between the CGLine+ Web-Controller and the CGLine+ self-contained luminaires.
- Green LED = Receiving of data by the Web-Controller

- Yellow blinking LED = Sending data to the luminaires
- 2 Power LED:**  
The green light is lit as soon as the controller is connected to the 230V/AC supply voltage.

### Test LED:

- Rapid green blinking if at least 1 luminaire is undergoing a function test
- Rapid green blinking if at least 1 luminaire is undergoing a duration test

### LED failure:

Showing a sum failure. Red LED light is lit if at least 1 luminaire is faulty, for example the battery has failed

### 3 Button:

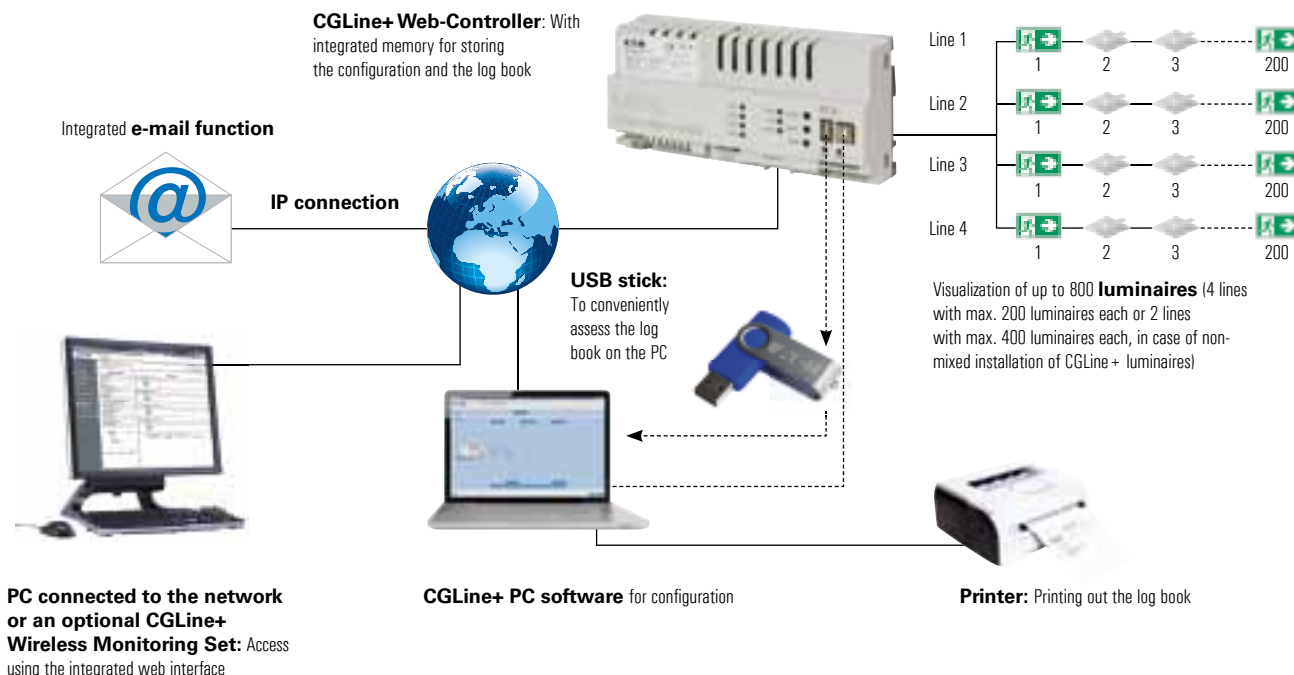

- Service = Starts a function test for example
- System = Starts a USB connection using the USB2 port
- Reset = Hardware reset of the device

- 4 USB1 port (Host)** for connecting a regular USB memory stick

- 5 USB port (Device)**, for connecting to a PC
- 6 PE/N/L 230V 50/60Hz**
- 7 Connections for the CGLine+ bus**, line 1 to line 4
- 8 RS485**
- 9 LAN (RJ45)** with LED display
- yellow = connected (link)
  - green = data transfer (traffic)
- 10 Digital inputs and outputs:**
- S1/S2 = Blocking input
  - In1, In2 = 2 x digital inputs
  - 11, 12, 14 / 21, 22, 24 = 2 x relay outputs

### CGLine+ in operation

### CGLine+ Web-Controller

- For connecting up to 800 luminaires in max. 4 lines
- The integrated web server enables there to be convenient visualization, control and monitoring
- Unique ID per luminaires assigned by the manufacturer
- Automatic luminaire search function requiring no manual addressing
- Simple sorting using unrestricted short address assignment
- Unrestricted entry of target location names for the luminaires with up to 20 characters
- Clearly-shown allocation of luminaires to up to 8 zones per line
- Automatic function test and duration test
- Up to 8 test groups per luminaire can be defined for the function test (FT) and duration test (DT)
- Electronic log book storage for a period of minimum 4 years
- E-mail service for sending automatic e-mail in case of malfunctions to up to 10 e-mail addresses, assignable to 2 escalation groups
- Blocking the emergency lighting function during non-operational periods (all / per bus line/ per zone / per luminaire)
- Luminaires in maintained mode switchable (all / per bus line / per zone / per luminaire)
- Password protected access as an administrator or user
- Visualization of luminaires in up to 30 different building layouts
- Efficient and convenient analysis of the log book using the CGLine+ PC software

Dimensions	214 x 109.8 x 60.1 mm
Housing type	For DIN rail 12 TE
Power supply	230 V AC, 50/60 Hz
Power consumption	< 4 W in standby, < 21 W at full load
Connection terminals	max. 2.5 mm <sup>2</sup>
Permissible ambient temperature	0 °C ... 35 °C
Storage temperature	-20 °C ... 70 °C
Degree of protection	IP20

### Ordering details

Type	Scope of supply	Order No.
CGLine+ Web-Controller	Module in installation housing for DIN rails	40071361055

### Accessories

Type	Scope of supply	Order No.
CGLine+ PC software	on CD-ROM	40071361178
CGLine+ Web-Controller connection box	CGLine+ Web-Controller in wall-mounted housing	40071361184

## Mobile visualization

CGLine+ Wireless Monitoring Set

# CGLine+ Wireless Monitoring Set

The CGLine+ Wireless Monitoring Set enables wireless visualization of CGLine+ Web-Controllers on a tablet via an integrated web browser. Access by other WiFi devices including notebooks and smartphones can be done with ease. This practical solution has the advantage of accessing the status and detailed information of every luminaire, easily and at any time using the CGLine+ Intranet, regardless of its installed location. This way, a wired network connection close to the luminaire is no longer required.

This clearly makes maintenance work easier. After repairing a luminaire, a function test for the relevant luminaire can be started on site to directly check that the luminaire is operative. Because the result is recorded directly in the electronic log book, paper-based protocols can be dropped.

## Installation example

Current status indicator of all CGLine+ luminaires at all times in the web browser of a tablet or smartphone

WiFi (wireless network connection)

CGLine+ web interface and preconfigured WiFi access point incl. 24V/DC mains adapter

CGLine+ WiFi connection box + iPad\* Air

+

Dimensional drawing connection box, data in mm

### CGLine+ Wireless Monitoring Set

- Wireless visualization of up to 800 CGLine+ self-contained luminaires – no wired network connection close to the luminaire required
- Accessing detailed information of every luminaire – regardless of its installed location
- Function test can be started on site to directly check that the luminaire is operative
- Location-independent access to the electronic workbook
- Integrated WiFi access point
- Convenient operation via a web browser and touchscreen
- Apple iPad\* Air, 32 GB, WiFi, grey included in the monitoring set

### CGLine+ WiFi connection box

Dimensions in mm (H x W x D)	360 x 255 x 165
Housing type	Plastic wall-mounted housing
Power supply	230 V AC, 50/60 Hz
Power consumption	< 8.5 Watts standby < 25.5 Watts full load
Connection terminals	max. 2.5 mm <sup>2</sup>
Permissible Ambient temperature	0 °C ... 35 °C
Storage temperature	-20 °C ... 70 °C
Degree of protection	IP54

# Ease of Visualisation

CGLine+ Touchscreen Controller

## CGLine+ Touchscreen Controller

The CGLine+ Touchscreen Controller combines the Web Controller and a 10-inch touchscreen in a single housing. This product combines the power of the Web-Controller (monitoring of up-to 800 self-contained luminaires) with the ease of using an intuitive touchscreen interface.

This enables visualisation of the status of all luminaires connected to the system.

There are three Touchscreen Controller packages available:

### 1. CGL+ CGVision Touchscreen S/Controller

- CGLine+ Web-Controller
- 10.1 Inch Touchscreen
- CGVision Touchscreen Software

This Touchscreen package allows full configuration and visualisation of a single CGLine+ system.

### 2. CGL+ CGVision Touchscreen G/Controller

- CGLine+ Web-Controller
- Ethernet connection
- 10.1 Inch Touchscreen
- CGVision Touchscreen software

This Touchscreen package allows full configuration and visualisation of the integrated CGLine+ Web-Controller and up-to 9 external Web-Controllers via ethernet.

### 3. CGL+ Web Touchscreen Controller

- CGLine+ Web-Controller
- Ethernet connection
- 10.1 Inch Touchscreen
- Embedded Web-browser

This Touchscreen package is compatible with central CGVision software and allows full configuration and visualisation of the integrated CGLine+ Web-Controller and up-to 32 external Web-Controllers via Ethernet.

Building layouts can be uploaded for enhanced identification of luminaires.

### 1. Stand-alone visualisation

**CGL+ CGVision Touchscreen S/Controller**

- Visualisation with CGVision Touchscreen software

OR

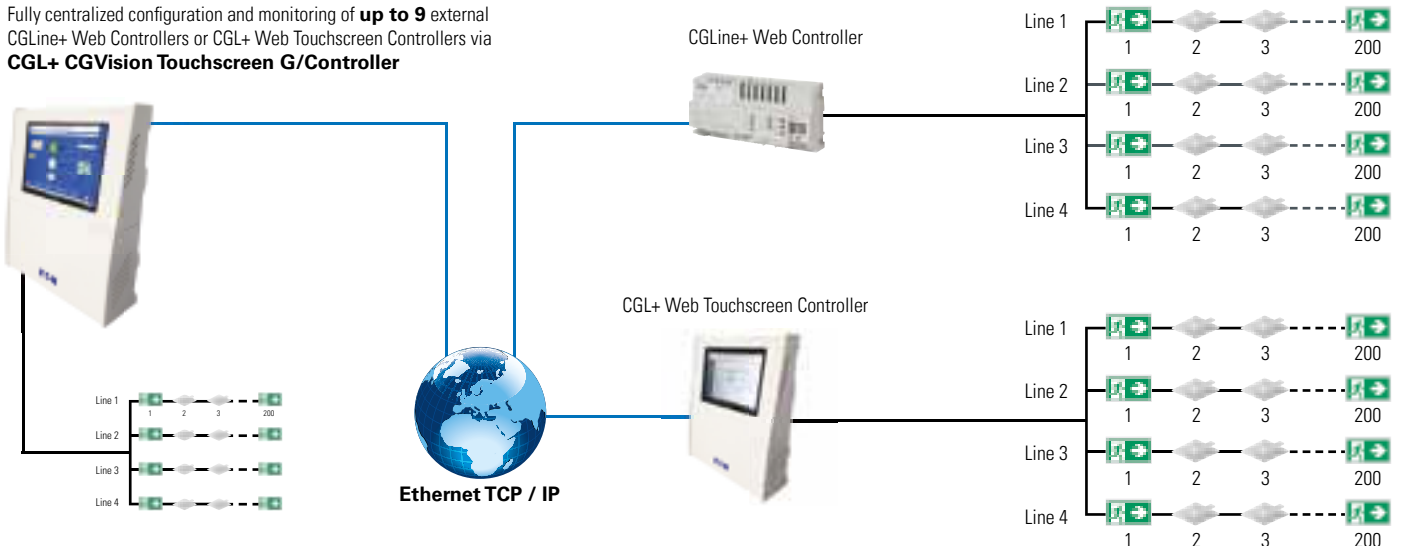

**CGL+ Web Touchscreen Controller**

- Web based visualisation
- Building layout functionality

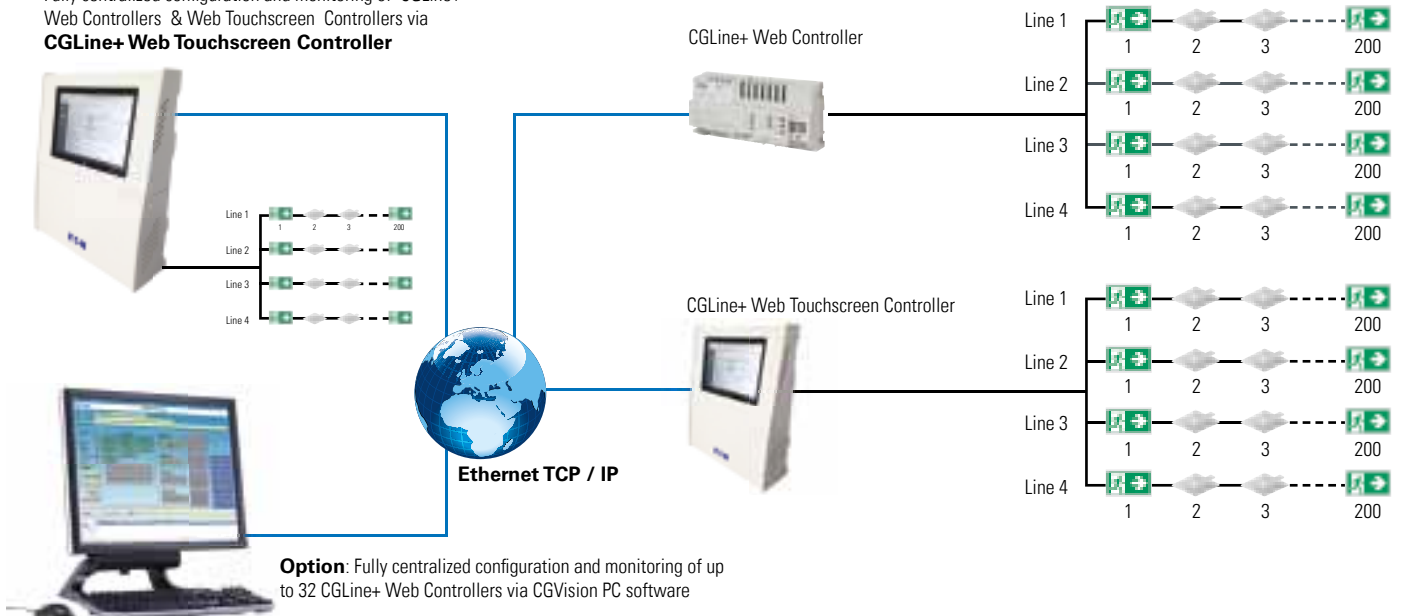

### 2. Group visualisation with CGL+ Touchscreen G/Controller

Fully centralized configuration and monitoring of **up to 9** external CGLine+ Web Controllers or CGL+ Web Touchscreen Controllers via **CGL+ CGVision Touchscreen G/Controller**

### 3. Web-based group visualisation with CGLine+ Web Touchscreen Controller

Fully centralized configuration and monitoring of CGLine+ Web Controllers & Web Touchscreen Controllers via **CGLine+ Web Touchscreen Controller**

**Option:** Fully centralized configuration and monitoring of up to 32 CGLine+ Web Controllers via CGVision PC software

# Ease of Visualisation

CGLine+ Touchscreen Controller

## CGLine+ Web-based visualisation

### Fully centralized monitoring of up to 10 CGLine+ Web Controllers and Web Touchscreen Controllers:

- Secure access with username and password
- Building layout display
- Blocking / Rest mode function for all luminaires
- Manual function and duration tests (all, group or single luminaire)
- Logbook stores events and test results for a minimum of 4 years in compliance with standards.
- Customisable automatic E-Mail dispatch if faults occur
- Full description of the system : See page 6 to 9

## CGVision Touchscreen software

### Home screen:

- Sum status display of up to 10 CGLine+ Web-Controller and all luminaires (Operation, Battery operation, Sum Failure)
- Blocking / Rest mode function for all luminaires with PIN code protection
- Manual function and duration test of all luminaires
- Logbook stores events and test results for a minimum of 4 years in compliance with standards.
- Easy selection between 19 user languages

### System screen:

- Overview of the system

### Zone screen:

- Overview of the zone

CGLine+ Touchscreen Controller

Dimensional drawing Controller, data in mm

### CGLine+ Touchscreen Controllers

- 10,1 inch Touchscreen IPS display with WIN10
- For connecting up to 800 luminaires in max. 4 lines
- Unique ID per luminaire assigned by the manufacturer
- Automatic luminaire search function requiring no manual addressing
- Simple sorting using unrestricted short address assignment
- Unrestricted entry of target location names for the luminaires with up to 20 characters
- Clearly-shown allocation of luminaires to up to 16 zones per line
- Automatic function and duration test of luminaires, with customisable time/date settings
- Up to 8 test groups per luminaire can be defined for the function test (FT) and duration test (DT)
- Electronic log book storage for a period of minimum 4 years
- Blocking the emergency lighting function during non-operational periods (all / per bus line/ per zone / per luminaire)
- Luminaires in maintained mode switchable (all / per bus line / per zone / per luminaire)
- Password protected access as an administrator or user
- Visualization of luminaires in up to 30 different building layouts
- Efficient and convenient analysis of the log book using the CGLine+ PC software

### CGL+ CGVision Touchscreen S/Controller - Specific features :

- CGVision Touchscreen Software allows full configuration and visualisation of the integrated CGLine+ Web Controller.

### CGL+ CGVision Touchscreen G/Controller - Specific features :

- Ethernet connection
- CGVision Touchscreen Software allows full configuration and visualisation of the integrated CGLine+ Web Controller and up to 9 external controllers/installations via ethernet.
- E-mail service for sending automatic e-mail in case of malfunctions to up to 10 e-mail addresses, assignable and 2 escalation groups

### CGLine+ Web Touchscreen Controller - Specific features :

- Ethernet connection
- Web-browser allows a visualisation of the integrated CGLine+ Web Controller and up to 9 external connected CGLine+ Web Controller via ethernet.
- Easy access web-based visualisation
- Building layouts could be loaded and used to localized faulty luminaires.
- Compatible with central CGVision software.
- E-mail service for sending automatic e-mail in case of malfunctions to up to 10 e-mail addresses, assignable and 2 escalation groups

Dimensions in mm (H x W x D)	345 x 397 x 111
Housing type	Plastic, wall-mounted housing
Power supply	230 V AC, 50/60 Hz
Power consumption	< 12 watts standby < 38 watts full load
Connection terminals	max. 2.5 mm <sup>2</sup> flexible
Permissible Ambient temperature	0 ° to 35 °C
Storage temperature	0 ° to 35 °C
Degree of protection	IP 20

### Ordering details

Type	Scope of supply	Order No.
CGLine+ Web Touchscreen Controller	Web-based visualisation via integrated web-browser of any no. of networked CGL+ Web Touchscreen Controller or CGLine+ Web Controller. A networked CGVision PC allows a full configuration and monitoring of up to 32 CGLine+ Controllers	40071361056
CGL+ CGVision Touchscreen S/Controller	CGL+ CGVision Touchscreen S/Controller: Stand alone operation with full configuration and monitoring	40071361083

CGLine+ PC software	on CD-ROM	40071361178

# CGLine+ self-contained luminaire system

CGVision in the CGLine+ Web-Controller

## CGVision in the CGLine+ Web-Controller

The Web-Controller can be connected to CGVision, the powerful visualization software, to create the largest configuration level of the CGLine+ system. In this set-up, up to 32 CGLine+ Web-Controllers can be visualised at once.

Using CGVision both CGLine+ luminaire systems and other emergency lighting systems (for example ZB-S, LP-STAR, AT-S+) can be monitored with a single software. There is no difficulty in extending an existing system.

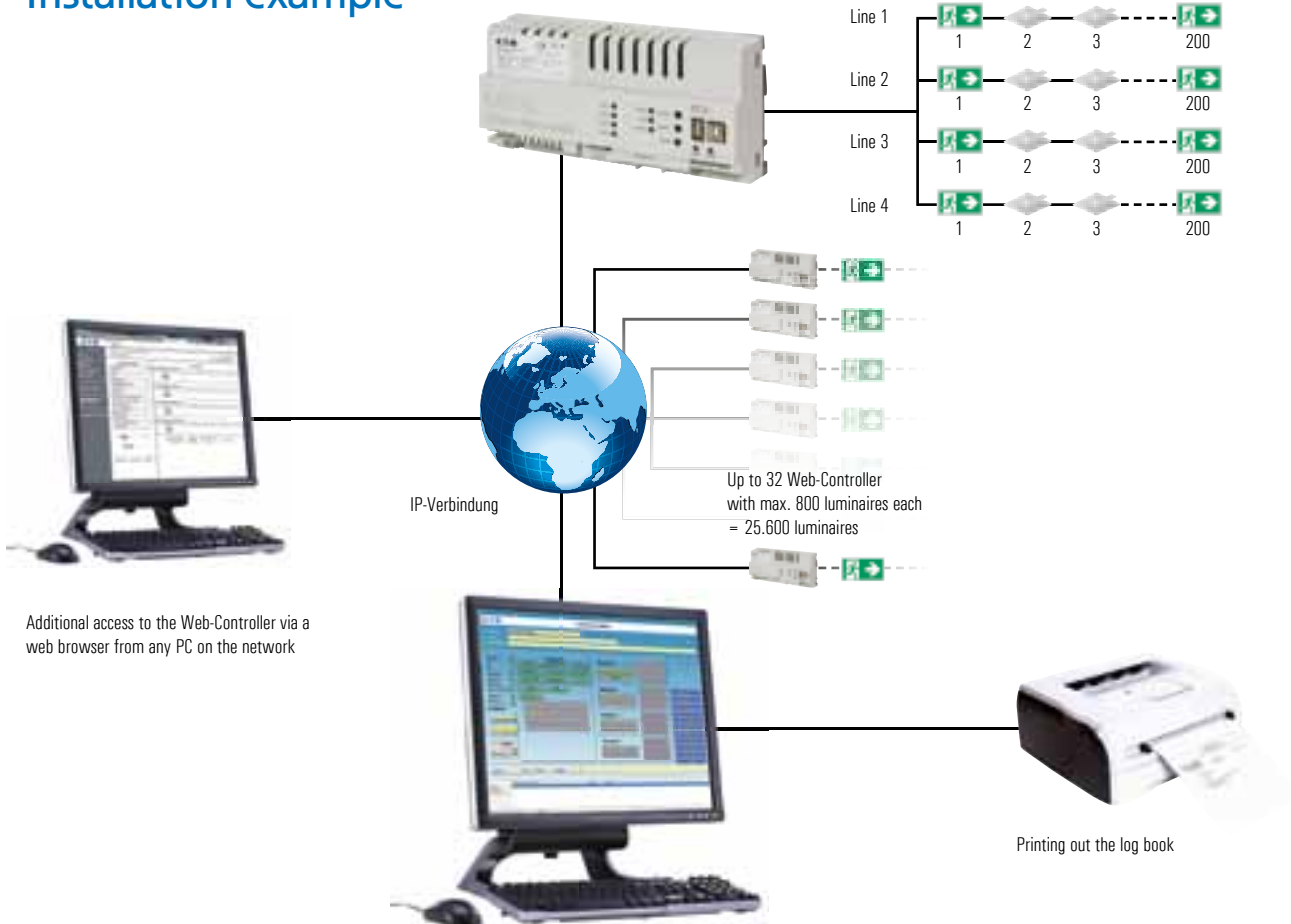

CGVision takes over all the control and test functions, and it generates a comprehensive electronic log book for all connected systems- and does so completely automatically.

In order to keep an eye on a large amount of equipment, for example at a large plant or an airport, the state of the individual emergency lighting systems can be presented on an aerial photo or a site plan. The building layout helps visualise individual luminaires.

Access of any PC via the web server of the CGLine+ Web-Controller can also be carried out if it is connected to CGVision. Thus for example, large, multi-building facilities can be configured and monitored centrally using CGVision. Additionally service technicians can have an overview of areas of interest to them using the Web-Controller.

## Installation example

CGLine+ Web-Controller with integrated memory for storing the configuration and the log book

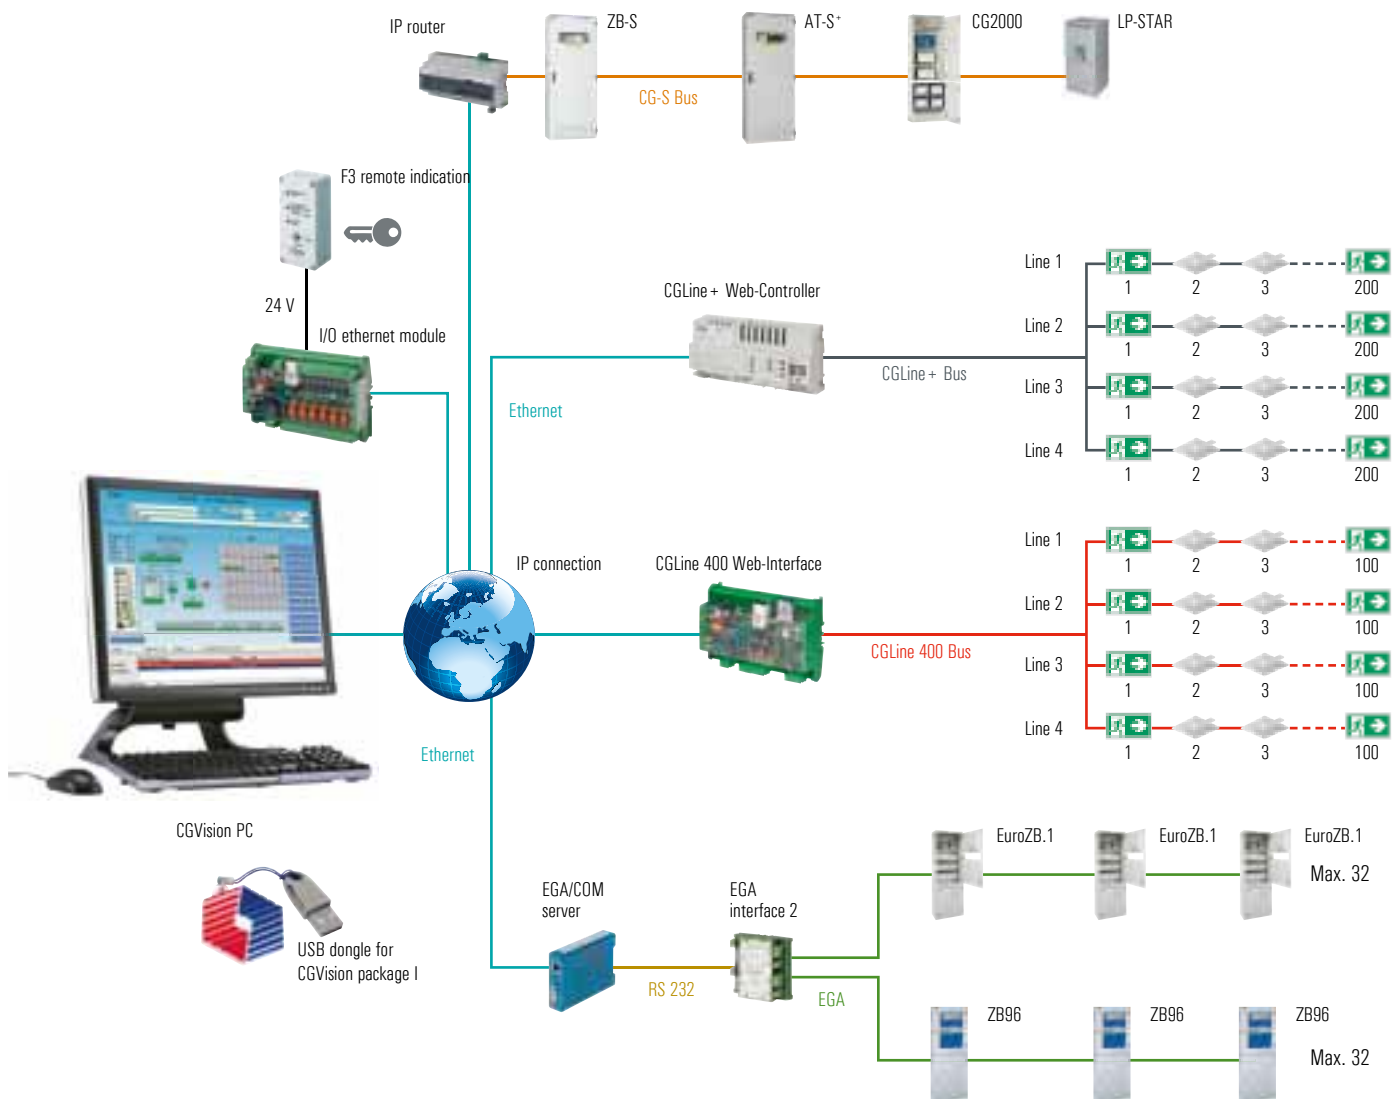

Additional access to the Web-Controller via a web browser from any PC on the network

CGVision: Configuration und complete visualization of all luminaires

# CGLine+ self-contained luminaire system

CGVision Basic Package III (with CG-S/USB interface, EGA components to be ordered separately)	40071361024
CGVision Pro Package I (including CG-S/IP interface and visualization in a building layout)	40071361021
CGVision Pro Package II (including visualization in a building layout, EGA components to be ordered separately)	40071361023
CGVision Pro Package III (including CG-S/IP-Interface and visualization in a building layout, EGA components to be ordered separately)	40071361025
PC-Anywhere remote maintenance software, 2nd licence 1 x host, 1 x remote	40071347151

For a detailed description and ordering information, see section CGVision in the emergency lighting main catalogue.

# CGLine+ self-contained luminaires

The CGLine+ self-contained luminaire series are available in the widest variety of housing shapes and protection ratings, and they offer a wide range of application options.

What all luminaires have in common is the CGLine+ functionality: In autonomous operation mode (without bus connection), the electronics fully automate the necessary function tests and duration tests. Test results are shown directly at the luminaire. CGLine+ luminaires are generally suitable for maintained and non-maintained mode.

The full potential of CGLine+ electronics is only utilised if the luminaires are connected to the controlling CGLine+ Web-Controller using the standard bus interface.

Amongst other things, this ensures decentralised monitoring of luminaires and allows the blocking of the device, for example during non-operational periods, and reduces expenditure linked with keeping the required log book by storing all results. Even a larger-scale project comprising a great number of self-contained luminaires can be operated cost-efficiently, and safety is monitored in compliance with the regulations.

In addition, optimised lighting technology ensure an economical emergency lighting system. Variations with highly-efficient LEDs bring even greater improvements. Particularly low installed loads and an LED lifetime of 50,000 hours minimise energy and maintenance costs.

## Characteristics of CGLine+ self-contained luminaires:

- Automatic function test and duration test
- All luminaires are suitable for maintained and non-maintained mode
- High-efficiency LEDs for low energy and maintenance costs
- Pictogram illumination compliant with standards
- Complies with the requirements of DIN EN 60598-2-22

## Status display with fault analysis using multi-coloured LEDs directly on the luminaire

Operation mode	LED
No failure	● green light on
Emergency mode	○ LED is off
Delay on mains return	●/● blinks green/yellow alternately at 0.5 Hz
Function test active / Duration test active	● blinks green at 1 Hz
Luminaire blocked	●/● blinks green/yellow alternately at 1 Hz

Error messages	LED
Charge fault / Function test failed / Duration test failed	● yellow light blinks slowly at 0.5 Hz
Luminaire fault	★ yellow light blinks rapidly at 2 Hz

## Definitions of product feature icons

Icon	Definition	Icon	Definition
	Viewing distance, here: 20 m		Suitable for outdoor use
	Light output, here: single-sided		According to DIN 4844
	LED light source		According to EN 1838
	Protection class 1		Suitable for use in food processing industry e.g. acc. HACCP or IFS
	Protection class 2		ENEC certified
	Degree of protection, here: IP20		With Lithium-ion battery
	Degree of mechanical impact resistance, here: IK10		With CGLine+ technology
	Luminaire with limited surface temperature

# CrystalWay CGLine+

Escape sign panel self-contained luminaires

## CrystalWay 19821, 19822 CGLine+

- LED self-contained luminaire with automatic test for reduced inspection effort
- For autonomous installation or connection to the CGLine+ monitoring system
- Perfect homogeneity and uniformity of the pictogram's illuminance
- Frameless design with pictogram integrated in acrylic glass
- Same aesthetic either in wall or ceiling mounting
- Unobtrusiveness, thin & slim electronic base (Height: only 22mm)
- 2 sizes of pictogram: for 20m and 30m viewing distance
- Brightness selectable in mains operation (eg. standard: 500Cd/m<sup>2</sup> or theater: 50Cd/m<sup>2</sup>)
- Selectable operating time (1h, 3h, 5h, 8h operation)
- Environmentally-friendly due to modern lithium ion technology
- Low operating costs via low connected load
- Minimum maintenance effort and increased safety via use of LEDs with high service life (50,000 hours)
- Optimal recognition via high luminance of white contrast colour > 500 Cd/m<sup>2</sup> according to DIN 4844-1 / ISO 3864-1 (for bright surroundings), and high uniformity Lmin/Lmax > 0.8
- Simple fault analysis and status display via bicolor LED and testing button
- Blocking function prevents unintended discharge during idle operating times (only with CGLine+ WEB-Controller)
- Configurable product for wall or ceiling mounting
- Delivered with non adhesive pictograms for most of existing configurations (single & double sided signage)
- Complete range of accessories (suspension kit, recessed bases, vertical pictograms, recessed box)

# GuideLed 10825, 10826 CGLine+

Exit sign luminaire, ceiling mounting with cable

## GuideLed 10825, 10826 CGLine+

- LED self contained luminaire with automatic test for reduced inspection effort
- Universal use for maintained and non-maintained operation and for 1 h, 3 h or 8 h operation
- For autonomous installation or connection to the CGLine+ monitoring system
- Environmentally-friendly due to modern lithium ion technology
- Low operating costs via low connected load
- Minimum maintenance effort and increased safety via use of LEDs with high service life (50,000 hours)
- Optimal recognition via high luminance of white contrast colour > 500 cd/m<sup>2</sup> according to DIN 4844-1 / ISO 3864-1 (for bright surroundings), and high uniformity  $L_{min}/L_{max} > 0.8$
- Dimmable in three steps for use in dark ambient conditions
- Simple fault analysis and status display via bicolor LED and testing button
- 1 minute switch-back delay after mains return
- Blocking function prevents unintended discharge during idle operating times (only with CGLine+ WEB-Controller)

10825 CGLine+ with LED pictogram PL/PR

Viewing distance	20 m	
Luminous flux $\Phi_E/\Phi_N$ at end of rated operating time	one sided	100 % at 1 h; 80 % at 3 h; 25 % at 8 h
	double sided	100 % at 1 h; 50 % at 3 h; 15 % at 8 h
Housing material	Polycarbonate, PMMA, sheet steel (10826)	
Housing colour	Light grey RAL 7035	
Weight	0.71 kg (10825 CGLine+) 1.24 kg (10826 CGLine+)	
Type of mounting	10825	Cable suspension (drop height max. 1.5 m); insulation class II (protective earth required)
	10826	Cable suspension (drop height max. 1.5 m); insulation class I
Terminals	Through-wiring from mains (L, L', N, PE) up to 2.5 mm <sup>2</sup> CGLine+ bus through-wiring up to 1.5 mm <sup>2</sup>	
Connection voltage	220-240 V AC, 50/60 Hz	
Power consumption mains operation (apparent power / effective power)	one sided	4.8 VA / 4.1 W
	double sided	5.6 VA / 5.1 W
Permissible ambient temperature	Maintained mode -5 °C to +30 °C Non-maintained mode 0 °C to +35 °C	
Battery	Lithium ion 3.7 V/2000 mAh with multiple protective circuit	
Light source	LED strip

## Exit Cube 33822 LED CGLine+

- Exit sign cube with LED Technology for large, wide areas, e.g. warehouses or retail areas
- LED self-contained luminaire with automatic test for reduced inspection effort
- Universal use for maintained and non-maintained operation and for 1 h, 3 h or 8 h operation
- For autonomous installation or connection to the CGLine+ monitoring system
- Robust design with impact-resistance of IK07
- Environmentally-friendly due to modern lithium ion technology
- Low operating costs via low connected load
- Minimum maintenance effort via use of LEDs with high service life (50.000 hours)
- Modular design of the polycarbonate cube enables simple and safe mounting by just sliding cube onto installed luminaire
- Easy and flexible mounting options with space to land cables- Ceiling, wall, cable and chain.
- Optimal perceptibility due to high luminance of the white contrasting colour (>500 cd/m<sup>2</sup>) acc. DIN 4844-1 / ISO 3864-1 (for bright environments) and high uniformity L<sub>min</sub>/L<sub>max</sub> > 0,4 (in mains operation)
- Simple fault analysis and status display via bicolor LED and testing button
- 1 minute switch-back delay after mains return
- Blocking function prevents unintended discharge during idle operating times (only with CGLine+ WEB-Controller)

# 71811 LED CGLine+

Exit sign luminaire

71811 LED CGLine+ with cover PR

## 71811 LED CGLine+

- Self-monitoring LED self-contained luminaire for stand-alone operation or for connection to the self-contained luminaire monitoring system CGLine+
- Enclosure made of slim aluminium profile, anodised, with mitre cut
- No tools necessary for installation of silkscreen pictograms
- Universal use for maintained and non-maintained operation and for 1 h, 3 h or 8 h operation
- Environmentally-friendly due to modern lithium ion technology
- Low operating costs via low connected load
- Minimum service requirement due to high service life of the LEDs (50,000 hours)
- Optimal recognition via high luminance of white contrast colour > 500 cd/m<sup>2</sup> according to DIN 4844-1 / ISO 3864-1 (for bright surroundings)
- Dimmable in three steps for use in dark ambient conditions
- Simple fault analysis and status display via bicolor LED and testing button
- 1 minute switch-back delay after mains return
- Blocking function prevents unintended discharge during idle operating times (only with CGLine+ WEB-Controller)

Viewing distance	32 m
Luminous flux $\Phi_E/\Phi_N$ at end of rated operating time	100 % at 1 h; 70 % at 3 h; 25 % at 8 h
Housing material	Aluminium
Housing colour	Aluminium, anodized
Weight	1.1 kg
Type of mounting	Wall mounting
Terminals	Through-wiring from mains (L, L, N, PE) up to 2.5 mm <sup>2</sup> CGLine+ bus through-wiring up to 1.5 mm <sup>2</sup>
Connection voltage	220-240 V AC, 50/60 Hz
Power consumption mains operation (apparent power/effective power)	7 VA / 6.6 W
Permissible ambient temperature	Maintained mode -5 °C to +30 °C Non-maintained mode 0 °C to +35 °C
Battery	Lithium-Ion 3.7 V/4000 mAh with multiple protective circuit
Light source	3 x HighPower LEDs

### 71821 LED CGLine+

- Self-monitoring LED self-contained luminaire for stand-alone operation or for connection to the self-contained luminaire monitoring system CGLine+
- Enclosure made of slim aluminium profile, anodised, with mitre cut
- No tools necessary for installation of silkscreen pictograms
- Universal use for maintained and non-maintained operation and for 1 h, 3 h or 8 h operation
- Environmentally-friendly due to modern lithium ion technology
- Low operating costs via low connected load
- Minimum service requirement due to high service life of the LEDs (50,000 hours)
- Optimal recognition via high luminance of white contrast colour > 500 cd/m<sup>2</sup> according to DIN 4844-1 / ISO 3864-1 (for bright surroundings)
- Dimmable in three steps for use in dark ambient conditions
- Simple fault analysis and status display via bicolor LED and testing button
- 1 minute switch-back delay after mains return
- Blocking function prevents unintended discharge during idle operating times (only with CGLine+ WEB-Controller)

71821 CGLine+ WM with cover PR

71821 CGLine+ WM

71821 CGLine+ PM

71821 CGLine+ DM

Viewing distance	32 m
Luminous flux $\Phi_E/\Phi_N$ at end of rated operating time	87 % at 1 h; 45 % at 3 h; 15 % at 8 h
Housing material	Aluminium
Housing colour	Aluminium, anodized
Weight	1.7 kg
Type of mounting	Ceiling, pendant, chain or wall bracket mounting
Terminals	Through-wiring from mains (L, L', N, PE) up to 2.5 mm <sup>2</sup> CGLine+ bus through-wiring up to 1.5 mm <sup>2</sup>
Connection voltage	220-240 V AC, 50/60 Hz
Power consumption mains operation (apparent power/effective power)	8.8 VA / 8.3 W
Permissible ambient temperature	Maintained mode -5 °C to +30 °C Non-maintained mode 0 °C to +35 °C
Battery	Lithium-Ion 3.7 V/4000 mAh with multiple protective circuit
Light source	4 x HighPower LEDs

# Atlantic LED CGLine+

Exit sign luminaire, wall or ceiling mounting

## Atlantic LED CGLine+

- LED self-contained luminaire with high protection class (IP65) for indoor and outdoor use
- With automatic test for reduced inspection effort
- Universal use for maintained and non-maintained operation and for 1 h, 3 h or 8 h operation
- For autonomous installation or connection to the CGLine+ monitoring system
- Robust construction from aluminium diecast and high impact resistant cover made of polycarbonate
- Acc. IFS suitable for use in food processing industry
- Suitable for operational areas with fire hazard (D mark)
- Environmentally-friendly due to modern lithium ion technology
- Optional with self-regulating battery heater for use at low temperature up to -20°C
- Low operating costs via low connected load
- Minimum maintenance effort via use of LEDs with high service life (50.000 hours)
- Simple fault analysis and status display via bicolor LED and testing button
- 1 minute switch-back delay after mains return
- Blocking function prevents unintended discharge during idle operating times (only with CGLine+ WEB-Controller)

## Planète 45 Tube ADR CGLine+

- LED self contained luminaire with automatic test for reduced inspection effort
- For autonomous installation or connection to the CGLine+ monitoring system
- Simple fault analysis via bicolour LED
- Environmentally-friendly, zero relamping, high energy performance, 10 years battery life time
- Diam. 100 mm- Same aesthetic for exit sign and anti-panic products
- Pure design- no technical details visible
- Opaque back face : invisible electronics and connections
- LEDs' strip for a reduced dazzle
- Quick installation
- Necklaces perforated for a fast tightening
- 360° orientation
- Screw less connectors
- Metal cable gland included
- Pictograms included
- Compliant with EN 1838 / EN 60598-2-22 / EN 62034

Planète 45 Tube ADR CGLine+

Viewing distance	20 m
Luminous flux	45 lm in emergency mode, 3 lm in mains mode

# GuideLed SL 13811, 13821 CGLine+

Safety luminaire, ceiling recessed mounting

## GuideLed SL 13811, 13821 CGLine+

- LED self contained luminaire with automatic test for reduced inspection effort
- Universal use for maintained and non-maintained operation and for 1 h, 3 h or 8 h operation
- For autonomous installation or connection to the CGLine+ monitoring system
- Environmentally-friendly due to modern lithium ion technology
- Low operating costs via low connected load
- Minimum maintenance effort via high LED service life (50,000 hours)
- Available with special optics for escape route illumination or open-area illumination
- High spacing via double optics technology and highly efficient High Power LEDs
- Simple fault analysis and status display via bicolor LED and testing button
- 1 minute switch-back delay after mains return
- Blocking function prevents unintended discharge during idle operating times (only with CGLine+ WEB-Controller)

13811 CGLine+ with asymmetric optics

13821 CGLine+ with symmetric optics

Required height in cavity ceiling for recessing through ceiling cut-out: 150 mm

Luminous flux (mains operation)	asymmetric optics symmetric optics	210 lm 204 lm
Luminous flux $\Phi_E/\Phi_N$ at end of rated operating time		100 % at 1 h; 65 % at 3 h; 25 % at 8 h

# GuideLed SL 13851, 13852 CGLine+

Ceiling recessing, ceiling surface-mounting for illuminance of 5 lx vertically

## Requirements of EN 1838: illuminance of 5 lx for safety equipment

The aim of emergency lighting is to enable people to exit a room or building safely. It must also ensure that fire fighting and safety equipment can be easily found and operated when needed. This equipment includes (but not exclusively):

- First aid stations
- All fire fighting equipment and all alarm devices

Lighting is required near each first aid kit, near each alarm and piece of fire fighting equipment, as well as each sign indicating a fire alarm system. In accordance with EN 1838, „near“ generally means a distance of no greater than 2 metres, measured horizontally (this corresponds with Distance  $a$  in the diagram below).

The required level of illuminance on the equipment is 5 lx measured vertically- i.e. perpendicular to the usual horizontal illuminance measurements on one level.

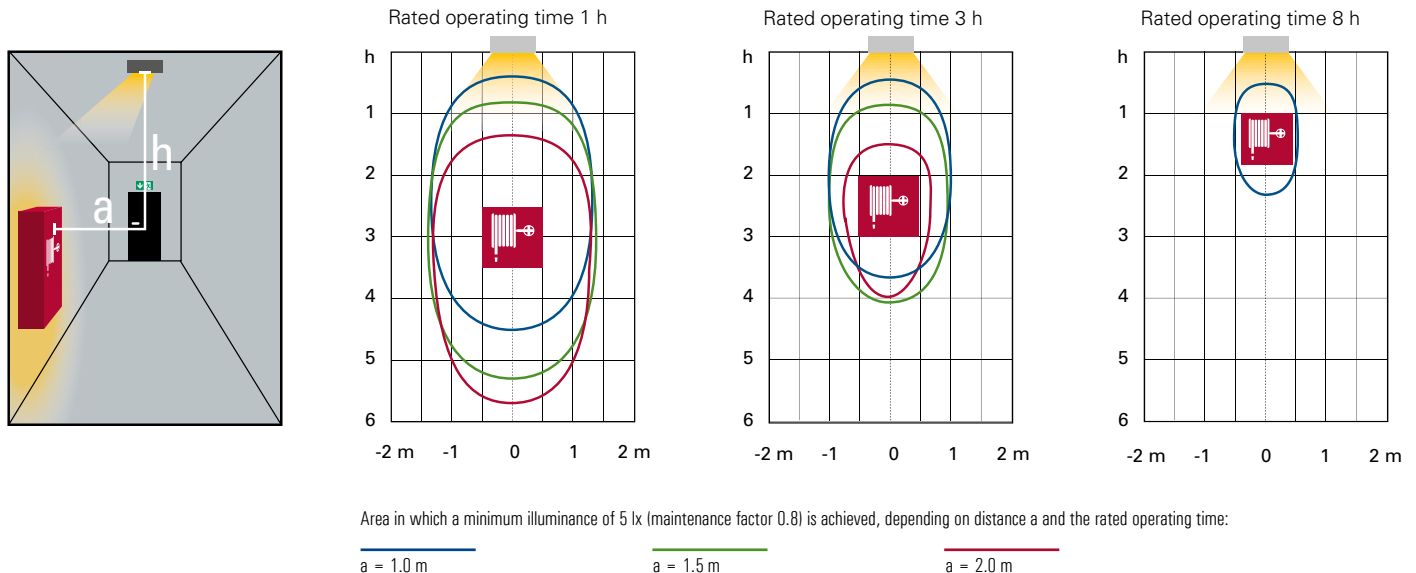

In comparison to the escape route requirement for 1 lx horizontally, different requirements apply in this situation for the light distribution from the safety luminaires, due to the flatter light angle of incidence.

### GuideLed SL 13851 and 13852 CGLine+ meet the specific requirements of EN 1838

In order to meet the requirements of EN 1838, the new GuideLed SL 13851 and 13852 CGLine+ have special optics to guarantee the required illuminance of 5 lx vertically over a wide area. Hence mounting at heights of up to 5.6 m, and a breadth of illumination of up to 2.8 metres, are possible.

### Engineering help, GuideLed SL 13851 and 13852 CGLine+

# GuideLed SL 13851, 13852 CGLine+

- Environmentally-friendly due to modern lithium ion technology
- Low operating costs via low connected load
- Minimum maintenance effort via high LED service life (50,000 hours)
- Special asymmetric optics for illumination of 5 lx vertically for first aid stations, fire fighting equipment and safety equipment acc. to EN 1838
- Simple fault analysis and status display via bicolor LED and testing button
- 1 minute switch-back delay after mains return
- Blocking function prevents unintended discharge during idle operating times (only with CGLine+ WEB-Controller)

GuideLed SL 13851 CGLine+

GuideLed SL 13852 CGLine+

Light distribution curve

GuideLed SL 13851, 13852 CGLine+

Luminous flux $\Phi_N$ (mains operation)	310 lm
Luminous flux $\Phi_E/\Phi_N$ at end of rated operating time	100 % at 1 h; 65 % at 3 h; 25 % at 8 h
Housing material	Polycarbonate, aluminium
Housing colour	White, similar to RAL 9010
Weight	0.62 kg (13851 CGLine+) 0.86 kg (13852 CGLine+)
Type of mounting	Ceiling recessing, ceiling surface-mounting
Terminals	Through-wiring from mains (L, L', N, PE) up to 2.5 mm <sup>2</sup> CGLine+ bus through-wiring up to 1.5 mm <sup>2</sup>
Connection voltage	220-240 V AC, 50/60 Hz
Power consumption mains operation (apparent power/effective power)	6.9 VA / 6.7 W
Permissible ambient temperature	Maintained mode -5 °C bis +30 °C Non-maintained mode 0 °C bis +35 °C
Battery	Lithium-Ion 3.7 V/4000 mAh with multiple protective circuit
Light source	HighPower LEDs 2 x 1.6 W

# 3583 LED CGLine+

Safety luminaire, ceiling recessed mounting

3583 LED CGLine+

Dimensions in mm

## 3583 1-8h/D LED CGLine+

- Self-contained safety luminaire with LED technology for recessed mounting with round bezel with automatic test for reduced inspection effort
- Universal use for maintained and non-maintained operation and for 1 h, 3 h or 8 h operation
- For autonomous installation or connection to the CGLine+ monitoring system
- Environmentally-friendly due to modern lithium ion technology
- Low operating costs via low connected load
- Minimum maintenance effort via high LED service life (50,000 hours)
- Simple fault analysis and status display via bicolor LED and testing button
- 1 minute switch-back delay after mains return
- Blocking function prevents unintended discharge during idle operating times (only with CGLine+ WEB-Controller)
- Common ceiling cut-out diameter of 68 mm

Luminous flux $\Phi_N$	385 lm
Luminous flux $\Phi_E/\Phi_N$ at the end of rated operating time	100 % at 1 h; 70 % at 3 h; 25 % at 8 h
Housing material	Bezel: sheet steel Module: Polycarbonate
Housing colour	white sim. RAL 9010
Weight	Luminaire: 0.16 kg Module: 0.35 kg
Type of mounting	Recessed ceiling mounting
Connection terminals	Through-wiring from mains (L, L', N, PE) up to 2.5 mm <sup>2</sup> CGLine+ bus through-wiring up to 1.5 mm <sup>2</sup>
Connection voltage	220-240 V AC, 50/60 Hz
Power consumption mains operation (apparent power / effective power)	7 VA / 6.6 W
Permissible temperature range	Maintained mode -5 °C to +30 °C Non-maintained mode 0 °C to +35 °C
Battery	Lithium-Ionen 3.7 V / 4000 mAh with multiple protective circuit
Light source	HighPower LEDs 3 x 1 W

## Ordering details

### Scope of delivery

3583 1-8h/D LED CGLine+ recessed ceiling-mounted with 3 LEDs for escape route illumination, clamping range for ceiling thickness 0- 20 mm, white RAL 9010, supply electronics in housing with cable strain-relief

### Order No.

## Atlantic LED / Outdoor Wall CGLine+

- LED self-contained luminaire with high protection class (IP65) for indoor and outdoor use
- With automatic test for reduced inspection effort
- Universal use for maintained and non-maintained operation and for 1 h, 3 h or 8 h operation
- For autonomous installation or connection to the CGLine+ monitoring system
- Robust construction from aluminium diecast and high impact resistant cover made of polycarbonate
- Acc. IFS suitable for use in food processing industry (Atlantic LED R and Atlantic LED O)
- Suitable for operational areas with fire hazard (D mark)
- Environmentally-friendly due to modern lithium ion technology
- Optional with self-regulating battery heater for use at low temperature up to -20°C
- Low operating costs via low connected load
- Minimum maintenance effort via use of LEDs with high service life (50,000 hours)
- Available with special optics for escape route illumination or wide area illumination
- High spacing by double optics technology and highly efficient HighPower LEDs
- Simple fault analysis and status display via bicolor LED and testing button
- 1 minute switch-back delay after mains return
- Blocking function prevents unintended discharge during idle operating times (only with CGLine+ WEB-Controller)

# NexiTech LED™ CGLine+

Safety luminaire

## NexiTech LED™ CGLine+

- Universal solution for safety lighting and exit sign with single and double side diffuser
- Complete range of accessories for different installation (wall, ceiling, surface, recessed)
- ENEC certification for peace of mind
- Available with different light output: 150, 300 and 400lm, 1,5 and 3h duration
- "Cinema" function for maintained operation in dark environments (from 60 to 16lm in M mode)
- Maintained mode switch ON/OFF from CGLine+ panel and local via L-L' bridge
- Automatic function and duration test according to EN62034 with and without CGLine+ panel
- Available with IP40 and new IP65 variants
- Low maintenance costs thanks to 50.000 hours lifetime of LED light source
- Inhibition (block) function and rest mode from CGLine+ panel

# Planète 400 Disc ADR CGLine+

Safety luminaire

## Planète 400 Disc ADR CGLine+

- LED self contained luminaire with automatic test for reduced inspection effort
- For autonomous installation or connection to the CGLine+ monitoring system
- Simple fault analysis via bicolour LED
- Zero relamping, high energy performance, 10 years battery life time
- Design and Aesthetic
- Discreet and unobtrusive
- Fits into the all-round light-theme concept
- Share the same standard diameter as most popular downlights
- Mains mode LED lighting very soft with minimal glare / dazzle used on Planete 400 Tube
- Homogeneous illumination for optimal visual comfort
- Ultra slim housing (25mm – Ø 190mm)
- 100% LED, zero relamping, high energy performance, 10 years battery life
- See-through honeycomb bracket for a genuine universal fixture with instinctive re-use of existing drill-holes
- Screwless terminal blocks with automatic connectors
- White recessed mounting option (other colours on demand)
- Compliant with EN 60598-2-22 / EN 62034

Planète 400 Disc ADR CGLine+

Luminous flux	360 lm in emergency mode, 3 lm in mains mode
Luminous flux $\Phi_E/\Phi_N$ At end of rated operating time	100% at 1h
Housing material	Polycarbonate
Housing colour	RAL9003
Weight	0.7 kg
Type of mounting	Ceiling-surface mounting Insulation Class II Recessed base in option
Terminals	Up to 2,5mm <sup>2</sup>
Connection voltage	220V/240 VAC 50/60Hz
Power consumption mains operation	1,5W
Battery	Ni-Cd- 10 x 1,2 V / 0,6 Ah
Light source	LEDs

## Planète 45 Tube ADR CGLine+

- LED self contained luminaire with automatic test for reduced inspection effort
- For autonomous installation or connection to the CGLine+ monitoring system
- Simple fault analysis via bicolour LED
- Environmentally-friendly, zero relamping, high energy performance, 10 years battery life time
- Diam.100 mm- Same aesthetic for exit sign and anti-panic products
- Pure design- no technical details visible
- Opaque back face : invisible electronics and connections
- LEDs' strip for a reduced dazzle
- Quick installation
- Necklaces perforated for a fast tightening
- 360° orientation
- Screw less connectors
- Metal cable gland included
- Compliant with EN 60598-2-22 / EN 62034

Planète 45 Tube ADR CGLine+

Luminous flux	350 lm in emergency mode, 3 lm in mains mode
Luminous flux $\Phi_E/\Phi_N$ At end of rated operating time	100% at 1h

Beam LED

## Planète 2000 ADR CGLine+

- LED self contained luminaire with automatic test for reduced inspection effort
- For autonomous installation or connection to the CGLine+ monitoring system
- Environmentally-friendly, zero relamping, high energy performance, 10 years battery life time
- Intense light beam (built-in diffuser)
- Oversized status LEDs for a better visibility
- Lock-hole fixation and low weight (4,5 kg) for easier installation
- IP42 and IP65 (one cable gland included) versions
- Recessed mounting base option
- Multi-directional position mounting
- Designed with matching detachable enclosure
- Compliant with EN 60598-2-22 / EN 62034

Planète 2000 ADR CGLine+

Luminous flux	2000 lm in emergency mode, 3 lm in mains mode (charging lamp) / do we specify as a pure NM product
Luminous flux $\Phi_E/\Phi_N$ At end of rated operating time	100% at 1h
Housing material	Polycarbonate
Housing colour	Pale grey RAL7035
Weight	4,5 kg
Type of mounting	Wall-surface mounting Insulation Class II Recessed base as an option
Terminals	Through-wiring up to 2,5mm <sup>2</sup>
Connection voltage	220V/240 VAC 50/60Hz
Power consumption mains operation	4,5W
Battery	Ni-Cd- 5 x 1,2 V / 1,5 Ah
Light source	LED strip

## Ordering details

Type	Order No.
Planète 2000 ADR CGLine+ (IP42)	LUM17110
Planète 2000 ES ADR CGLine+ (IP65)	LUM17111

## Accessories

Type	Order No.
Protection Grid	LUM10527
Recessed base	LUM10524

Planète 400 AD ADR CGLine+

## Planète 400 AD ADR CGLine+

- LED self contained luminaire with automatic test for reduced inspection effort
- For autonomous installation or connection to the CGLine+ monitoring system
- Simple fault analysis via bicolour LED
- Zero relamping, high energy performance, 10 years battery life time
- Explosion-proof: Zones 1-2-21-22 Gas and Dust
- Marking:  
Ex II 2G- EExdIICT6  
Ex II 2D- T85°C
- Delivered with explosion-proof cable gland
- Aluminum enclosure
- Supplied with fixation spacers
- Delivered with cable gland for unarmoured cable (outer Ø10 to 14mm)
- Designed with matching detachable enclosure
- Zone disconnect sockets sold separately
- Exit legends as options
- Compliant with EN 60598-2-22 / EN 62034

Luminous flux	360 lm in emergency mode, 3 lm in mains mode
Luminous flux $\Phi_E/\Phi_N$ At end of rated operating time	100% at 1h
Housing material	Aluminum enclosure
Weight	5 kg
Type of mounting	Wall-surface mounting Insulation Class II
Terminals	Up to 2,5mm <sup>2</sup>
Connection voltage	220V/240 VAC 50/60Hz
Power consumption mains operation	1,1 W
Battery	Ni-Cd- 5 x 1,2 V / 1,5 Ah
Light source	LED strip

## Ordering details

Type	Order No.
Planète 400 AD ADR CGLine+	LUM17141

## Accessories

Type	Order No.
Pictogram Arrow Down	LUM10401
Pictogram Arrow Right	LUM10403
Pictogram Arrow Left	LUM10404
5 poles plug	GHG5117506R0001
Wall socket	GHG5114506R0001

## Beamlite

- BSI kitemarked for peace of mind
- High light output
- Robust construction with a long durable life
- Hinged front access door eases maintenance
- Multi-directional lamp heads for on site flexibility
- Weatherproof IP55 option

Beamlite

Options	L (mm)	W (mm)	D (mm)
Standard	325	370	82
Weatherproof	300	565	180

Viewing distance	N/A
Luminous flux $\Phi_E/\Phi_N$ at end of rated operating time	137 per head 21 watt 275 per head 55 watt
Housing material	Body- Steel, Lamp Heads- Polycarbonate or Steel
Housing colour	White/Black finish
Weight	14.4Kg Max
Type of mounting	Surface mounting
Terminals	
Connection voltage	240V
Power consumption mains operation (apparent power / effective power)	
Permissible ambient temperature	5 degrees to 25 degrees C
Battery	Lead Acid
Light source	12V, 21W tungsten- BA15d cap, 12V, 55W tungsten halogen H3- PK22s cap

## Catalogue Numbers

System Mode	Duration	Lamp Rating	Cat No	Weight (kg)
<b>Standard IP20 housing</b>				
Non-Maintained	3 Hour	2 x 21W	BEN3CGL	8.7
Non-Maintained	1 Hour	2 x 55W	BEN1HCGL	11.3
<b>Weatherproof IP55 Housing</b>				
Non-Maintained	3 Hour	2 x 21W	BEN3CGLW	14.4

# Beamlite

Mounting Height - H(m)	Aiming Angle - Ø	Spacing Luminaire to Wall - D1(m)	Spacing between Luminaires - D2(m)
2 x 55W			
20	7°	4.8	10.2
25	6°	5.2	11.1
30	5°	5.4	11.7
35	5°	6.1	13
40	5°	6.7	14.3
45	4°	6.8	14.4
50	4°	7.1	15.2
2 x 21W			
4	35°	4.3	9.3
6	15°	3.1	8
8	12°	3.4	7.3
10	11°	3.7	8.1
15	8°	3.5	8.9

### Notes:

1. Spacing achieves 1 lux min on centre line of escape route
2. Aiming angle at 4m height restricted by glare cut-off restriction
3. K factor of 0.55 and S factor of 0.8 have been applied
4. 2 x 55W spacing distances for mounting heights below 10m are same as for 2 x 21W unit

Eaton is dedicated to ensuring that reliable, efficient and safe power is available when it's needed most. With unparalleled knowledge of electrical power management across industries, experts at Eaton deliver customized, integrated solutions to solve our customers' most critical challenges.

Our focus is on delivering the right solution for the application. But, decision makers demand more than just innovative products. They turn to Eaton for an unwavering commitment to personal support that makes customer success a top priority. For more information, visit [www.eaton.com/electrical](http://www.eaton.com/electrical).
