

### Free printing service

Eaton is collaborating with an existing trusted printing partner to provide a free of charge printing service for customer specific logos to be applied to the new SDR range of external sounders.

### Process for installers

#### 1. Set-up process

##### • Supply Artwork

Send your company name, website address, contact details of your preferred distribution branch(es) and a copy of your company logo to: [securitysales@eaton.com](mailto:securitysales@eaton.com)

Preferable file types are Adobe illustrator .ai or .eps files, but all formats are accepted. Please note that logos containing more than three colours may be subject to a surcharge.

If future logo changes are required, repeated set-up process and a set-up cost is applicable.

##### • Artwork Approval

You will receive colour proofs of your logo by email for your approval. Confirmation and/or amendment requirements can be submitted by fax **01594 545455** or email [securitysales@eaton.com](mailto:securitysales@eaton.com)

Once artwork has been approved, the details will be sent to your preferred distributor(s) and you will be able to place your first order from them.

#### 2. For routine follow up orders

Order your printed covers from your usual distribution branch using the part number SDR-CV followed by the Drawing number.

One cover fits all versions of Eaton's SDR external sounders.

#### 3. Delivery 10 days

Your goods will be in branch within 10 working days.

Service offered on only SDR-CV, no other Eaton products.
