Eaton SecureConnect™ end-user app

Eaton SecureConnect™ is a smart intruder solution offering property owners 24/7 control over their security system from anywhere in the world through a user-friendly mobile app available for iOS and Android operating systems.

At a glance:

- Real-time push notifications of system activity are sent directly to the end-users smart device alerting them to events whether home or away.

- Allows users to set or unset their system remotely and receive visual verification of events instantly.

- Eaton's securely encrypted app is equipped with facial and fingerprint recognition and has been rigorously tested and approved by Eaton's Cyber-Security Centre of Excellence.

- Available on Eaton's second generation Scantronic i-on burglar alarm panels - i-on Compact, i-on30R, i-on40H, i-onG2SM, i-onG3MM and i-onG3LM

- Users can set the system with their voice thanks to integration with Google Home and Alexa

- The security alarm panels that connect to SecureConnect are the first in the market to be third party accredited to UL:2900-2-3 level 3 for cybersecurity
