

## 701/ 702 pendant transmitters

### On your side when you need help most

Hopefully, you'll never need to find out why our pendant transmitters are so highly regarded. But should you ever be attacked, you'll quickly realise why over 750,000 people worldwide trust them with their lives.

Both the 701 & 702 models use our tried and tested 868 MHz narrow-band radio signal for secure, reliable operation. And to ensure your transmitter is always working, the lithium battery sends a signal when less than one month's operation remains. Moreover, the wide variety of wearing options – including neck pendant, hand-held, brooch and watch strap – means there's a style to suit everyone.

With many other state-of-the-art features (see overleaf), no other range of personal attack transmitters is better equipped to get the help you need when you need it most.

### At a glance...

- Reliable, secure Scantronic 868 MHz narrow-band radio operation
- Suitable for use as panic alarms and social alarm triggers
- Two models cater for all applications
- A range of fixings enable the units to be carried or worn on the person
- Soldered-in lithium battery-powered to ensure operation even if dropped
