## B-Line series cable tray slotted marine rungs Increase design and installation flexibility

- Accommodates cable cleats, cable clamps, and stainless steel banding allowing for cable containment and segmentation
- Easy connection of strut accessories to equipment cable tray system accessories
- Alternating strut orientation allows the bottom of cable tray to be used as a pathway for conduit, thus helping minimize the number of required supports and space
- Wider rung design results in lower cable strain
- Rung styles available across the full NEMA Aluminum and Steel B-Line series cable tray portfolio
- Rungs support 200 lb. concentrated load above and beyond the published catalog load

Series 1 Steel Cable Tray

Series 2, 3, 4 and 5  
Aluminum Cable tray

Series 2, 3, 4 and 5  
Steel Cable Tray

## B-Line series cable containment accessories

### Restrain, optimize and segment cables to enhance safety

Cable Cleats

#### 1 Cable Cleats

- Restrain cables in installations where the highest levels of short circuits withstand are required
- Short circuit tested in accordance with BS EN 50368:2003 standard
- Available for single and trefoil cable applications
- LSF-pad is integral low smoke, low fume, zero halogen pad
- Hardware to attach cleat to rung included

Conduit Clamp

#### 2 Conduit Cable Clamp

- Optimize space and supports required by attaching conduit directly to the bottom of the tray
- Easily attaches to cable tray rungs to secure cables
- One-piece assembled product, installs easily and removes without disconnecting adjacent clamps
- Helps secure cables easily with protective saddle, which helps prevent damage to conduit or cable
- Clamp works on equal trade sizes for both EMT and rigid conduit
- Available in pre-galvanized and stainless steel 316
- UL Listed in US and Canada

Stainless Steel Banding

#### 3 Stainless Steel Banding

- Segment cables no matter the cable tray orientation
- Meets U.S. Coast Guard requirement
- Available in stainless steel 316
