

OSHPD OPM-0052-13 for Seismic Bracing of Mechanical, Electrical, Plumbing and Fire Sprinkler Systems

Eaton has OSHPD Preapproval for California Building Code (CBC) 2013 and CBC 2016. Visit Eaton.com/b-lineseries for more information.

- Reduce your project review time by OSHPD and DSA with Eaton's preapproved OPM for health facility and education construction projects
- Multiple solutions for attachment of seismic bracing to single hung pipe, with Eaton's B-Line series hangers
- Various solutions for attachment of seismic bracing to B-Line series strut trapeze supported pipe, duct and cable tray
- Multiple options for concrete attachment, including poured in place and post installed anchors
- Extensive breadth of product solutions, including B-Line series strut and pipe hangers, and TOLCO™ brand seismic bracing products
- Multiple options for structural attachments to steel I-beam, bar joist, wood and concrete with TOLCO seismic bracing attachments, and pre-engineered solutions

Rely on Eaton

- Global seismic engineering support for project estimates, layout and design of seismic bracing systems, including SE or PE wet stamp
- OSHPD pre-approved, UL Listed and FM Approved hangers, strut and seismic bracing products
- Over 60 years of manufacturing and engineered solutions for electrical, mechanical and fire protection industries
