

Visual T&D™

General

Eaton's Cooper Power series Yukon® Visual T&D™ is a smart monitoring and control alternative to traditional SCADA. Many utility customers want the benefits of a SCADA system, but do not have the resources to implement a complicated project or to staff a 24/7 control room. Visual T&D provides a scalable, pre-configured, easy-to-use alternative.

Visual T&D is an application that continuously monitors substation and distribution equipment operation and performance. It provides all of the information regularly provided by traditional SCADA systems in a way that is less complex and simpler to implement and use. The system collects a long-term, detailed operational history that allows utilities to understand their system operation and to plan maintenance and capital expenditure programs more efficiently.

(Shown at top is the Visual T&D DFR view and bottom is a single-line diagram for Form 6 recloser control.)

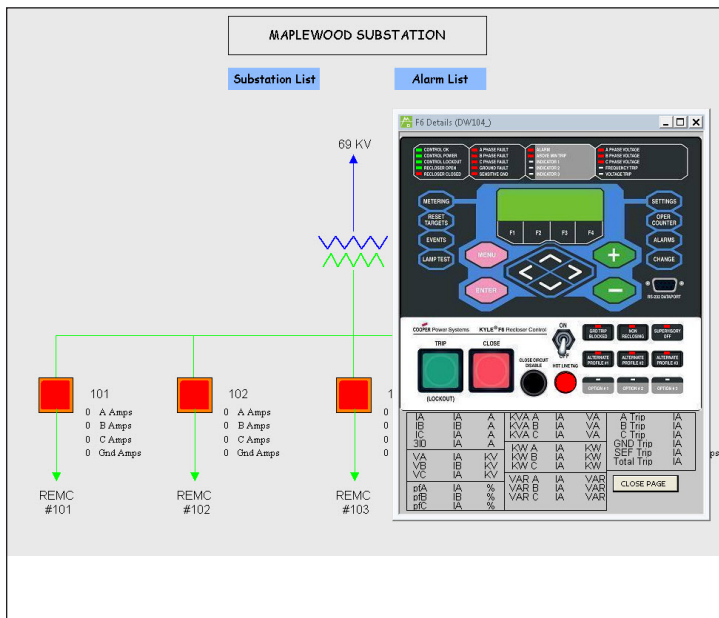

Table 1. Yukon Visual T&D Ordering Information

Part Number	Description
Visual T&D HMI/SCADA	
P-PVTD-0101-00	Visual T&D 1500 Point System Real-Time Client-Server HMI/SCADA System Includes server program, Explorer and Diagram Editor client programs, Internal PostgreSQL 9.2 for DataLog. Supports SMP™ Gateway and OPC data sources. Includes server license and one client license. Supports up to 1,500 I/O points
P-PVTD-0404-00	Visual T&D 3,000 Point System Real-Time Client-Server HMI/SCADA System Includes server program, Explorer and Diagram Editor client programs, Internal PostgreSQL 9.2 for DataLog. Supports SMP Gateway and OPC data sources. Includes server license and one client license. Supports up to 3,000 I/O points
P-PVTD-0405-00	Visual T&D 5,000 Point System Real-Time Client-Server HMI/SCADA System Includes server program, Explorer and Diagram Editor client programs, Internal PostgreSQL 9.2 for DataLog. Supports SMP Gateway and OPC data sources. Includes server license and one client license. Supports up to 5,000 I/O points
P-PVTD-0406-00	Visual T&D 10,000 Point System Real-Time Client-Server HMI/SCADA System Includes server program, Explorer and Diagram Editor client programs, Internal PostgreSQL 9.2 for DataLog. Supports SMP Gateway and OPC data sources. Includes server license and one client license. Supports up to 10,000 I/O points.
P-PVTD-0407-00	Visual T&D 15,000 Point System Real-Time Client-Server HMI/SCADA System Includes server program, Explorer and Diagram Editor client programs, Internal PostgreSQL 9.2 for DataLog. Supports SMP Gateway and OPC data sources. Includes server license and one user license. Supports up to 15,000 I/O points.
P-PVTD-0408-00	Visual T&D 20,000 Point System Real-Time Client-Server HMI/SCADA System Includes server program, Explorer and Diagram Editor client programs, Internal PostgreSQL 9.2 for DataLog. Supports SMP Gateway and OPC data sources. Includes server license and one user license. Supports up to 20,000 I/O points.
P-PVTD-0413-00	Visual T&D 100,000 Point System Real-Time Client-Server HMI/SCADA System Includes server program, Explorer and Diagram Editor client programs, Internal PostgreSQL 9.2 for DataLog. Supports SMP Gateway and OPC data sources. Includes server license and one user license. Supports up to 100,000 I/O points.
P-PVTD-0409-00	Visual T&D additional 5,000 points Adds 5,000 points to Visual T&D capability. Available only for systems with 10,000 points and more.
P-PVTD-0412-00	Visual T&D additional 5,000 points Adds 5,000 points to Visual T&D capability. Available only for systems with 10,000 points and more.
Visual T&D Communication Server	
P-PVTD-0301-00	Visual T&D Communication Server Allows Visual T&D to directly communicate with devices using TCP/IP or serial ports. Supports a maximum of 16 devices. Includes one master protocol license.
P-SSMP-5201-00	Additional Connectivity Option Adds to the SMP 16/CP and Communication Server the capability to connect to a maximum of 128 devices. Adds to the SMP 16/CP the capability to connect to a maximum of 64 control centers.

Table 1. Yukon Visual T&D Ordering Information (continued)

Part Number	Description
Visual T&D Options	
P-PVTD-0201-00	Visual T&D Client License Allows an additional user to access the Visual T&D system. Per user.
P-PVTD-0401-00	Visual T&D Redundancy Support Provides the capability to group two Visual T&D servers in a redundant configuration. The standby server automatically takes over if the main server fails. Requires 2 Windows® 2003 or 2008 Servers in a cluster setup. Add 50% to price of total system configuration. Maintenance plan is required for redundant systems.
P-PVTD-0410-00	Visual T&D Alarm Notification Adds the capability to notify users of alarm conditions by email or SMS.
P-PVTD-0411-00	Visual T&D Event File Processing Adds the capability to retrieve and display event files. Retrieve event files from selected relays using the SMP Gateway, convert files to COMTRADE format, and provide basic display functions.
P-PVTD-0414-00	Visual T&D MS SQL Server Supports connection to external MS SQL Server 2008 and 2012
Visual T&D Warranty and Maintenance Options (mandatory)	
P-TMNT-0201-00	Visual T&D Maintenance Plan - 24/7 Emergency Support Line, - 4 hours of coaching, - 8 hours of investigation and troubleshooting. Mandatory for first 3 years. Optional from Year 4 and on. Annual fee of 18% of the total value of the VT&D system. Traveling cost not included if required.
P-TENG-0301-00	Standard Engineering Rate Hourly Engineering rate (can be on site) to assist you in the design or the implementation of your automation project. Does not include traveling expenses.
