

AS85049/88/89/90 SERIES

**SOURIAU
SUNBANK**

EMI/RFI Composite Backshells
MIL-DTL Specification

Esterline
Connection Technologies

Features & Benefits

QPL

AS85049, D38999 & MS Qualified

SUNBANK offers a wide range of qualified products for your wiring assembly: backshells, caps & accessories.

HIGH RELIA- BILITY

Self-Locking

SUNBANK has developed 2 self-locking mechanisms to withstand high vibrations. Non self-locking option is also available for mild environments.

LIGHT- WEIGHT

High end Materials

Aerospace grade aluminum and composite materials are used to manufacture our products.

ENVIRON- MENTAL

Plating Compliance

Products are available in several surface finishes compliant with applicable environmental regulations.

EMI/ RFI

Signal Integrity

Many designs are available to facilitate shield attachment. Corrosion resistance and continuity are ensured by the material/plating combination.

Typical applications

Aviation

Ground Transportation

Industry

Military Aircraft

Ground Army

Military Marine

Description

- Self locking detent coupling
- Shrink boot groove
- Aluminum version also available

Technical features

Mechanical

- **Material:** PEI Aerospace grade
- **Plating:**
 - Cadmium (AS85049 qualified)
 - Nickel (AS85049 qualified - RoHS)
 - Black Zinc Nickel
 - Nickel teflon PTFE
- **Random vibration:**
 - 1.0g²/Hz, 100 to 2000Hz, 2x8 Hrs
 - In accordance with EIA 364-28 test condition VI letter I
- **Shock:**
 - 980 m/s², 6 ms
 - In accordance with EIA 364-27 condition C

Environmental

- **Operating temperature:**
 - 65°C to +200°C
- **Salt spray:** 2000 hours
- **Fluid immersion:**
 - According to EIA 364-10

Electrical

- **EMI resistant**
- **Electrical continuity:** < 2.5 mΩ

Ordering information

Basic Series	AS85049/	88	-	11	N	02
Angle						
88: Straight						
89: 45°						
90: 90°						
Self-locking option						
- : Detent						
N: Non detent						
Shell size: 09, 11, 13, 15, 17, 19, 21, 23, 25						
Material and plating						
J: Composite, olive drab cadmium over electroless nickel, 1000 hours salt spray						
M: Composite, electroless nickel						
N: Aluminum, electroless nickel						
P: Aluminum, olive drab cadmium over electroless nickel with polysulfide sealant strips						
W: Aluminum, olive drab cadmium over electroless nickel, 1000 hours salt spray						
Entry size (see table next page): 02, 03

Note: All dimensions are in inches and millimeters (inch/mm). For complete dimensions, see the applicable Military Specification. Cable entry is defined as the envelope area of the cable or wire bundle. It is not intended for inspection criteria.

For connectors:

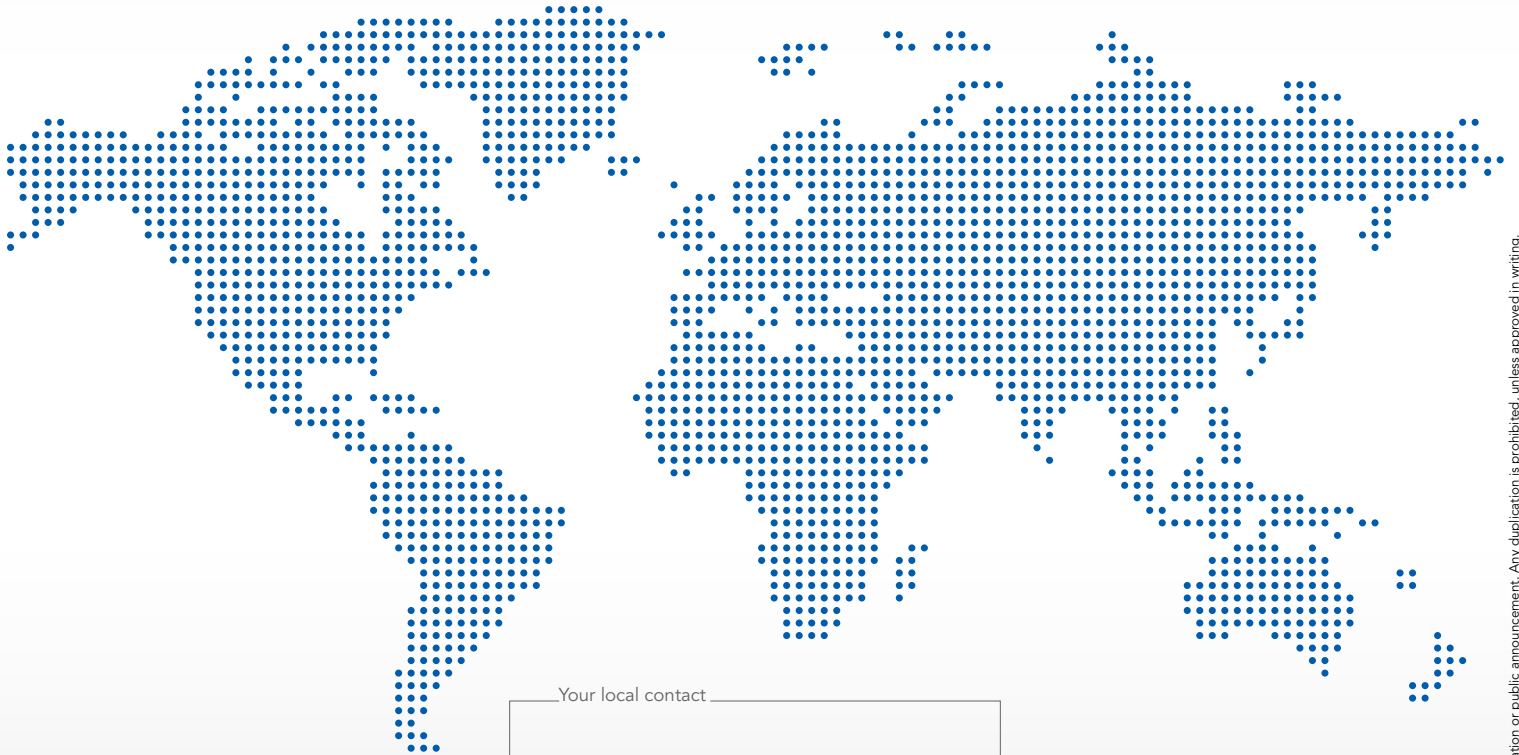

- MIL-DTL-38999 Series III & IV
- EN3645

Reliable and global interconnect solutions

Esterline Connection Technologies is a vertically integrated and full solution provider of high-performance and high-reliability interconnect products including connectors, backshells, conduits, cable assemblies, accessories and custom value-added solutions. Our company is composed of two highly respected interconnect brands, SOURIAU and SUNBANK, which have been servicing the aviation, defense, space, energy, transportation and general industry for over 100 years. Our success is attributed to our vast product offering and collaborative engineering and manufacturing approach to helping our customers with sophisticated and complex designs and offering a universal platform to service all your interconnect needs.
