10P

Drilling rig pin and sleeve power connections

PowerMate™ is designed to support the modularity of drilling rig systems by providing safe and reliable power connections for rigging up and rigging down equipment quickly and efficiently.

This offering is the ideal rig power connection solution providing:

- Longer product life
- Reduced maintenance
- Enhanced safety
- Easy installation

The PowerMate product offering is compatible with all UL1686 Listed plugs and receptacles, including:

- Eaton's Crouse-Hinds series Arkrite
- Appleton Powertite®
- Killark VersaMate®

Applications:

- SCR/VFD houses to provide power to rig equipment, such as shakers, agitators, lighting circuits, mud pumps, motors, etc.
- Quickly and efficiently connect power during rig ups and disconnect power during rig downs

Specifiable features:

- Lockout plug
- Fixed safety insulator
- Diamond cable clamp
- Split pin contacts
- Suited for use with Type P cable

Certifications and compliances:

- Plugs (CCP 30A-150A, including CCP3034) hazardous location rated when used with Eaton's Crouse-Hinds series interlocked receptacles (ex. FSQC, EBBR models)
 - Class I, Division 1, Groups B, C, D (excludes 200A)
 - Class II, Division 1, Groups F, G (excludes 200A)
- CE marked (excludes RS option and 200A)
- UL standards: UL1682; UL1686; NEMA250; IEC60309-1; IEC60309-2
- CSA standard: CSA 22.2 No. 182.1
- Suited for use with Type P cable, flexible cord and cables rated for extra hard usage
- NEMA 4X

Standard materials:

- Receptacle housing, plug and cord connector bodies – high impact strength copper-free aluminum (less than 0.4% copper)
- Back boxes – cast aluminum
- Insulation – fiberglass-reinforced polyester
- Contacts – naval brass

Standard finishes:

- Copper-free aluminum – epoxy powder coat
- Fiberglass-reinforced polyester – natural (red)
- Naval brass – natural

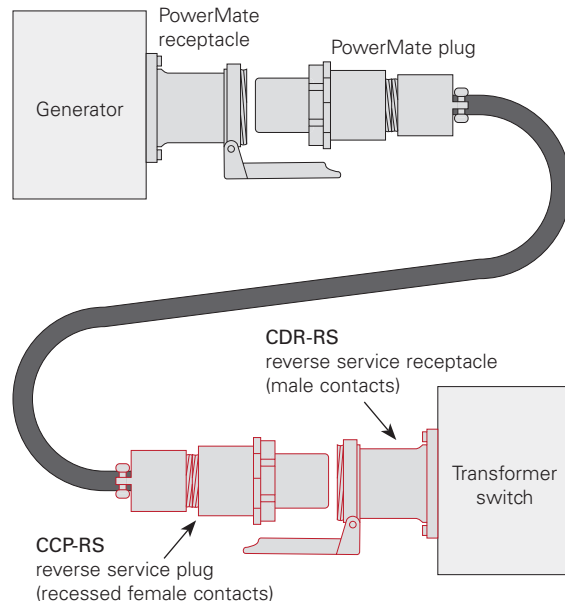

Electrical ratings:

- 30, 60, 100, 150, 200A; 600 VAC/250 VDC

Options:

- | Description | Suffix |
|--|-----------|
| <ul style="list-style-type: none"> • Reverse service..... <p><i>Receptacle assembled with plug interior (exposed contacts); plug assembled with receptacle interior (recessed contacts)</i></p> <p><i>For applications where plug is energized to feed normally de-energized receptacle; interiors are field interchangeable using only a screwdriver</i></p> <p><i>Excludes 150A and 200A units</i></p> | RS |
| <ul style="list-style-type: none"> • Special polarity..... <p><i>Receptacle interior rotated 22½° to right and plug changed to match</i></p> <p><i>For use where two or more receptacles of the same ampere rating, style and number of poles are to be installed in the same area for use on different voltages and/or frequencies</i></p> <p><i>Prevents insertion of a plug in a receptacle with different electrical rating</i></p> | P4 |

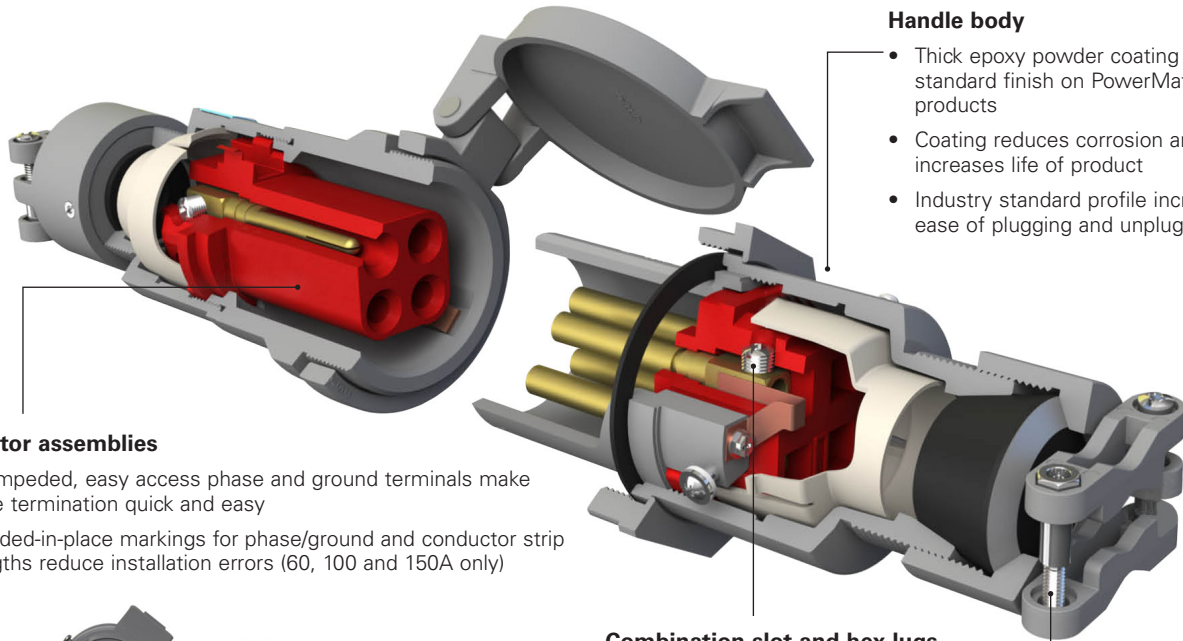

PowerMate plugs, receptacles and connectors

Drilling rig pin and sleeve power connections

UL Listed
CSA Certified
NEMA 4X

10P

Handle body

- Thick epoxy powder coating is standard finish on PowerMate products
- Coating reduces corrosion and increases life of product
- Industry standard profile increases ease of plugging and unplugging

Insulator assemblies

- Unimpeded, easy access phase and ground terminals make wire termination quick and easy
- Molded-in-place markings for phase/ground and conductor strip lengths reduce installation errors (60, 100 and 150A only)

Spring and threaded cover options

- Each 30, 60, 100 and 150A receptacle comes with both spring cap and threaded cap to provide a variety of cover options
- 200A comes with spring cap and wing nuts to ensure environmental sealing

Extended cable range

- Industry's largest cable diameter range
- Specifically designed, third party tested and certified for use with Type P cable
- Sealing system utilizes industry standard bushings

Combination slot and hex lugs

- Increases ease of installation by allowing for more than one option for installation tools
- Hex head allows for easy achievement of specified torque value

Combination drive stainless steel hardware

- Increases ease of installation by allowing for more than one option for installation tools
- Stainless steel external hardware eliminates corrosion on critical components and extends product life

Enhanced nomenclature and nameplate

- Easily understandable nomenclature increases ease of part configuration identification
- Mechanically attached nameplate ensures that critical information is permanently fixed to product

Exclusive features

8-point diamond cable clamps

- 8 points of contact around diameter of cable for increased grip and even distribution of pressure
- Cable jacket does not get pinched, eliminating potential for damage to internal conductors

Lockout plug

- Guarantees isolated power supply with OSHA compliant lockout/tagout
- Ensures plug cannot be inserted into receptacle when maintenance is being performed downstream of power supply

Split pin contact design

- Provides nearly 360° of contact at every insertion, ensuring protection against heat rise and eliminating arcing on critical surfaces
- Self-wiping at every insertion to remove foreign particles that create electrical resistance and product failure

Fixed safety insulator

- Prevents electrical shock and shorts with plastic barrier between insulator body and metal housing
- Fixed-in-place design ensures insulator will not be lost or discarded during cable termination process (30, 60, 100 and 150A only)

Drilling rig pin and sleeve power connections

Additional features – 200 amp:

Horsepower ratings:

Amperage	Voltage
30, 60, 100, 150, 200	600 VAC, 50-400 Hz; 250 VDC ^A

Maximum horsepower for plug and receptacle combinations by input voltage

Typical horsepower ratings based on NEC Article 430 tables. HP ratings are based on the largest conductor size for each plug and receptacle combination.

Amperage	Motor horsepower ^B		
	240V	480V	600V
30	15	30	40
60	20	40	50
100	30	60	75
150	40	75	100
200	60	125	150

Wire sizes:

The wire size table lists the diameter of the wire recess in PowerMate plug and receptacle contacts so that maximum size of bare conductor can be determined. Range of wire sizes shown in table are intended only as a guide. Depending on type of wire used (building wire, flexible or extra flexible cable) and its construction (number and size of strands), bare copper diameters vary widely.

Diameter: wire recess in plug and receptacle contacts

Amperage	Contact type	Diameter of recess	Wire size ^C extra flex
30 (2-, 3- and 4-pole)	Pressure	0.281"	#10 to #8
60 (2-, 3- and 4-pole)	Pressure	0.312"	#8 to #4
100 (2-, 3- and 4-pole)	Pressure	0.390"	#4 to #2
150 (4-pole)	Pressure	0.390"	#2 to 1/0
200 (3- and 4-pole)	Pressure	0.687"	2/0 to 250 MCM

Grounding:

Style 1 units complete the grounding circuit through the metallic plug shell, receptacle housing or connector shell.

Style 2 units with metal housing have a separate designated ground contact that is bonded to the metallic housing. The metallic housing of the plug, receptacle or connector forms a parallel ground circuit through the receptacle or connector detent spring.

^AThis guide is for reference only. Consult your local electrical codes before installation.

^BEaton's Crouse-Hinds Division recommends circuit breaking use be limited to emergency conditions only and that a horsepower rated switch or Eaton's Crouse-Hinds series interlocked receptacle be used for making and breaking under load.

^CDo not use wire size smaller than minimum size recommended.
