Description

20A, 3ØY 120/208V/AC, 4-Pole, 5-Wire
NEMA L21-20 20A

🔵 = Blue indicates 120/208 V/AC

L21-20R   **L21-20P**

Design features for plugs & connectors

• All nylon construction
• EPDM gasket seals cord hole from dust and debris
• Back wire terminal clamps for easy secure wiring
• Individual wiring compartments with tapered channel for easy insertion of wires
• Clear cover over wiring compartments allows easy inspection of wiring terminations
• Rating printed on side of device
• Double dovetail cord clamps with reversible inserts provide secure cord retention over a full range of cord diameters

Design features for receptacles

• Rugged glass filled nylon body
• Clearly marked rating, NEMA configuration and approval listings on receptacle face
• One piece brass contacts offer superior performance and minimum heat rise
• Back and side wiring terminal clamps for easy, secure wiring

Design features for flanged inlet & outlet

• All nylon construction
• Mounting holes interchangeable with competitive units
• Back wire terminal clamps for easy, secure wiring
• Individual wiring compartments with tapered channel for easy insertion of wires

Applications

The new Eaton Arrow Hart color coded locking devices are designed specifically to improve safety and increase labor savings on the job site. Eaton's color coded locking devices are an industry-first solution that uses the six voltage rating color codes consistent with IEC 60309 standards for plugs, connectors, inlets/outlets and receptacles. Color coded locking devices are available in standard NEMA configurations for 20A and 30A applications. Plugs and connectors are built with a durable nylon shell and body to provide long lasting, dependable service in commercial and industrial environments--their ergonomic design has a comfortable feel, and the double dovetail cord clamps with reversible inserts provide secure cord retention over a full range of cord diameters.
