

# Foreseer Electrical Power Monitoring Software (EPMS)

## Product snapshot

Foreseer® is a highly customizable **web based** software platform that has been in production for over 25 years and used by many customers worldwide to monitor, trend, analyze, predict, and store data.

### Foreseer supports monitoring of systems such as:

<b>Power</b>	Electrical distribution equipment (SWGR, SWDB, panels) power meters, branch circuit monitors, trip units, protective relays, UPS, generators, PDU, RPP, CRP, ATS, STS, VFD, and PLC.
<b>Environmental</b>	HVAC, chillers, pumps, condensers, temp/humidity, flow, and chilled water.
<b>Systems and Sub-systems</b>	BAS, leak detection, fuel management, battery monitoring, security, fire suppression, weather monitoring, and photovoltaic systems.
<b>WAGES</b>	Water, Air, Gas, Electric, and Steam

## Product overview

### Foreseer open communications 64 bit architecture supports:

- Polling and logging all integrated systems, devices, and parameters up to once per second
- Vendor-neutral software with an extensive library of device drivers available
- ModbusTCP or RTU, BACnet IP, OPC, LON, SNMP, proprietary protocols and others upon request
- Each server can support up to 3,000 devices or 500,000 channels
- Dashboard, device, single line, and floor plan webviews
- Email alarm notifications and standard reports

### Support available for:

- Dynamic one-line diagrams
- True redundancy or high availability
- Full graphics editing with web editors software
- Manager of Manager (MOM) for expansion beyond 3,000 devices and 500,000 channels
- Data Acquisition Engine (DAE)
- Sequence of events recorder with 1msec precision
- Onsite or offsite instructor lead training
- Customizable customer care agreements for software, hardware, or onsite engineering
- Engineering, hardware, project management, driver development, custom graphics development, system architecture and contractor drawing packages, and turnkey installation

*Powering Business Worldwide*

### Minimum hardware requirements

To run Foreseer, you'll need a server class machine with a minimum of two quad-core processors, 16GB of RAM, and 100GB of free drive space.

### Supported operating systems

Windows server operating systems	Server and message manager
Windows Server 2012 R2 Std	X
Windows Server 2012 R2 Datacenter	X
Windows Server 2016	X

Windows desktop operating systems	Message manager	Power Xpert bridge
Windows 10 Professional, x64	X	X
Windows 10 Enterprise, x64	X	X

### Supported database platforms

#### SQL server Express included, others provided by customer

- SQL Server 2012 Express w/Advanced Services
- SQL Server 2012 Std
- SQL Server 2012 Ent
- SQL Server 2012 Ent Core
- SQL Server 2012 Business Intelligence
- SQL Server 2012 SP2
- SQL Server 2014 Express, Std, Ent, Business Intelligence
- SQL Server 2016 Express, Std, Ent, Business intelligence

### Supported browsers

- |  |  |
|--|--|
| WebViews, WebAdmin   | WebConfig  |
| <ul style="list-style-type: none"> <li>• IE11</li> <li>• Chrome</li> <li>• Edge</li> <li>• Safari (macOS,iOS)</li> </ul> | <ul style="list-style-type: none"> <li>• IE11</li> </ul> |

### Protocols supported

- ModbusTCP or RTU
- BACnet IP
- SNMP
- OPC
- LON
- INCOM via Power Xpert Gateway
- Proprietary
- Others by request

### Supported interfaces to Building Automation System (BAS), Building Management System (BAS), Data Center Infrastructure Management (DCIM), and other integrated systems

- OPC gateway
- ModbusTCP gateway
- BACnet gateway
- SNMP gateway
